ALFORD
INTRODUCTION

ENGLISH GRAMMAR
WITH
CRITICAL NOTES

ALFORD, EDWARD, Compiler

Revised Edition, 1894. This edition is based on the
first edition of 1884, and contains a number of
corrections and additions. The principal changes are
in the sections on the verb and the noun. The
verb section has been completely rewritten, and
the noun section has been revised and enlarged.
The book is now more complete and accurate than
ever.

INTRODUCTION

TO

ENGLISH GRAMMAR

BY J. H. COLEMAN

A NEW EDITION

THE AUTHOR'S OBJECT IN REWRITING THIS GRAMMAR WAS TO PRESENT THE STUDENT WITH A CONCISE AND COMPLETE TREATISE OF THE ENGLISH LANGUAGE, AND TO EXPLAIN THE PRINCIPLES OF GRAMMAR IN A MANNER THAT SHOULD BE BOTH INSTRUCTIVE AND INTERESTING.

LONDON: J. H. COLEMAN

THE

P R E F A C E

The English Language has been much cultivated during the last two hundred

years. It has been considerably polished and refined; its bounds have been greatly enlarged;

its energy, variety, richness, and elegance, have been abundantly proved by numerous trials;

in every kind of style, upon all subjects, and in every kind of life, but, whatever other

improvements it may have received, it has made no advances in Grammatical accuracy.

Hooker is one of the earliest writers of considerable note, within the period men-

tioned: let his writings be compared with the best of those of more modern times, and I be-

lieve, it will be found, that the correctness, and the

THE
P R E F A C E.

THE English Language hath been much cultivated during the last two hundred years. It hath been considerably polished and refined; its bounds have been greatly enlarged; its energy, variety, richness, and elegance, have been abundantly proved, by numberless trials, in verse and in prose, upon all subjects, and in every kind of style: but, whatever other improvements it may have received, it hath made no advances in Grammatical Accuracy. Hooker is one of the earliest writers, of considerable note, within the period above mentioned: let his writings be compared with the best of those of more modern date; and, I believe, it will be found, that in correctness,

propriety, and purity of English style, he hath hardly been surpassed, or even equalled, by any of his successors.

It is now about fifty years, since Doctor Swift made a public remonstrance, addressed to the Earl of Oxford, then Lord Treasurer, concerning the imperfect State of our Language; alleging in particular, “that in many
“instances it offended against every part of
“Grammar.” Swift must be allowed to have been a good judge of this matter; to which he was himself very attentive, both in his own writings, and in his remarks upon those of his friends: he is one of the best and most correct of our prose writers. Indeed, the justness of this complaint, as far as I can find, hath never been questioned; and yet no effectual method hath hitherto been taken to redress the grievance, which was the object of it.

But let us consider, how, and in what extent, we are to understand this charge brought against the English Language: for the Author seems not to have explained himself with sufficient clearness and precision on this head.

Does it mean, that the English Language, as it is spoken by the politest part of the nation, and as it stands in the writings of our most approved authors, often offends against every part of Grammar? Thus far, I am afraid, the charge is true. Or does it further imply, that our Language is in its nature irregular and capricious; not hitherto subject, nor easily reducible, to a System of rules? In this respect, I am persuaded, the charge is wholly without foundation.

The English Language is perhaps of all the present European Languages by much the most simple in its form and construction. Of all the antient Languages extant That is the most simple, which is undoubtedly the most antient; but even that Language itself does not equal the English in simplicity.

The words of the English Language are perhaps subject to fewer variations from their original form, than those of any other. Its Substantives have but one variation of Case; nor have they any distinction of Gender, beside that which nature hath made. Its Ad-

jectives admit of no change at all, except that which expresses the degrees of comparison. All the possible variations of the original form of the Verb are not above six or seven; whereas in many Languages they amount to some hundreds: and almost the whole business of Modes, Times, and Voices, is managed with great ease by the assistance of eight or nine commodious little Verbs, called from their use Auxiliaries. The Construction of this Language is so easy and obvious, that our Grammarians have thought it hardly worth while to give us any thing like a regular and systematical Syntax. The English Grammar, which hath been last presented to the public, and by the Person best qualified to have given us a perfect one, comprises the whole Syntax in ten lines: for this reason; "because our Language has so little inflexion, that its construction neither requires nor admits many rules." In truth, the easier any subject is in its own nature, the harder it is to make it more easy by explanation; and nothing is more unnecessary, and at the same time commonly more difficult, than

3

than to give a formal demonstration of a proposition almost self-evident.

It doth not then proceed from any peculiar irregularity or difficulty of our Language, that the general practice both of speaking and writing it is chargeable with inaccuracy. It is not the Language, but the Practice that is in fault. The truth is, Grammar is very much neglected among us: and it is not the difficulty of the Language, but on the contrary the simplicity and facility of it, that occasions this neglect. Were the Language less easy and simple, we should find ourselves under a necessity of studying it with more care and attention. But as it is, we take it for granted, that we have a competent knowledge and skill, and are able to acquit ourselves properly, in our own native tongue: a faculty, solely acquired by use, conducted by habit, and tried by the ear, carries us on without reflexion; we meet with no rubs or difficulties in our way, or we do not perceive them; we find ourselves able to go on without rules, and we do not so

much

much as suspect, that we stand in need of them.

A Grammatical Study of our own Language makes no part of the ordinary method of instruction, which we pass through in our childhood, and it is very seldom that we apply ourselves to it afterward. Yet the want of it will not be effectually supplied by any other advantages whatsoever. Much practice in the polite world, and a general acquaintance with the best authors, are good helps; but alone will hardly be sufficient: we have writers, who have enjoyed these advantages in their full extent, and yet cannot be recommended as models of an accurate style. Much less then will what is commonly called Learning serve the purpose; that is, a critical knowledge of antient Languages, and much reading of antient authors: the greatest Critic and most able Grammarian of the last age, when he came to apply his Learning and his Criticism to an English Author, was frequently at a loss in matters
of

of ordinary use and common construction in his own Vernacular Idiom.

But perhaps the Notes subjoined to the following pages will furnish a more convincing argument, than any thing that can be said here, both of the truth of the charge of Inaccuracy brought against our Language, as it subsists in Practice; and of the necessity of investigating the Principles of it, and studying it Grammatically, if we would attain to a due degree of skill in it. It is with reason expected of every person of a liberal education, and it is indispensably required of every one who undertakes to inform or entertain the public, that he should be able to express himself with propriety and accuracy. It will evidently appear from these Notes, that our best authors have committed gross mistakes, for want of a due knowledge of English Grammar, or at least of a proper attention to the rules of it. The examples there given are such as occurred in reading, without any very curious or methodical examination: and they might easily have been much increased in number

ber by any one, who had leisure or phlegm enough to go through a regular course of reading with this particular view. However, I believe, they may be sufficient to answer the purpose intended; to evince the necessity of the Study of Grammar in our own Language; and to admonish those, who set up for authors among us, that they would do well to consider this part of Learning as an object not altogether beneath their regard.

The principal design of a Grammar of any Language is to teach us to express ourselves with propriety in that Language; and to enable us to judge of every phrase and form of construction, whether it be right or not. The plain way of doing this is, to lay down rules, and to illustrate them by examples. But, beside shewing what is right, the matter may be further explained by pointing out what is wrong. I will not take upon me to say, whether we have any Grammar, that sufficiently instructs us by rule and example; but I am sure we have none, that in the manner here attempted, teaches us what is right by shew-
ing

ing what is wrong ; though this perhaps may prove the more useful and effectual method of instruction.

Beside this principal Design of Grammar in our own Language, there is a secondary use to which it may be applied, and which, I think, is not attended to as it deserves ; the facilitating of the acquisition of other Languages, whether antient or modern. A good foundation in the General Principles of Grammar is in the first place necessary for all those, who are initiated in a learned education ; and for all others likewise, who shall have occasion to furnish themselves with the knowledge of modern Languages. Universal Grammar cannot be taught abstractedly : it must be done with reference to some Language already known ; in which the terms are to be explained and the rules exemplified. The learner is supposed to be unacquainted with all, but his native tongue ; and in what other, consistently with reason and common sense, can you go about to explain it to him ? When he has a competent knowledge of the main principles of Grammar

in general, exemplified in his own Language; he then will apply himself with great advantage to the study of any other. To enter at once upon the Science of Grammar, and the study of a foreign Language, is to encounter two difficulties together, each of which would be much lessened by being taken separately and in its proper order. For these plain reasons, a competent grammatical knowledge of our own language is the true foundation, upon which all Literature, properly so called, ought to be raised. If this method were adopted in our Schools; if children were first taught the common principles of Grammar, by some short and clear System of English Grammar, which happily by its simplicity and facility is perhaps fitter than that of any other Language for such a purpose; they would have some notion of what they were going about, when they should enter into the Latin Grammar; and would hardly be engaged so many years, as they now are, in that most irksome and difficult part of Literature, with so much labour of
the

the memory, and with so little assistance of the understanding.

A design somewhat of this kind gave occasion to the following little system, intended merely for a private and domestic use. The chief end of it was to explain the general principles of Grammar, as clearly and intelligibly as possible. In the definitions, therefore, easiness and perspicuity have been sometimes preferred to logical exactness. The common divisions have been complied with, as far as reason and truth would permit. The known and received terms have been retained; except in one or two instances, where others offered themselves, which seemed much more significant. All disquisitions, which appeared to have more of subtilty than of usefulness in them, have been avoided. In a word, it was calculated for the use of the learner, even of the lowest class. Those, who would enter more deeply into this Subject, will find it fully and accurately handled, with the greatest acuteness of investigation, perspicuity of explication, and elegance of method, in a treatise

~~THE~~

~~OF~~
~~THE~~
PREFACE.
intitl'd HERMES, by JAMES HARRIS,
the most beautiful and perfect example
of Analysis, that has been exhibited since the
of Aristotle.

The author is greatly obliged to several
Learned Gentlemen, who have favoured him
with their remarks upon the first Edition,
which was indeed principally designed to pro-
cure their assistance, and to try the judge-
ment of the public. He hath endeavoured
to weigh their observations, without prejudice
or partiality; and to make the best use of
the lights, which they have afforded him. He
hath been enabled to correct several mistakes;
and encouraged carefully to revise the whole,
and to give it all the improvement which his
present materials can furnish. He hopes for
the continuance of their favour, as he is
sensible there will still be abundant occasion
for it. A system of this kind, arising from
the collection and arrangement of a multitude
of minute particulars, which often elude the
most careful search, and sometimes escape
observation

observation when they are most obvious, must always stand in need of improvement. It is indeed the necessary condition of every work of human art or science, small as well as great, to advance towards perfection by slow degrees; by an approximation, which though it still may carry it forward, yet will certainly never bring it to the point to which it tends.

A SHORT

Я В И Е А

A SHORT
INTRODUCTION
TO
ENGLISH GRAMMAR.

GRAMMAR.

GRAMMAR is the Art of rightly expressing our thoughts by Words.

Grammar in general, or Universal Grammar, explains the principles, which are common to all languages.

The Grammar of any particular Language, as the English Grammar, applies those common principles to that particular language, according to the established usage and custom of it.

Grammar treats of Sentences; and of the several parts, of which they are compounded.

B

Sentences

Sentences consist of Words; Words, of one or more Syllables; Syllables, of one or more Letters.

So that Letters, Syllables, Words, and Sentences, make up the whole subject of Grammar.

L E T T E R S.

A LETTER is the first Principle, or least part, of a Word.

An Articulate Sound is the sound of the human voice, formed by the organs of speech.

A Vowel is a simple articulate sound, formed by the impulse of the voice, and by the opening only of the mouth in a particular manner.

A Consonant cannot be perfectly sounded by itself; but joined with a vowel forms a compound articulate sound, by a particular motion or contact of the parts of the mouth.

A Diph-

A Diphthong, or compound vowel, is the union of two or more vowels pronounced by a single impulse of the voice.

In English there are twenty-six Letters.

A, a ; B, b ; C, c ; D, d ; E, e ; F, f ;
G, g ; H, h ; I, i ; J, j ; K, k ; L, l ; M, m ;
N, n ; O, o ; P, p ; Q, q ; R, r ; S, s ; T, t ;
U, u ; V, v ; W, w ; X, x ; Y, y ; Z, z.

J, j ; and *V, v* ; are consonants ; the former having the sound of the soft *g*, and the latter that of a coarser *f* : they are therefore entirely different from the vowels *i* and *u*, and distinct letters of themselves ; they ought also to be distinguished from them, each by a peculiar Name ; the former may be called *ja*, and the latter *vee*.

The Names then of the twenty-six letters will be as follows : *a, bee, cee, dee, e, ef, gee, aitch, i, ja, ka, el, em, en, o, pee, cue, ar, ess, tee, u, vee, double u, ex, y, zad.*

Six of the letters are vowels, and may be sounded by themselves ; *a, e, i, o, u, y.*

E is generally silent at the end of a word ; but it has its effect in lengthening the preceding vowel, as *bid*, *bide* : and sometimes likewise in the middle of a word ; as, *ungrateful*, *retirement*. Sometimes it has no other effect, than that of softening a preceding *g* : as, *lodge*, *judge*, *judgement* ; for which purpose it is quite necessary in these and the like words.

X is in sound wholly the same with *i* ; and is written instead of it at the end of words ; or before *i*, as *flying*, *denying* : it is retained likewise in some words derived from the Greek ; and it is always a vowel [1].

[1] The same sound, which we express by the initial *y*, our Saxon Ancestors in many instances expressed by the vowel *e*, as *cower*, *your* : and by the vowel *i* ; as *iw*, *yew* ; *ioug*, *young*. In the word *yew*, the initial *y* has precisely the same sound with *i* in the words *view*, *lieu*, *adieu* : the *i* is acknowledged to be a Vowel in these latter ; how then can the *y*, which has the very same sound, possibly be a Consonant in the former ? Its initial sound is generally like that of *i* in *shirc*, or *ee* nearly : it is formed by the opening of the mouth, without any motion or contact of the parts : in a word, it has every property of a Vowel, and not one of a Consonant.

W is

W is either a vowel, or diphthong; its proper sound is the same as the Italian *u*, the French *ou*, or the English *oo*: after *o*, it is sometimes not sounded at all; sometimes like a single *u*.

The rest of the letters are consonants; which cannot be sounded alone; some not at all, and these are called Mutes; *b, c, d, g, k, p, q, t*: others very imperfectly, making a kind of obscure sound; and these are called Semi-vowels, or Half-vowels, *l, m, n, r, f, s*; the first four of which are also distinguished by the name of Liquids.

The Mutes and the Semi-vowels are distinguished by their names in the Alphabet; those of the former all beginning with a consonant, *bee, cee, &c.*; those of the latter all beginning with a vowel, *ef, el, &c.*

X is a double consonant, compounded of *c*, or *k*, and *s*.

Z seems not to be a double consonant in English, as it is commonly supposed: it has the same relation to *s*, as *v* has to *f*, being a thicker and coarser expression of it.

H is only an Aspiration, or Breathing: and sometimes at the beginning of a word is not sounded at all; as, *an hour, an honest man.*

C is pronounced like *k*, before *a, o, u*; and soft, like *s*, before *e, i, y*: in like manner *g* is pronounced always hard before *a, o, u*; sometimes hard and sometimes soft before *i*, and *y*; and for the most part soft before *e*.

The English Alphabet, like most others, is both deficient and redundant; in some cases, the same letters expressing different sounds, and different letters expressing the same sounds.

S Y L L A B L E S.

A SYLLABLE is a sound either simple or compounded, pronounced by a single impulse of the voice, and constituting a word or part of a word.

Spelling is the art of reading by naming the letters singly, and rightly dividing words
into

into their syllables. Or, in writing, it is the expressing of a word by its proper letters.

In spelling, a syllable in the beginning or middle of a word ends in a vowel, unless it be followed by *x*; or by two or more consonants: these are for the most part to be separated; and at least one of them always belongs to the preceding syllable, when the vowel of that syllable is pronounced short. Particles in Composition, though followed by a vowel, generally remain undivided in spelling. A mute generally unites with a liquid following; and a liquid, or a mute, generally separates from a mute following: *le* and *re* are never separated from a preceding mute. Examples: *ma-ni-fest*, *ex-e-cra-ble*, *un-e qual*, *mis-ap-ply*, *dis-tin-guish*, *cor-res-pond-ing*.

But the best and easiest rule, for dividing the syllables in spelling, is to divide them as they are naturally divided in a right pronunciation; without regard to the derivation of words, or the possible combination of consonants at the beginning of a syllable.

W O R D S.

WORDS are articulate sounds, used by common consent as signs of ideas or notions.

There are in English nine Sorts of Words, or, as they are commonly called, Parts of Speech.

1. The ARTICLE; prefixed to substantives, when they are common names of things, to point them out, and to shew how far their signification extends.

2. The SUBSTANTIVE, or NOUN; being the name of any thing conceived to subsist, or of which we have any notion.

3. The PRONOUN; standing instead of the noun.

4. The ADJECTIVE; added to the noun to express the quality of it.

5. The VERB; or Word, by way of eminence; signifying to be, to do, or to suffer.

6. The

6. The ADVERB; added to verbs, and also to adjectives and other adverbs, to express some circumstance belonging to them.

7. The PREPOSITION; put before nouns and pronouns chiefly, to connect them with other words, and to shew their relation to those words.

8. The CONJUNCTION; connecting sentences together.

9. The INTERJECTION; thrown in to express the affection of the speaker, though unnecessary with respect to the construction of the sentence.

EXAMPLE.

¹The ²power ⁷of ²speech ⁵is ¹a ²faculty ⁴peculiar
⁷to ²man, ⁸and ⁵was ⁵bestowed ⁷on ³him ⁷by ³his
⁴beneficent ²Creator ⁷for ¹the ⁴greatest ⁸and ⁶most
⁴excellent ²uses; ⁸but ⁹alas! ⁶how ⁶often ⁵do ³we
⁵pervert ³it ⁷to ¹the ⁴worst ⁷of ²purposes?

In

In the foregoing sentence, the Words *the, a*, are Articles ; *power, speech, faculty, man, creator, uses, purposes*, are Substantives ; *him, his, we, it*, are Pronouns ; *peculiar, beneficent, greatest, excellent, worst*, are Adjectives ; *is, was, bestowed. do, pervert*, are Verbs ; *most, how, often*, are Adverbs ; *of, to, on, by, for*, are Prepositions ; *and, but*, are Conjunctions ; and *alas* is an Interjection.

The Substantives, *power, speech, faculty*, and the rest, are General, or Common, Names of things ; whereof there are many sorts belonging to the same kind ; or many individuals belonging to the same sort : as there are many sorts of power, many sorts of speech, many sorts of faculty, many individuals of that sort of animal called man ; and so on. These general or common names are here applied in a more or less extensive signification ; according as they are used without either, or with the one, or with the other, of the two Articles *a* and *the*. The words *speech, man*, being accompanied with no article, are taken in their largest

largest extent ; and signify all of the kind or sort ; all sorts of speech and all men. The word *faculty*, with the article *a* before it, is used in a more confined signification, for some one out of many of that kind ; for it is here implied, that there are other faculties peculiar to man beside speech. The words, *power*, *creator*, *uses*, *purposes*, with the article *the* before them (for *his* Creator is the same as *the* Creator of *him*,) are used in the most confined signification, for the things here mentioned and ascertained : *the power* is not any one indeterminate power out of many sorts, but that particular sort of power here specified ; namely, the power of speech : *the creator* is the One great Creator of man and of all things : *the uses*, and *the purposes* are particular uses and purposes ; the former are explained to be those in particular, that are the greatest and most excellent ; such, for instance, as the glory of God, and the common benefit of mankind ; the latter to be the worst, as lying, slandering, blaspheming, and the like.

The

The pronouns, *him*, *his*, *we*, *it*, stand instead of some of the nouns, or substantives, going before them; as, *him* supplies the place of *man*; *his*, of *man's*; *we*, of *men*, implied in the general name *man*, including all men, (of which number is the speaker;) *it*, of *the power*, before mentioned. If, instead of these pronouns, the nouns for which they stand had been used, the sense would have been the same; but the frequent repetition of the same words would have been disagreeable and tedious: as, The power of speech peculiar to *man*, bestowed on *man*, by *man's* Creator, &c.

The Adjectives, *peculiar*, *beneficent*, *greatest*, *excellent*, *worst*, are added to their several substantives, to denote the character and quality of each.

The Verbs, *is*, *was bestowed*, *do pervert*, signify severally, being, suffering, and doing. By the first it is implied, that there is such a thing as the power of speech, and it is affirmed to be of such a kind; namely, a faculty peculiar to man: by the second it
is

is said to have been acted upon, or to have had something done to it; namely, to have been bestowed on man: by the last, we are said to act upon it, or to do something to it; namely, to pervert it.

The Adverbs, *most*, *often*, are added to the adjective *excellent*, and to the verb *pervert*, to shew the circumstance belonging to them; namely, that of the highest degree to the former, and that of frequency to the latter: concerning the degree of which frequency also a question is made, by the adverb *how* added to the adverb *often*.

The Prepositions, *of*, *to*, *on*, *by*, *for*, placed before the substantives and pronouns, *speech*, *man*, *him*, &c. connect them with other words, substantives, adjectives, and verbs, as *power*, *peculiar*, *bestowed*, &c. and shew the relation which they have to those words; as the relation of subject, object, agent, end; *for* denoting the end, *by* the agent, *on* the object; *to* and *of* denote possession, or the belonging of one thing to another.

The

The Conjunctions, *and*, and *but*, connect the three parts of the sentence together; the first more closely, both with regard to the sentence and the sense; the second connecting the parts of the sentence, though less strictly, and at the same time expressing an opposition in the sense.

The Interjection *alas!* expresses the concern and regret of the speaker; and though thrown in with propriety, yet might have been omitted, without injuring the construction of the sentence, or destroying the sense.

A R T I C L E.

THE ARTICLE is a word prefixed to substantives, to point them out, and to shew how far their signification extends.

In English there are but two articles, *a*, and *the*: *a* becomes *an* before a vowel, *y* and *w* [2] excepted; and before a silent *b* preceding a vowel.

[2] The pronunciation of *y*, or *w*, as part of a diphthong at the beginning of a word, requires such an

A is

A is used in a vague sense to point out one single thing of the kind, in other respects indeterminate : *the* determines what particular thing is meant.

A substantive, without any article to limit it, is taken in its widest sense : thus *man* means all mankind ; as,

“ The proper study of mankind is man.”

Pope.

Where *mankind* and *man* may change places, without making any alteration in the sense.

A man means some one or other of that kind, indefinitely ; *the man* means, definitely, that particular man, who is spoken of : the former therefore is called the Indefinite, the latter the Definite Article [3].

effort in the conformation of the parts of the mouth, as does not easily admit of the article *an* before them. In other cases the article *an* in a manner coalesces with the vowel which it precedes : in this, the effort of pronunciation separates the article, and prevents the disagreeable consequence of a sensible hiatus.

[3] “ And I persecuted this way unto *the* death.”
Acts, xxii. 4. The Apostle doth not mean any particular sort of death, but death in general : the Definite
Example :

Example: “*Man* was made for society, and ought to extend his good will to all *men* :

Article therefore is improperly used. It ought to be *unto death*, without any Article: agreeably to the Original, *αχρι θανατης*. See also 2 Chron. xxii. 24.

“When He, the Spirit of truth, is come, he will guide you into *all truth*.” John, xvi. 13. That is, according to this translation, into all Truth whatsoever, into Truth of all kinds: very different from the meaning of the Evangelist, and from the Original, *εις παντην αληθειαν*, into all *the* Truth; that is, into all Evangelical Truth.

“Truly this was *the* Son of God.” Matt. xxvii. 54. and Mark, xv. 39. This translation supposes, that the Roman Centurion had a proper and adequate notion of the character of Jesus, as the Son of God in a peculiar and incommunicable sense: whereas, it is probable, both from the circumstances of the History, and from the expression of the Original, (*υιος Θεου*, a Son of God, or, of a God, not *ο υιος the* Son,) that he only meant to acknowledge him to be an extraordinary person, and more than a mere man; according to his own notion of Sons of Gods in the Pagan Theology. This is also more agreeable to St. Luke’s account of the same confession of the Centurion: “Certainly this was *δικαιος*, a righteous man;” not *ο Δικαιος*, the Just one. The same may be observed of Nebuchadnezzar’s words, Dan. iii. 25. “And the form of the fourth is like *the* Son of God:” it
but

but *a man* will naturally entertain a more particular kindness for *the men*, with whom

ought to be expressed by the Indefinite Article, like *a* Son of God; ὁμοία ὡς Θεῷ, as Theodotion very properly renders it: that is, like an Angel; according to Nebuchadnezzar's own account of it in the 28th verse: "Blessed be God, who hath sent his *Angel*, and delivered his servants." See also Luke, xix. 9.

"Who breaks a butterfly upon *a* wheel?" Pope. It ought to be, *the* wheel; used as an instrument for the particular purpose of torturing Criminals: as Shakespear:

"Let them pull all about mine ears; present me Death on *the* wheel, or at wild horses heels."

"God Almighty hath given reason to *a* man to be a light unto him." Hobbes, Elements of Law, Part I. Chap. v. 12. It should rather be, "to man," in general.

These remarks may serve to shew the great importance of the proper use of the Article; the near affinity there is between the Greek Article and the English Definite Article; and the excellence of the English Language in this respect, which by means of its two Articles does most precisely determine the extent of signification of Common Names: whereas the Greek has only one Article, and it has puzzled all the Grammarians to reduce the use of that to any clear and certain rules.

he has the most frequent intercourse ; and enter into a still closer union with *the man*, whose temper and disposition suit best with his own.”

It is of the nature of both the articles to determine or limit the thing spoken of: *a* determines it to be one single thing of the kind, leaving it still uncertain which ; *the* determines which it is, or, of many, which they are. The first therefore can only be joined to Substantives in the singular number [4] ; the last may also be joined to plurals.

There is a remarkable exception to this rule in the use of the Adjectives *few* and *many*, (the latter chiefly with the word *great* before it,) which though joined with plural Substantives, yet admit of the singular Article *a* : as, *a few men*, *a great many men* :

[4] “ A good character should not be rested in as an end, but employed as *a means* of doing still further good.” Atterbury, Serm. II. 3. Ought it not to be *a mean*? “ I have read an author of this taste, that compares a ragged coin to *a tattered colours*.” Addison, Dial. I. on Medals.

“ Told

“Told of *a many thousand* warlike French :”

“A care craz’d mother of *a many children*.”

Shakespear.

The reason of it is manifest from the effect, which the article has in these phrases: it means a small or great number collectively taken, and therefore gives the idea of a Whole, that is, of unity [5]. Thus likewise *a hundred, a thousand*, is one whole number, an aggregate of many collectively

[5] Thus the word *many* is taken collectively as a Substantive:

“O thou fond *Many*! with what loud applause
Didst thou beat heav’n with blessing Bolingbroke,
Before he was what thou wouldst have him be!”

Shakespear, 2 Henry IV.

But it will be hard to reconcile to any Grammatical propriety the following phrase: “*Many one* there be, that say of my soul; There is no help for him in his God.” Psal. iii. 2.

“*How many a message* would he send!”

Swift, Verses on his own Death.

“He would send *many a message*,” is right: but the question *how* seems to destroy the unity, or collective nature, of the Idea; and therefore it ought to have been expressed, if the measure would have allowed of it, without the article, in the plural number; “*how many messages*.”

taken; and therefore still retains the Article *a*, though joined as an Adjective to a plural Substantive; as, *a hundred years* [6].

“For harbour at *a thousand doors* they knock’d;
Not one of all *the thousand*, but was lock’d.”

Dryden.

The Definite Article *the* is sometimes applied to Adverbs in the Comparative and Superlative degree; and its effect is to mark the degree the more strongly, and to define it the more precisely: as, “*The more* I examine it, *the better* I like it. I like this *the least* of any.”

[6] “There were slain of them upon *a* three thousand men:” that is, to the number of three thousand. 1 Macc. iv. 15. “About *an* eight Days:” that is, a space of eight days. Luke ix. 28. But the expression is obsolete, or at least vulgar; and, we may add likewise, improper: for neither of these numbers has been reduced by use and convenience into one collective and compact idea, like *a hundred*, and *a thousand*; each of which, like *a dozen*, or *a score*, we are accustomed equally to consider on certain occasions as a simple Unity.

SUB-

S U B S T A N T I V E.

A SUBSTANTIVE, or NOUN, is the *Name* of a thing; of whatever we conceive in any way to *subsist*, or of which we have any notion.

Substantives are of two sorts; Proper, and Common, Names. Proper Names are the Names appropriated to individuals; as the Names of persons and places: such are *George, London*. Common Names stand for kinds, containing many sorts; or for sorts, containing many individuals under them; as, *Animal, Man*. And these Common Names, whether of kinds or sorts, are applied to express individuals, by the help of Articles added to them, as hath been already shewn; and by the help of Definitive Pronouns, as we shall see hereafter.

Proper Names being the Names of individuals, and therefore of things already as determinate as they can be made, admit not of Articles, or of Plurality of number; un-

less by a Figure, or by Accident: as, when great Conquerors are called *Alexander*; and some great Conqueror *An Alexander*, or *The Alexander* of his Age: when a Common Name is understood, as *The Thames*, that is, the *River Thames*; *The George*, that is, the *Sign* of St. George: or when it happens, that there are many persons of the same name; as, *The two Scipios*.

Whatever is spoken of is represented as one, or more, in Number: these two manners of representation in respect of number are called the Singular, and the Plural, Number.

In English, The Substantive Singular is made Plural, for the most part, by adding to it *s*; or *es*, where it is necessary for the pronunciation: as *king, kings*; *fox, foxes*; *leaf, leaves*; in which last, and many others, *f* is also changed into *v*, for the sake of an easier pronunciation, and more agreeable sound.

Some few Plurals end in *en*; as, *oxen, children, brethren, and men, women*, by changing

changing the *a* of the Singular into *e* [7]. This form we have retained from the Teutonic; as likewise the introduction of the *e* in the former syllable of two of the last instances; *weomen*, (for so we pronounce it,) *brethren*, from *woman*, *brother* [8]: something like which may be noted in some other forms of Plurals: as *mouse*, *mice*; *louse*, *lice*, *tooth*, *teeth*; *foot*, *feet*; *goose*, *geese* [9].

The words *sheep*, *deer*, are the same in both Numbers.

Some Nouns, from the nature of the things which they express, are used only in the Singular, others only in the Plural, Form: as, *wheat*, *pitch*, *gold*, *sloth*, *pride*, &c. and *bellows*, *scissars*, *lungs*, *bowels*, &c.

[7] And antiently, *eyen*, *shoen*, *housen*, *hosen*: so likewise antiently *swen*, *cwen*, now always pronounced and written *swine*, *kine*.

[8] In the German, the vowels, *a*, *o*, *u*, of monosyllable Nouns are generally in the Plural changed into diphthongs with an *e*: as *die hand*, the hand, *die hände*; *der hut*, the hat, *die hüte*; *der knotff*, the button, (or knob,) *die knöpffe*; &c.

[9] These are directly from the Saxon: *mus*, *mys*; *las*, *lys*; *toth*, *teth*; *fot*, *fet*; *gos*, *ges*.

The English Language, to express different connexions and relations of one thing to another, uses, for the most part, Prepositions. The Greek and Latin among the antient, and some too among the modern languages, as the German, vary the termination or ending of the Substantive, to answer the same purpose. These different endings are in those languages called Cases. And the English being derived from the same origin as the German, that is, from the Teutonic [1], is not wholly without them. For instance, the relation of Possession, or Belonging, is often expressed by

[1] “*Lingua Anglorum hodierna avitæ Saxonicae formam in plerisque orationis partibus etiamnum retinet. Nam quoad particulas casuales, quorundam casuum terminationes, conjugationes verborum, verbum substantivum, formam passivæ vocis, pronomina, participia, conjunctiones, et præpositiones omnes; denique, quoad idiomata, phrasiumque maximam partem, etiam nunc Saxonicus est Anglorum sermo.*”
 Hickes, Thesaur. Ling. Septent. Præf. p. vi. To which may be added the Degrees of Comparison, the form of which is the very same in the English as in the Saxon.

a Case,

a Case, or different ending of the Substantive. This Case answers to the Genitive Case in Latin, and may still be so called; though perhaps more properly the Possessive Case. Thus “*God’s* grace:” which may also be expressed by the Preposition; as, “the grace *of* *God*.” It was formerly written, “*Godis* grace;” we now always shorten it with an Apostrophe; often very improperly, when we are obliged to pronounce it fully; as, “*Thomas’s* book:” that is, “*Thomasis* book,” not “*Thomas his* book,” as it is commonly supposed [2].

[2] “*Christ his* sake,” in our Liturgy, is a mistake, either of the Printers, or of the Compilers. “Nevertheless, *Asha his* heart was perfect with the Lord.” 1 Kings, xv. 14. “To see whether *Mordecai his* matters would stand.” Esther, iii. 4.

“Where is this mankind now? who lives to age
Fit to be made *Methusalem his* page?” Donne.

“By young *Telemachus his* blooming years.”

Pope’s *Odyssey*.

“My Paper is *Ulysses his* bow, in which every man of wit or learning may try his strength.” Addison, *Guardian*, N^o 98. See also *Spect.* N^o 207. This is no slip of Mr. Addison’s pen: he gives us his opinion
When

When the thing, to which another is said to belong, is expressed by a circumlocution, or by many terms, the sign of the Possessive Case is commonly added to the last term; as, "The King of Great *Britain's* Soldiers." When it is a Noun ending in *s*, the sign of the Possessive Case is sometimes not added; as, "for *righteousness's* sake [3];" nor ever to the Plural Number ending in *s*; as, "on

upon this point very explicitly in another place. "The same single letter *s* on many occasions does the office of a whole word, and represents the *his* and *her* of our forefathers." Addison, Spect. N^o 135. The latter instance might have shewn him, how groundless this notion is: for it is not easy to conceive how the letter *s* added to a Feminine Noun should represent the word *her*; any more than it should the word *their*, added to a Plural Noun; as, "the *children's* bread." But the direct derivation of this Case from the Saxon Genitive Case is sufficient of itself to decide this matter.

[3] In Poetry, the Sign of the Possessive Case is frequently omitted after Proper Names ending in *s* or *x*; as, "The wrath of Peleus' Son." Pope. This seems not so allowable in Prose: as, "Moses' minister." Josh. i. 1. "Phinehas' wife." 1 Sam. iv. 19. "Festus came into Felix' room." Acts, xxiv. 27.

eagles' wings [4].” Both the Sign and the Preposition seem sometimes to be used; as, “a soldier *of the king's* :” but here are really two Possessives; for it means, “one *of the soldiers of the king*.”

The English in its Substantives has but two different terminations for Cases; that of the Nominative, which simply expresses the Name of the thing, and that of the Possessive Case.

Things are frequently considered with relation to the distinction of Sex or Gender; as being Male, or Female, or Neither the one, nor the other. Hence Substantives are of the Masculine, or Feminine, or Neuter, (that is, Neither,) Gender: which lat-

[4] “It is very probable, that this Convocation was called, to clear some doubt, that King James might have had, about the lawfulness of the Hollanders *their* throwing off the Monarchy of Spain, and *their* withdrawing for good and all their allegiance to that Crown.” Welwood's Memoirs, p. 31. 6th Edit. In this Sentence the Pronominal Adjective *their* is twice improperly added; the Possessive Case being sufficiently expressed without it.

ter

ter is only the exclusion of all consideration of Gender.

The English Language, with singular propriety, following nature alone, applies the distinction of Masculine and Feminine only to the names of Animals; all the rest are Neuter: except when, by a Poetical or Rhetorical fiction, things Inanimate and Qualities are exhibited as Persons, and consequently become either Male or Female. And this gives the English an advantage above most other languages in the Poetical and Rhetorical style: for when Nouns naturally Neuter are converted into Masculine and Feminine [5], the Personifi-

[5] “At his command the uprooted hills retired
Each to *his* place: they heard his voice, and went
Obsequious: Heaven *his* wonted face renew’d,
And with fresh fl. wrets Hill and Valley smil’d,”

Milton, P. L. B. vi.

“Was I deceiv’d; or did a fable Cloud
Turn forth *her* silver lining on the Night?”

Milton, Comus:

“Of Law no less can be acknowledged, than that
her seat is the bosom of God; *her* voice, the harmony
of the world. All things in heaven and earth do *her*

cation is more distinctly and forcibly marked.

Some few Substantives are distinguished in their Gender by their termination: as, homage: the very least, as feeling *her* care; and the greatest, as not exempted from *her* power." Hooker, B. i. 16. "Go to your Natural Religion: lay before *her* Mahomet and his disciples, arrayed in armour and in blood:—shew *her* the cities, which he set in flames; the countries, which he ravaged:—when *she* has viewed him in this scene, carry *her* into his retirements; shew *her* the Prophet's chamber, his concubines and his wives:—when *she* is tired with this prospect, then shew *her* the Blessed Jesus." See the whole passage in the conclusion of Bp. Sherlock's 9th Sermon, vol. i.

Of these beautiful passages we may observe, that as, in the English, if you put *it* and *its* instead of *his*, *she*, *her*, you confound and destroy the images, and reduce, what was before highly Poetical and Rhetorical, to mere prose and common discourse; so if you render them into another language, Greek, Latin, French, Italian, or German; in which Hell, Heaven, Cloud, Law, Religion, are constantly Masculine, or Feminine, or Neuter, respectively; you make the images obscure and doubtful, and in proportion diminish their beauty.

This excellent remark is Mr. Harris's, HERMES, p. 58.

prince,

prince, princess; actor, actress; lion, lioness; hero, heroine; &c.

The chief use of Gender in English is in the Pronoun of the Third Person; which must agree in that respect with the Noun for which it stands.

P R O N O U N.

A PRONOUN is a word standing *instead of a Noun*, as its Substitute or Representative.

In the Pronoun are to be considered the Person, Number, Gender, and Case.

There are Three Persons which may be the Subject of any discourse: first, the Person who speaks may speak of himself; secondly, he may speak of the Person to whom he addresses himself; thirdly he may speak of some other Person.

These are called, respectively, the First, Second, and Third, Persons: and are expressed by the Pronouns, *I, Thou, He.*

As

As the Speakers, the Persons spoken to, and the other Persons spoken of, may be many ; so each of these Persons hath the Plural Number ; *We, Ye, They.*

The Persons speaking and spoken to, being at the same time the Subjects of the discourse, are supposed to be present ; from which and other circumstances their Sex is commonly known, and needs not to be marked by a distinction of Gender in their Pronouns : but the third Person or thing spoken of being absent and in many respects unknown, it is necessary, that it should be marked by a distinction of Gender ; at least when some particular Person or Thing is spoken of, which ought to be more distinctly marked : accordingly the Pronoun Singular of the Third Person hath the Three Genders ; *He, She, It.*

Pronouns have Three Cases ; the Nominative : the Genitive, or Possessive ; like Nouns ; and moreover a Case, which follows the Verb Active, or the Preposition, expressing the Object of an Action, or of a Relation.

Relation. It answers to the Oblique Cases in Latin; and may be properly enough called the Objective Case.

P R O N O U N S ;

according to their Persons, Numbers, Cases, and Genders.

P E R S O N S .

1.	2.	3.	I.	2.	3.
Singular.			Plural.		
I, Thou, He;			We, Ye or You, They.		

C A S E S .

Nom.	Poss.	Obj.	Nom.	Poss.	Obj.
First Person.					
I, Mine.		Me;		We, Ours, Us.	
Second Person.					

Thou, Thine, Thee; Ye or You, Yours, You [6].

[6] Some Writers have used *Ye* as the Objective Case Plural of the Pronoun of the Second Person; very improperly, and ungrammatically.

“The more shame for *ye*: holy men I thought *ye*.”

Shakespear, Hen. VIII.

Third

Third Person.

Mas. He, His, Him ;

Fem. She, Hers, Her ;

Neut. It, Its [7], It ;

} They, Theirs, Them.

“ But tyrants dread *ye*, lest your just decree
Transfer the power, and set the people free.”

Prior.

“ His wrath, which one day will destroy *ye* both.”

Milton, P. L. ii. 734.

Milton uses the same manner of expression in a few other places of his *Paradise Lost*, and more frequently in his Poems. It may perhaps be allowed in the Comic and Burlesque style, which often imitates a vulgar and incorrect pronunciation : as, “ By the Lord, I knew *ye*, as well as he that made *ye*.” Shakspeare, 1 Henry IV. But in the serious and solemn style, no authority is sufficient to justify so manifest a solecism.

The Singular and Plural Forms seem to be confounded in the following Sentence : “ Pass *ye* away, *thou* inhabitant of Saphir.” Micah, i. 11.

[7] The Neuter Pronoun of the Third Person had formerly no variation of Cases. Instead of the Possessive *its* they used *his*, which is now appropriated to the Masculine. “ Learning hath *his* infancy, when *it* is but beginning, and almost childish ; then *his* youth, when *it* is luxuriant and juvenile ; then *his* strength of years, when *it* is solid and reduced ; and lastly *his* old age, when *it* waxeth dry and exhaust.” Bacon, Essay 58. In this example *his* is evidently used

D

The

The Personal Pronouns have the nature of Substantives, and, as such, stand by themselves: the rest have the nature of Adjectives, and, as such, are joined to Substantives; and may be called Pronominal Adjectives.

Thy, My, Her, Our, Yours, Their, are Pronominal Adjectives: but *His*, (that is, *He's*,) *Her's*, *Our's*, *Your's*, *Their's*, have evidently the Form of the Possessive Case: and by Analogy, *Mine, Thine* [8], may be esteemed

as the Possessive Case of *it*: but what shall we say to the following, where *her* is applied in the same manner, and seems to make a strange confusion of Gender? “He that pricketh the heart maketh *it* to shew *her* knowledge.” Ecclus, xxii. 19.

“Oft have I seen a timely-parted ghost,
Of ashy semblance, meagre, pale, and bloodless,
Being all descended to the lab’ring heart,
Who, in the conflict that *it* holds with death,
Attracts the same for aidance ’gainst the enemy.”

Shakespear, 2 Hen. VI.

It ought to be,

“*Which*, in the conflict that *it* holds”——

Or, perhaps more poetically,

“*Who*, in the conflict that *he* holds with death.”

[8] So the Saxon *Ich* hath the Possessive Case *Min*;
of

of the same rank. All these are used, when the Noun, to which they belong, is understood : the two latter sometimes also instead of *my*, *thy*, when the Noun following them begins with a vowel.

Beside the foregoing, there are several other Pronominal Adjectives ; which, though they may sometimes seem to stand by themselves, yet have always some Substantive belonging to them, either referred to, or understood : as, *This*, *that*, *other*, *any*, *some*, *one*, *none*. These are called Definitive, because they *define* and limit the extent of the Common Name, or General Term, to which they refer, or are joined. The three first of these are varied, to express Number ; as, *These*, *those*, *Thu*, Possessive *Thine* ; *He*, Possessive *His* : from which our Possessive Cases of the same Pronouns are taken without Alteration. To the Saxon Possessive Cases, *hire*, *ure*, *eower*, *hira*, (that is, *her's*, *our's*, *your's*, *their's*), we have added the *s*, the Characteristic of the Possessive Case of the Nouns. Or *our's*, *your's*, are directly from the Saxon *ures*, *eowers* ; the Possessive Case of the Pronominal Adjectives *ure*, *eower* ; that is, *our*, *your*.

others [9]; the last of which admits of the Plural form only when its Substantive is not joined to it, but referred to, or understood: none of them are varied to express the Gender; only two of them to express the Case; as, *other*, *one*, which have the Possessive Case. *One* is sometimes used in an indefinite sense, (answering to the French *on*,) as in the following phrases; “*one* is apt to think;” “*one* sees;” “*one* supposes.” *Who*, *which*, *that*, are called Relatives, because they more directly refer to some Substantive going before; which therefore is called the Antecedent. They also connect the following part of the Sentence with the foregoing. These belong to all the three Persons; whereas the rest belong only to the Third. One of them only is varied to express the three

[9] “Diodorus, whose design was to refer all occurrences to years,—is of more credit in a point of Chronology, than Plutarch or any *other*, that write Lives by the lump.” Bentley, Dissert. on Themistocles’s Epistles, Sect. vi. It ought to be *others*, or *writes*.

Cases;

Cases; *Who*, *whose* [1], (that is, *who's* [2]), *whom*: none of them have different endings for the Numbers. *Who*, *which*, *what*, are called Interrogatives, when they are used in *asking questions*. The two latter of them have no variation of Number or Case. *Each*, *every* [3], *either*, are called Distri-

[1] *Whose* is by some authors made the Possessive Case of *which*, and applied to things as well as persons.

“The *question*, *whose* solution I require,
Is, what the sex of women most desire.” Dryden.

“Is there any other *doctrine*, *whose* followers are punished?” Addison.

The higher Poetry, which loves to consider every thing as bearing a Personal Character, frequently applies the personal Possessive *whose* to inanimate beings:

“Of man’s first disobedience, and the fruit
Of that forbidden Tree, *whose* mortal taste
Brought death into the world, and all our woe.”

Milton.

[2] So the Saxon *hwa* hath the Possessive Case *hwæs*. Note, that the Saxons rightly placed the Aspirate before the *w*: as we now pronounce it. This will be evident to any one that shall consider in what manner he pronounces the words *what*, *when*; that is, *hoo-æt*, *hoo-èn*.

[3] *Every* was formerly much used as a Pronominal

butive; because they denote the persons, or things, that make up a number, as taken *separately* and singly.

Own, and *self*, in the Plural *selves*, are joined to the Possessives, *my*, *our*, *thy*, *your*, *his* [4], *her*, *their*; as, *my own* hand; *myself*, *yourselves*: both of them expressing emphasis, or opposition; as, “I did it *my own self*,” that is, and no one else: the latter also forming the Reciprocal Pronoun; as, “he hurt *himself*.” *Himself*, *themselves*, seem to be used in the Nominative Case by

Adjective, standing by itself: as, “He proposeth unto God their necessities, and they their own requests, for relief in *every* of them.” Hooker, v. 39. “The corruptions and depravation to which *every* of these was subject.” Swift, *Contests and Dissentions*. We now commonly say, *every one*.

[4] The Possessive *his*, *mine*, *thine*, may be accounted either Pronominal Adjectives, or Genitive Cases of the respective Pronouns. The form is ambiguous; just in the same manner as, in the Latin phrase “*cujus liber*,” the word *cujus* may be either the Genitive Case of *qui*, or the Nominative Masculine of the Adjective, *cujus*, *cuja*, *cujum*. So likewise, *mei*, *tui*, *sui*, *nostri*, *vestri*, have the same form, whether Pronouns, or Pronominal Adjectives.

corruption, instead of *his self*, *their selves* [5]: as, “he came *himself* ;” “they did it *themselves* ;” where *himself*, *themselves*, cannot be in the Objective Case. If this be so, *self* must be, in these instances, not a Pronoun, but a Noun. Thus Dryden uses it :

“What I shew,

Thy *self* may freely on thyself bestow.”

Ourself, the Plural Pronominal Adjective with the Singular Substantive, is peculiar to the Regal Style.

Own is an Adjective ; or perhaps the Participle *own* [6], of the verb *to owe* ; to be the right owner of a thing [7].

All Nouns whatever in Grammatical Construction are of the Third Person ; ex-

[5] *His self* and *their selves* were formerly in use, even in the Objective Case after a Preposition : “Every of us, each for *his self*, laboured how to recover him.” Sidney. “That they would willingly and of *their selves* endeavour to keep a perpetual chastity.” Stat. 2 and 3 Ed. VI. ch. 21.

[6] Chaucer has thus expressed it :

“As friendly, as he were his *owen* brother.”

Cant. Tales, 1654, edit. 1775. And so in many other places ; and, I believe, always in the same manner.

[7] “The Man that *oweth* this girdle.” Acts, xxi. 11.

cept when an address is made to a Person : then the Noun, (answering to what is called the Vocative Case in Latin,) is of the Second Person.

A D J E C T I V E.

AN ADJECTIVE is a word *added to a Substantive* to express its quality [8].

In English the Adjective is not varied on account of Gender, Number or Case [9].

[8] Adjectives are very improperly called *Nouns* ; for they are not the *Names* of things. The Adjectives *good, white*, are applied to the Nouns *man, snow*, to express the Qualities belonging to those Subjects ; but the Names of those Qualities in the Abstract, (that is, considered in themselves, and without being attributed to any subject,) are *goodness, whiteness* ; and these are Nouns, or Substantives.

[9] Some few Pronominal Adjectives must here be excepted, as having the Possessive Case ; as *one, other, another* : “ By *one's* own choice.” Sidney.

“ Teach me to feel *another's* woe.”

Pope, Univ. Prayer.

And the Adjectives, *former*, and *latter*, may be considered as Pronominal, and representing the Nouns, to which they refer ; if the phrase in the following sentence be allowed to be just : “ It was happy for the

The

The only variation, which it admits of, is that of the Degrees of Comparifon.

Qualities for the moft part admit of *more* and *lefs*, or of different degrees: and the words that exprefs fuch Qualities have accordingly proper forms to exprefs different degrees. When a Quality is fimply expreffed without any relation to the fame in a different degree, it is called the Positive; as, *wife, great*. When it is expreffed with augmentation, or with reference to a lefs degree of the fame, it is called the Comparative; as, *wifer, greater*. When it is expreffed as being in the higheft degree of all, it is called the Superlative; as, *wifeft, greateft*.

So that the fimple word, or Positive, becomes Comparative by adding *r* or *er*; and Superlative by adding *ft*, or *eft*, to the end of it. And the Adverbs *more* and *moft* placed before the Adjective have

ftate, that Fabius continued in the command with Minucius: the *former's* phlegm was a check upon the *latter's* vivacity."

the same effect; as, *wise, more wise, most wise* [9].

[9] Double Comparatives and Superlatives are improper:

“The Duke of Milan,
And his *more braver* Daughter could controul thee.”

Shakespear, Tempest.

“After the *most straitest* sect of our religion I have lived a Pharisee.” Acts, xxvi. 5. So likewise Adjectives, that have in themselves a Superlative signification, admit not properly the Superlative form superadded:

“Whosoever of you will be *chiefest*, shall be servant of all.” Mark, x. 44. “One of the first and *chiefest* instances of prudence.” Atterbury, Serm. IV. 10.

“While the *extremest* parts of the earth were meditating a submission.” Ibid. I. 4.

“But first and *chiefest* with thee bring
Him, that yon soars on golden wing,
Guiding the fiery-wheeled throne,
The Cherub Contemplation.”

Milton, Il Penseroso.

“That on the sea’s *extremest* border stood.”

Addison’s Travels.

But poetry is in possession of these two improper Superlatives, and may be indulged in the use of them.

The Double Superlative *most highest* is a Phrase peculiar to the old Vulgar Translation of the Psalms; where it acquires a singular propriety from the Subject to which it is applied, the Supreme Being, who is *higher than the highest*.

Mono-

Monosyllables, for the most part, are compared by *er* and *est*; and Dissyllables, by *more* and *most*: as, *mild, milder, mildest; frugal, more frugal, most frugal*. Dissyllables ending in *y*, as *happy, lovely*; and in *le* after a mute, as *able, ample*; or accented on the last syllable, as *discrete, polite*; easily admit of *er* and *est*. Words of more than two syllables hardly ever admit of those terminations.

In some few words the Superlative is formed by adding the Adverb *most* to the end of them; as, *nethermost, uttermost, or utmost, undermost, uppermost, foremost*.

In English, as in most languages, there are some words of very common use, (in which the caprice of Custom is apt to get the better of Analogy,) that are irregular in this respect: as *good, better, best; bad, worse, worst, little, less* [1], *least; much, or*

[1] “*Lesser*, says Mr. Johnson, is a barbarous corruption of *less*, formed by the vulgar from the habit of terminating Comparisons in *er*.”

“Attend to what a *lesser* Muse indites.” Addison.

many,

many, more, most ; and a few others. And in other languages, the words irregular in this respect are those which express the very same ideas with the foregoing.

V E R B.

A VERB is a *word* which signifies to be, to do, or to suffer.

There are three kinds of Verbs ; Active, Passive, and Neuter Verbs.

A Verb Active expresses an Action, and necessarily implies an Agent, and an Object acted upon : as, *to love* ; “ I love Thomas.”

“ The tongue is like a race-horse ; which runs the faster, the *lesser* weight it carries.” Addison, Spect. N^o 247.

Worser sounds much more barbarous, only because it has not been so frequently used.

“ Changed to a *worser* shape thou canst not be.”
Shakespear, 1 Hen. VI.

“ A dreadful quiet felt, and *worser* far
Than arms, a fullen interval of war.” Dryden.

The Superlative *least* ought rather to be written without the *a*, being contracted from *lessst* ; as Dr. Wallis hath long ago observed. The Conjunction, of the same sound, might be written with the *a*, for distinction.

A Verb

A Verb Passive expresses a Passion, or a Suffering, or the Receiving of an Action; and necessarily implies an Object acted upon, and an Agent by which it is acted upon; as, *to be loved*; “Thomas is loved by me.”

So when the Agent takes the lead in the Sentence, the Verb is Active, and is followed by the Object: when the Object takes the lead, the Verb is Passive, and is followed by the Agent.

A Verb Neuter expresses Being; or a state or condition of being; when the Agent and the Object acted upon coincide, and the event is properly Neither action nor passion, but rather something between both: as, *I am, I sleep, I walk*.

The Verb Active is called also Transitive; because the action *passeth over* to the Object, or hath an effect upon some other thing: and the Verb Neuter is called Intransitive; because the effect is confined within the Agent, and doth *not pass over* to any object [2].

[2] The distinction between Verbs absolutely Neuter, as *to sleep*, and Verbs Active Intransitive, as *to*

In

In English many Verbs are used both in an Active and Neuter signification, the construction only determining of which *kind* they are.

To the signification of the Verb is super-added the designation of Person, by which it corresponds with the several Personal Pronouns; of Number, by which it corresponds with the Number of the Noun, Singular or Plural; of Time, by which it represents the being, action, or passion, as Present, Past, or Future; whether Imperfectly, or Perfectly; that is, whether passing in such time, or then finished; and lastly of Mode, or of the various Manner in which the being, action, or passion, is expressed.

walk, though founded in nature and truth, is of little use in Grammar. Indeed it would rather perplex than assist the learner: for the difference between Verbs Active and Neuter, as Transitive and Intransitive, is easy and obvious: but the difference between Verbs absolutely Neuter and Intransitively Active is not always clear. But however these latter may differ in nature, the Construction of them both is the same: and Grammar is not so much concerned with their real, as their Grammatical, properties.

In

In a Verb therefore are to be considered the Person, the Number, the Time, and the Mode.

The Verb in some parts of it varies its endings, to express, or agree with, different Persons of the same number: as, “*I love, Thou lovest, He loveth, or loves.*”

So also to express different Numbers of the same person: as, “*Thou lovest, Ye love; He loveth, They love* [3].”

So likewise to express different Times, in which any thing is represented as being, acting, or acted upon: as, “*I love, I loved; I bear, I bore, I have borne.*”

[3] In the Plural Number of the Verb, there is no variation of ending to express the different Persons; and the three Persons Plural are the same also with the first Person Singular: moreover in the Present Time of the Subjunctive Mode all Personal Variation is wholly dropped. Yet is this scanty provision of terminations sufficient for all the purposes of discourse, nor does any ambiguity arise from it: the Verb being always attended either with the Noun expressing the Subject acting or acted upon, or the Pronoun representing it. For which reason the Plural Termination in *en*, *they loven*, *they weren*, formerly in use, was laid aside as unnecessary, and hath long been obsolete.

The

The Mode is the *Manner* of representing the Being, Action, or Passion. When it is simply *declared*, or a question is asked, in order to obtain a *declaration* concerning it, it is called the Indicative Mode; as, “I *love*; *lovest* thou?” when it is *bidden*, it is called the Imperative; as, “*love* thou:” when it is *subjoined* as the end or design, or mentioned under a condition, a supposition, or the like, for the most part depending on some other Verb, and having a Conjunction before it, it is called the Subjunctive; as, “If I *love*; if thou *love*:” when it is barely expressed *without any limitation* of person or number, it is called the Infinitive; as, “*to love*,” and when it is expressed in a form in which it may be joined to a Noun as its quality or accident, *partaking* thereby of the nature of an Adjective, it is called the Participle; as, “*loving* [4].”

[4] A Mode is a particular form of the Verb, denoting the *manner* in which a thing is, does, or suffers: or expressing an intention of mind concerning such being, doing, or suffering. As far as Grammar

But

But to express the Time of the Verb the English uses also the assistance of other Verbs,

is concerned, there are no more Modes in any language, than there are Forms of the Verb appropriated to the denoting of such different manners of representation. For instance, the Greeks have a peculiar form of the Verb, by which they express the subject, or matter, of a wish; which properly constitutes an Optative Mode: but the Latins have no such form; the subject of a Wish in their language is subjoined to the Wish itself either expressed or implied, as subsequent to it and depending on it: they have therefore no Optative Mode; but what is expressed in that Mode in Greek falls properly under the Subjunctive Mode in Latin. For the same reason, in English the several expressions of Conditional Will, Possibility, Liberty, Obligation, &c. come all under the Subjunctive Mode. The mere expression of Will, Possibility, Liberty, Obligation, &c. belong to the Indicative Mode: it is their Conditionality, their being subsequent, and depending upon something preceding, that determines them to the Subjunctive Mode. And in this Grammatical Modal Form, however they may differ in other respects Logically, or Metaphysically, they all agree. That Will, Possibility, Liberty, Obligation, &c. though expressed by the same Verbs that are occasionally used as Subjunctive Auxiliaries, may belong to the Indicative Mode, will be apparent from a few examples.

E

called

called therefore Auxiliaries, or Helpers : *do, be, have, shall, will* : as, “ I *do* love, I *did*

“ Here we *may* reign secure.”

“ Or of th’ Eternal co-eternal beam

May I express thee unblam’d?”

“ Firm they *might* have stood,

Yet fell.”

Milton.

“ What we *would* do,

We *should* do, when we *would*.”

Shakespear, Hamlet.

“ Is this the nature,

Which passion *could* not shake? whose solid virtue

The shot of accident, or dart of chance,

Could neither raze, nor pierce?” Id. O’thello.

These sentences are all either declarative, or simply interrogative; and however expressive of Will, Liberty, Possibility, or Obligation, yet the Verbs are all of the Indicative Mode.

It seems, therefore, that whatever other Metaphysical Modes there may be in the theory of Universal Grammar, there are in English no other Grammatical Modes than those above described.

As in Latin the Subjunctive supplies the want of an Optative Mode, so does it likewise in English with the Auxiliary *may* placed before the Nominative Case :

as, “ Long *may* he live!” Sometimes, chiefly when Almighty God is the subject, the Auxiliary is omitted :

as, “ *The LORD* bless thee, and keep thee!” Numb. vi.

24. But the phrase with the Pronoun is obsolete : as,

“ Unto which *he* *vouchsafe* to bring us all!” Liturgy.

love ;

love ; I *am* loved, I *was* loved ; I *have* loved, I *have been* loved ; I *shall*, or *will*, love, or *be* loved."

The two principal Auxiliaries, *to have*, and *to be*, are thus varied, according to Person, Number, Time, and Mode.

Time is Present, Past, or Future.

TO HAVE.

Indicative Mode.

Present Time.

Person.	1. I have,	We	} have.
	2. Thou hast [5],	Ye	
	3. He hath, or has [6];	They	

That the Participle is a mere Mode of the Verb, is manifest, if our Definition of a Verb be admitted : for it signifies being, doing, or suffering, with the designation of Time superadded. But if the essence of the Verb be made to consist in Affirmation, not only the Participle will be excluded from its place in the Verb, but the Infinitive itself also ; which certain ancient Grammarians of great authority held to be alone the genuine Verb, denying that title to all the other Modes. See HERMES, p. 164.

[5] *Thou*, in the Polite, and even the Familiar Style, is disused, and the Plural *You* is employed instead of it : we say, *You have* ; not, *Thou hast*. Though

Past Time.

- | | | |
|----------------|------------------------|------|
| 1. I had, | We }
Ye }
They } | had. |
| 2. Thou hadst, | | |
| 3. He had; | | |

in this case we apply *You* to a single Person, yet the Verb too must agree with it in the Plural Number: it must necessarily be, *You have*; not, *You hast*. *You was*, the Second Person Plural of the Pronoun placed in agreement with the First or Third Person Singular of the Verb, is an enormous solecism: and yet Authors of the first rank have inadvertently fallen into it. “Knowing that *you was* my old master’s good friend.” Addison, Spect. N^o 517. “The account *you was* pleased to send me.” Bentley, Phileleuth. Lips. Part II. See the Letter prefixed, “Would to God *you was* within her reach!” Bolingbroke to Swift, Letter 46. “If *you was* here.” Ditto, Letter 47. “I am just now as well, as when *you was* here.” Pope to Swift, P. S. to Letter 56. On the contrary the Solemn Style admits not of *you* for a single Person. This hath led Mr. Pope into a great impropriety in the beginning of his Messiah:

“O *Thou* my voice inspire,

Who *touch’d* Isaiah’s hallow’d lips with fire.”

The Solemnity of the Style would not admit of *You* for *Thou* in the Pronoun; nor the measure of the Verse *touchedst*, or *didst touch*, in the Verb, as it indispensably ought to be, in the one or the other, of these two forms: *You*, who *touched*; or *Thou*, who *touchedst*, or *didst touch*.

Future

Future Time.

- | | | |
|-----------------------------|---------|---------------|
| 1. I shall, or will | } have; | We } shall, |
| 2. Thou shalt, or wilt [7], | | Ye } or will, |
| 3. He shall, or will, | | They } have. |

“What art *thou*, speak, *that* on designs unknown,
While others sleep, thus *range* the camp alone?”

Pope's Iliad, x. 90.

“Accept these grateful tears; for thee they flow:
For *thee*, *that* ever felt another's woe.” Ib. xix. 319.

“Faultless *thou* dropt from his unerring skill.”

Dr. Arbuthnot, Doddsley's Poems, vol. i.

Again:

“Just of *thy* word, in every thought sincere;
Who *knew* no wish, but what the world might hear.”

Pope, Epitaph.

It ought to be *your* in the first line, or *knewest* in the second.

In order to avoid this Grammatical Inconvenience, the two distinct forms of *Thou* and *You* are often used promiscuously by our modern Poets, in the same Poem, in the same Paragraph, and even in the same Sentence; very inelegantly and improperly:

“Now, now, I seize, I clasp *thy* charms;
And now *you* burit, ah cruel! from my arms.”

Pope.

[6] *Hath* properly belongs to the serious and solemn style; *has* to the familiar. The same may be observed of *doth* and *does*.

Imperative Mode.

- | | |
|-------------------|-----------------|
| 1. Let me have, | Let us have, |
| 2. Have thou, | Have ye, |
| or, Do thou have, | or, Do ye have, |
| 3. Let him have ; | Let them have. |

Subjunctive Mode.

Present Time.

- | | | | |
|---------|----------|------|---------|
| 1. I | } have ; | We | } have. |
| 2. Thou | | Ye | |
| 3. He | | They | |

Infinitive Mode.

Present, To have : Past, To have had.

“ But, confounded with thy art,
Inquires her name, that *has* his heart.” Waller.

“ Th’ unwearied Sun from day to day
Does his Creator’s power display.” Addison.

The nature of the style, as well as the harmony of the verse, seems to require in these places *hath* and *doth*.

[7] The Auxiliary Verb *will* is always thus formed in the second and third Persons singular: but the Verb *to will*, not being an Auxiliary, is formed regularly in those Persons: I *will*, Thou *willest*, He *willeth*, or *wills*. “ Thou, that art the author and bestower of life, canst doubtless restore it also, if thou *will’st*, and when thou *will’st*: but whether thou *will’st* [wilt] please to restore it, or not, that Thou alone knowest.”

Atterbury, Sermon. I. 7.

Participle.

Participle.

Present, Having : Perfect [8], Had :
Past, Having had.

T O B E :

Indicative Mode.

Present Time.

1. I am,	We	} are.
2. Thou art,	Ye	
3. He is ;	They	
	Or,	
1. I be,	We	} be.
2. Thou beeſt,	Ye	
3. He is [9] ;	They	

[8] This participle represents the action as complete and finished ; and, being subjoined to the Auxiliary *to have*, constitutes the Perfect Time : I call it therefore the Perfect Participle. The same, subjoined to the Auxiliary *to be*, constitutes the Passive Verb ; and in that state, or when used without the Auxiliary in a Passive sense, is called the Passive Participle.

[9] “ I think it *be* thine indeed ; for thou liest in it.” Shakespear, Hamlet. *Be*, in the Singular Number of this Time and Mode, especially in the third Person, is obsolete ; and is become somewhat antiquated in the Plural.

72 INTRODUCTION TO

Past Time.

- | | | |
|---------------|------|---------|
| 1. I was, | We | } were. |
| 2. Thou wast, | Ye | |
| 3. He was ; | They | |

Future Time.

- | | | | |
|-------------------------|--------|------|-----------------------------|
| 1. I shall, or will, | } be ; | We | } shall,
or will,
be. |
| 2. Thou shalt, or wilt, | | Ye | |
| 3. He shall, or will, | | They | |

Imperative Mode.

- | | |
|-----------------|---------------|
| 1. Let me be, | Let us be, |
| 2. Be thou, | Be ye, |
| or, Do thou be, | or, Do ye be, |
| 3. Let him be ; | Let them be. |

Subjunctive Mode.

- | | | | |
|---------|--------|------|-------|

| 1. I Were, | We | } were. |
| 2. Thou wert [1], | Ye | |
| 3. He were ; | They | |

[1] " Before the sun,

Before the heav'ns thou wert."

Milton.

" Remember what thou wert."

Dryden.

" I knew thou wert not slow to hear."

Addison.

Infinitive

Infinitive Mode.

Present, To be : Past, To have been.

Participle.

Present, Being : Perfect, Been :

Past, Having been.

The Verb Active is thus varied according to Person, Number, Time, and Mode.

Indicative Mode.

Present Time.

	Sing.	Plur.	
Person.	1. I love,	We	} love.
	2. Thou lovest.	Ye	
	3. He loveth, or loves ;	They	

“ Thou who of old *wert* sent to Israel’s court.”

“ All this thou *wert*.”

“ Thou, Stella, *wert* no longer young,

When first for thee my harp I strung.” Swift.

Shall we in deference to these great authorities allow *wert* to be the same with *wast*, and common to the Indicative and Subjunctive Mode ? or rather abide by the practice of our best antient writers ; the propriety of the language, which requires, as far as may be, distinct forms for different Modes ; and the analogy of formation in each Mode ; I *was*, Thou *wast* ; I *were*, Thou *wert* ? all which conspire to make *wert* peculiar to the Subjunctive Mode.

Past

Past Time.

- | | | |
|------------------|------|----------|
| 1. I loved, | We | } loved. |
| 2. Thou lovedst, | Ye | |
| 3. He loved ; | They | |

Future Time.

|---------------|----------|------|--------------|-------|
| 1. I may | } love ; | We | } may love ; | |
| 2. Thou mayst | | Ye | | } and |
| 3. He may | | They | | |

[2] The other form of the first Person Plural of the Imperative, *love we*, is grown obsolete.

[3] Note, that the Imperfect and Perfect Times are here put together. And it is to be observed, that in

Past

Past Time.

- | | | | | |
|------------------|---------|------|---------------|-----------------|
| 1. I might | } love; | We | } might love; | |
| 2. Thou mightest | | Ye | | and |
| 3. He might | | They | | have loved [3]. |

And,

I could, should, would; Thou could'st, &c. love;
and have loved.

Infinitive Mode.

Present, To love: Past, To have loved.

the Subjunctive Mode, the event being spoken of under a condition, or supposition, or in the form of a wish, and therefore as doubtful and contingent, the Verb itself in the Present, and the Auxiliary both of the Present and Past Imperfect Times, often carry with them somewhat of a Future sense: as, "If he come to-morrow, I may speak to him:—" "if he should, or would come to-morrow, I might, would, could, or should, speak to him." Observe also, that the Auxiliaries *should* and *would* in the Imperfect Times are used to express the Present and Future as well as the Past, as, "It is my desire, that he *should*, or *would*, come now, or to-morrow;" as well as, "It was my desire, that he *should*, or *would*, come yesterday." So that in this Mode the precise Time of the Verb is very much determined by the nature and drift of the Sentence.

Participle.

Participle.

Present, Loving : Perfect, Loved :

Past, Having loved.

But in discourse we have often occasion to speak of Time, not only as Present, Past, and Future, at large and indeterminately ; but also as such with some particular distinction and limitation ; that is, as passing, or finished ; as imperfect, or perfect. This will best be seen in an example of a Verb laid out and distributed according to these distinctions of Time.

Indefinite, or Undetermined,

Time :

Present,

Past,

Future,

I love ;

I loved ;

I shall love.

Definite, or Determined,

Time :

Present Imperfect :

I am (now) loving.

Present Perfect :

I have (now) loved.

Past Imperfect :

I was (then) loving.

Past Perfect :

I had (then) loved.

Future Imperfect :

I shall (then) be loving.

Future Perfect :

I shall (then) have loved.

It is needless here to set down at large the several Variations of the Definite Times, as they consist only in the proper Variations of the Auxiliary, joined to the Present or Perfect Participle; which have been already given.

To express the Present and Past Imperfect of the Active and Neuter Verb, the Auxiliary *do* is sometimes used: I *do* (now) love; I *did* (then) love.

Thus, with very little variation of the principal Verb, the several circumstances of Mode and Time are clearly expressed by the help of the Auxiliaries, *be, have, do, let, may, can, shall, will*.

The peculiar force of the several Auxiliaries is to be observed. *Do* and *did* mark the Action itself, or the Time of it [4],

[4] “Perdition catch my soul
But I *do* love thee!”

“This to me
In dreadful secrecy impart they *did*.” Shakespear.
“Die he certainly *did*.” Sherlock, Vol. I. Dis. 7.
“Yes, I *did* love her;” that is, at that time, or once;
intimating a negation, or doubt, of present love.

with

with greater force and distinction. They are also of frequent and almost necessary use in Interrogative and Negative Sentences. They sometimes also supply the place of another Verb, and make the repetition of it, in the same or a subsequent sentence, unnecessary: as,

“He *loves* not plays,
As thou *dost*, Anthony.”

Shakespear, Jul. Cæs.

Let does not only express permission; but praying, exhorting, commanding. *May* and *might* express the possibility or liberty of doing a thing; *can* and *could*, the power. *Must* is sometimes called in for a helper, and denotes necessity. *Will*, in the first Person singular and plural, promises or threatens; in the second and third Persons, only foretells: *shall*, on the contrary, in the first Person, simply foretells; in the second

“The Lord called Samuel; and he ran unto Eli, and said, Here am I, for thou *calledst* me.—And the Lord called yet again, Samuel. And Samuel arose and went to Eli, and said, Here am I, for thou *didst* call me.” 1 Sam. iii. 4—6.

and third Persons, promises, commands, or threatens [5]. But this must be understood of Explicative Sentences; for when the Sentence is Interrogative, just the reverse for the most part takes place: Thus, “*I shall go; you will go;*” expresses event only; but, “*will you go?*” imports intention; and “*shall I go?*” refers to the will of another. But again “*he shall go,*” and “*shall he go?*” both imply will, expressing or referring to a command. *Would* primarily denotes inclination of will; and *should*, obligation: but they both vary their import, and are often used to express simple event.

Do and *have* make the Present Time; *did, had* [6], the Past; *shall, will*, the Fu-

[5] This distinction was not observed formerly as to the word *shall*, which was used in the Second and Third Persons to express simply the Event. So likewise *should* was used, where we now make use of *would*. See the Vulgar Translation of the Bible.

[6] It has been very rightly observed, that the Verb *had*, in the common phrase, *I had rather*, is not properly used, either as an Active or as an Auxiliary
ture :

ture: *let* is employed in forming the Imperative Mode; *may, might, could, would, should*, in forming the Subjunctive. The Preposition *to*, placed before the Verb, makes the Infinitive Mode [7]. *Have*, Verb; that, being in the Past time, it cannot in this case be properly expressive of time Present; and that it is by no means reducible to any Grammatical construction. In truth, it seems to have arisen from a mere mistake, in resolving the familiar and ambiguous abbreviation, *I'd rather*, into *I had rather*, instead of *I would rather*; which latter is the regular, analogous, and proper expression. See two Grammatical Essays. London, 1768. Essay 1.

[7] Bishop Wilkins gives the following elegant investigation of the Modes, in his *Real Character*, Part III. Chap. 5.

“To shew in what manner the subject is to be joined with his Predicate, the Copula between them is affected with a Particle; which, from the use of it, is called *Modus*, the manner or *Mode*.

Now the Subject and Predicate may be joined together either *Simply*, or with some kind of *Limitation*; and accordingly these Modes are Primary, or Secondary.

The Primary Modes are called by Grammarians Indicative, and Imperative.

When the matter is declared to be so, or at least when it seems in the Speaker's power to have it be so, as the
through

through its several Modes and Times, is placed only before the Perfect Participle; bare Union of Subject and Predicate would import; then the Copula is nakedly expressed without any variation: and this manner of expressing it is called the Indicative Mode.

When it is neither declared to be so, nor seems to be immediately in the Speaker's power to have it so; then he can do no more in words, but make out the expression of his will to him that hath the thing in his power: namely, to

his { Superior, } by { Petition, } And the
 { Equal, } { Persuasion, }
 { Inferior, } { Command, }

manner of these affecting the Copula, (Be it so, or let it be so,) is called the Imperative Mode; of which there are these three varieties, very fit to be distinctly provided for. As for that other use of the Imperative Mode, when it signifies *Permission*: this may be sufficiently expressed by the *Secondary Mode of Liberty*; You *may* do it.

The Secondary Modes are such, as, when the Copula is affected with any of them, make the Sentence to be (as Logicians call it) a *Modal Proposition*.

This happens, when the matter in discourse, namely the being or doing, or suffering of a thing, is considered, not *simply by itself*, but *gradually in its causes*; from which it proceeds either *contingently*, or *necessarily*,

E

and

and *be*, in like manner, before the Present and Passive Participles : the rest only before the Verb, or another Auxiliary, in its Primary form.

Then a thing seems to be left as *Contingent*, when the Speaker expresses only the *Possibility* of it or his own *Liberty* to it.

1. The *Possibility* of a thing depends upon the power of its cause ; and may be expressed,

when $\left\{ \begin{array}{l} \textit{Absolute,} \\ \textit{Conditional,} \end{array} \right\}$ by the Particle $\left\{ \begin{array}{l} \textit{Can;} \\ \textit{Could.} \end{array} \right.$

2. The *Liberty* of a thing depends upon a freedom from all obstacles either within or without, and is usually expressed in our language,

when $\left\{ \begin{array}{l} \textit{Absolute,} \\ \textit{Conditional,} \end{array} \right\}$ by the Particle $\left\{ \begin{array}{l} \textit{May;} \\ \textit{Might.} \end{array} \right.$

Then a thing seems to be of *Necessity*, when the Speaker expresseth the resolution of his own *Will* or some other *Obligation* upon him from without.

3. The *Inclination of the Will* is expressed,

if $\left\{ \begin{array}{l} \textit{Absolute,} \\ \textit{Conditional,} \end{array} \right\}$ by the Particle $\left\{ \begin{array}{l} \textit{Will;} \\ \textit{Would.} \end{array} \right.$

4. The *Necessity* of a thing from some *external Obligation*, whether *Natural* or *Moral*, which we call *Duty*, is expressed,

if $\left\{ \begin{array}{l} \textit{Absolute,} \\ \textit{Conditional,} \end{array} \right\}$ by the Particle $\left\{ \begin{array}{l} \textit{Must, ought, shall;} \\ \textit{Must, ought, should.} \end{array} \right.$

See also HERMES, Book I. Chap. viii.

When

When an Auxiliary is joined to the Verb, the Auxiliary goes through all the variations of Person and Number; and the Verb itself continues invariably the same. When there are two or more Auxiliaries joined to the Verb, the first of them only is varied according to Person and Number. The Auxiliary *must* admits of no variation.

The Passive Verb is only the Participle Passive, (which for the most part is the same with the Indefinite Past Time Active, and always the same with the Perfect Participle,) joined to the Auxiliary Verb *to be*, through all its Variations: as, “*I am loved; I was loved; I have been loved; I shall be loved:*” and so on, through all the Persons, the Numbers, the Times, and the Modes.

The Neuter Verb is varied like the Active; but, having somewhat of the Nature of the Passive, admits in many instances of the Passive form, retaining still the Neuter signification; chiefly in such Verbs, as

signify some sort of motion, or change of place or condition : as, “ *I am come ; I was gone ; I am grown ; I was fallen* [8].” The

[8] I doubt much of the propriety of the following examples : “ The rules of our holy religion, from which we *are* infinitely *swerved*.” Tillotson, Vol. I. Sermon. 27. “ The whole obligation of that law and covenant, which God made with the Jews, *was* also *ceased*.” Ibid. Vol. II. Sermon. 52. “ Whose number *was* now *amounted* to three hundred.” Swift, Contests and Dissensions, Chap. 3. “ This Marechal, upon some discontent, *was entered* into a conspiracy against his master.” Addison, Freeholder, N^o 31. “ At the end of a Campaign, when half the men *are* *deserted* or killed.” Addison, Tatler, N^o 42. Neuter Verbs are sometimes employed very improperly as Actives ; “ Go, *see thee* away into the land of Judah.” Amos, viii. 12. “ I think it by no means a fit and decent thing to *vie Charities*, and erect the reputation of one upon the ruins of another.” Atterbury, Sermon. I. 2. “ So many learned men, that have spent their whole time and pains to *agree* the Sacred with the Profane Chronology.” Sir William Temple, Works, Fol. Vol. I. p. 295.

“ How would *the Gods my* righteous toils *succeed* ?”
Pope, Odyss. xiv. 447.

—“ If *Jove this arm* *succeed*.” Ibid. xxi. 219.

And Active Verbs are as improperly made Neuter, as, “ I must *premise* with three circumstances.” Swift,

Verb

Verb *am, was*, in this case precisely defines the Time of the action or event, but does not change the nature of it; the Passive form still expressing, not properly a Passion, but only a state or condition of Being.

IRREGULAR VERBS.

IN English both the Past Time Active and the Participle Perfect, or Passive, are formed by adding to the Verb *ed*; or *d* only, when the Verb ends in *e*: as, “*turn, turned; love, loved.*” The Verbs that vary from this rule, in either or in both cases, are esteemed Irregular.

The nature of our language, the Accent and Pronunciation of it, inclines us to contract even all our Regular Verbs: thus *loved, turned*, are commonly pronounced in one syllable, *lov'd, turn'd*: and the second Person, which was originally in three sylla-

Q. Anne's Last Ministry, Chap. 2. “Those that think to *ingratiate* with him by calumniating me.”
Bentley, Dissert. on Phalaris, p. 519.

bles, *lovedest*, *turnedest*, is become a dissyllable, *lovedst*, *turnedst* : for as we generally throw the accent as far back as possible towards the first part of the word, (in some even to the fourth syllable from the end,) the stress being laid on the first syllables, the rest are pronounced in a lower tone, more rapidly and indistinctly; and so are often either wholly dropped, or blended into one another.

It sometimes happens also, that the word, which arises from a regular change, does not sound easily or agreeably; sometimes by the rapidity of our pronunciation the vowels are shortened or lost; and the consonants, which are thrown together, do not easily coalesce with one another, and are therefore changed into others of the same organ, or of a kindred species. This occasions a further deviation from the regular form : thus *loveth*, *turneth*, are contracted into *lov'th*, *turn'th*, and these for easier pronunciation immediately become *loves*, *turns*.

Verbs ending in *ch*, *ck*, *p*, *x*, *ll*, *ss*, in the Past Time Active, and the Participle Perfect or Passive, admit the change of *ed* into *t*; as, [9] *snatcht*, *checkt*, *snapt*, *mixt*, dropping also one of the double letters, *dwelt*, *past*; for *snatched*, *checked*, *snapped*, *mixed*, *dwelled*, *passed*: those that end in *l*, *m*, *n*, *p*, after a diphthong, moreover shorten the diphthong, or change it into a single short vowel; as, *dealt*, *dreamt*, *meant*, *felt*, *slept*, &c. all for the same reason; from the quickness of the pronunciation, and because the *d* after a short vowel will not easily coalesce with the preceding consonant. Those that end in *ve* change also *v* into *f*; as, *bereave*, *bereft*; *leave*, *left*; because likewise *v* after a short vowel will not easily coalesce with *t*.

All these, of which I have hitherto given examples, are considered not as Irregular,

[9] Some of these Contractions are harsh and disagreeable: and it were better, if they were avoided and disused: but they prevail in common discourse, and are admitted into Poetry; which latter indeed cannot well do without them.

but as Contracted only : in most of them the Intire as well as the Contracted form is used ; and the Intire form is generally to be preferred to the Contracted.

The formation of Verbs in English, both Regular and Irregular, is derived from the Saxon.

The Irregular Verbs in English are all Monosyllables, unless compounded ; and they are for the most part the same words which are Irregular Verbs in the Saxon.

As all our Regular Verbs are subject to some kind of Contraction ; so the first Class of Irregulars is of those, that become so from the same cause.

I.

Irregulars by Contraction.

Some Verbs ending in *d* or *t* have the Present, the Past Time, and the Participle Perfect and Passive, all alike, without any variation : as. beat, burst [1],

[1] These two have also *beaten* and *bursten* in the Participle ; and in that form they belong to the Third Class of Irregulars.

cast

cast [2], cost, cut, heat * [3], hit, hurt, knit, let, lift *, light * [4], put, quit *, read [5], rent, rid, set, shed, shred, shut, slit, split [6], spread, thrust, wet *.

[2] Shakespear uses the Participle in the Regular Form :

“ And when the mind is quicken’d, out of doubt
The organs, tho’ defunct and dead before,
Break up their drowsie grave, and newly move
With *casted* slough, and fresh celerity.” Hen. V.

[3] “ He commanded, that they should beat the furnace one seven times more than it was wont to be *beat*.” Dan. iii. 19.

The Verbs marked thus *, throughout the three Classes of Irregulars, have the Regular as well as the Irregular Form in use.

[4] This Verb in the Past Time and Participle is pronounced short, *light* or *lit* : but the Regular form is preferable, and prevails most in writing.

[5] This Verb in the Past Time and Participle is pronounced short ; *read*, *red*, *red* ; like *lead*, *led*, *led* ; and perhaps ought to be written in this manner : our antient writers spelt it *redde*.

[6] Shakespear uses the Participle in the Regular Form :

“ That self hand,
Which writ his honour in the acts it did,
Hath, with the courage which the heart did lend it,
Split the heart itself.” Ant. and Cleop.
These

These are Contractions from *beated*, *burst-ed*, *casted*, &c. ; because of the disagreeable sound of the syllable *ed* after *d* or *t* [7].

Others in the Past Time, and Participle Perfect and Passive, vary a little from the Present, by shortening the diphthong, or changing the *d* into *t* ; as, lead, led ; sweat, swet * [8] ; meet, met ; bleed, bled ; breed, bred ; feed, fed ; speed, sped ; bend, bent * ; lend, lent ; rend, rent ; send, sent ;

[7] They follow the Saxon rule : “ Verbs which in the Infinitive end in *dan* or *tan*,” (that is, in English, *d* and *t* ; for *an* is only the Characteristic termination of the Saxon Infinitive ;) “ in the Preterit and Participle Preterit commonly, for the sake of better sound, throw away the final *ed* ; as, *beot*, *afed*, (both in the Preterit and Participle Preterit) for *beoted*, *afeded* ; from *beotan*, *afedan*.” Hickes, Grammat. Saxon. cap. iv. So the same Verbs in English, *beat*, *fed*, instead of *beated*, *feeded*.

[8] “ How the drudging goblin *swet*.”

Milton, Allegro.

Shakespear uses *sweaten*, as the Participle of this Verb :

“ Grease, that’s *sweaten*

From the murtherer’s gibbet throw.” Macbeth.

In this form it belongs to the Third Class of Irregulars.

spend, spent ; build, built * ; geld, gelt ; gild, gilt * ; gird, girt * ; lose, lost.

Others not ending in *d* or *t* are formed by Contraction ; have, *had*, for *haved* ; make, *made*, for *maked* ; flee, *fled*, for *flee ed* ; shoe, *shod*, for *shoe-ed*.

The following, beside the Contraction, change also the Vowel ; sell, sold ; tell, told ; clothe, clad *.

Stand, stood ; and dare, durst, (which in the Participle hath regularly *dared*,) are directly from the Saxon, *standan*, *stod* ; *djrran*, *dorste*.

II.

Irregulars in *ght*.

The Irregulars of the Second Class end in *ght*, both in the Past Time and Participle ; and change the vowel or diphthong into *au* or *ou* : they are taken from the Saxon, in which the termination is *hte*.

		Saxon.	
Bring,	brought :	Bringan,	brohte.
Buy,	bought :	Bycgean,	bohte.
			Catch,

Saxon.

Catch,	caught:		
Fight,	fought [1]:	Feotan,	fuht.
Teach,	taught:	Tæchan,	tæhte.
Think,	thought:	Thencan,	thohte.
Seek,	fought:	Secan,	fohte.
Work,	wrought:	Weorcan,	worhte.

Fraught seems rather to be an Adjective than the Participle of the Verb to *freight*, which has regularly *freighted*. *Raught* from *reach* is obsolete.

III.

Irregulars in *en*.

The Irregulars of the Third Class form the Past Time by changing the vowel or diphthong of the Present; and the Parti-

[1] “As in this glorious and well-*foughten* field
We kept together in our chivalry.”

Shakespear, Hen. V.

“On the *foughien* field

Michael, and his Angels, prevalent,

Encamping, plac'd in guard their watches round.”

Milton, P. L. VI. 410.

This Participle seems not agreeable to the Analogy of derivation, which obtains in this Class of Verbs.

ciple Perfect and Passive, by adding the termination *en*; beside, for the most part, the change of the vowel or diphthong. These also derive their formation in both parts from the Saxon.

Present.		Past.	Participle.
	<i>a</i> changed into <i>e</i> .		
Fall,		fell,	fallen.
	<i>a</i> into	<i>o</i> .	
Awake		awoke *,	[awaked.]
	<i>a</i> into	<i>oo</i> .	
Forfake,		forsook,	forsaken.
Shake,		shook,	shaken [2].
Take,		took,	taken.
	<i>aw</i> into	<i>ew</i> .	
Draw,		drew,	drawn [3].
	<i>ay</i> into	<i>ew</i> .	
Slay		flew,	slayn [3].

[2] "A fly and constant knave, not to be *shak'd*?"

Shakespear, Cymb.

"Wert thou some star, that from the ruin'd roof
Of *shak'd* Olympus by mischance didst fall"

Milton's Poems.

The Regular form of the Participle in these places is improper.

[3] When *en* follows a Vowel or Liquid, the *e* is

e	into	a or o,	o.
Get,		gat, or got,	gotten.
Help,		[helped (4.)]	holpen *.
Melt,		[melted,]	molten *.
Swell,		[fwelled,]	swollen *.

ea	into	a or o.	
Eat,		ate,	eaten.

			o.
Bear,	bare,	or bore.	born.
Break,	brake,	or broke.	broken.
Cleave,	clave,	or clove *,	cloven, or cleft.
Speak,	speak,	or spoke,	spoken.
Swear,	fware,	or swore,	sworn.
Tear,	tare,	or tore,	torn.
Wear,	ware,	or wore,	worn.
Heave,	hove *,		hoven *.
Shear,	shore,		shorn.
Steal,	sto'e,		stolen, or stoln.
Tread,	trode,		trodden.
Weave,	wove,		woven.

ee	into o,	o.
Creep,	crope *,	[creeped, or crept.]

dropped : so *drawn*, *slayn*, (or *slain*,) are instead of *drawen*, *slayen* ; so likewise *known*, *born*, are for *knowen*, *boren*, in the Saxon *cnaewen*, *boren* : and so of the rest.

[4] The antient Irregular form *holpe* is still used in conversation.

Freeze,

Freeze,	froze,	frozen.
Seethe,	fod,	fodden.
<i>ee</i> into	<i>aw</i> .	
See,	faw,	seen.
<i>i</i> long into <i>i</i> short,		<i>i</i> short.
Bite,	bit,	bitten.
Chide,	chid [5].	chidden.
Hide,	hid,	hidden.
Slide,	slid,	slidden.
<i>i</i> long into <i>o</i> ,		<i>i</i> short.
Abide,	abode,	
Cimb,	clomb,	[climbed.]
Drive,	drove,	driven.
Ride,	rode,	ridden.
Rise,	rose [6],	rifen.
Shine,	shone *,	[shined.]
Shrive,	shrove,	shriven.
Smite,	smote,	smitten.
Stride,	strode,	stridden.

[5] "Jacob *chode* with Laban." Gen. xxxi. 36. Num. xx. 3.

[6] *Rise*, with *i* short, hath been improperly used as the Past Time of this Verb: "That form of the first or primigenial earth, which *rise* immediately out of Chaos, was not the same, nor like to that of the present earth." Burnet, Theory of the Earth, B. I. Chap. iv. "If we hold fast to that scripture conclusion, that all mankind *rise* from one head." Ibid. B. II. Chap. vii.

Strive,

96 INTRODUCTION TO

Strive,	strove *	striven.
Thrive,	throve [7],	thriven.
Write [8,]	wrote,	written.
<i>i</i> long into <i>u</i> ,		<i>i</i> short.
Strike,	struck,	stricken, or strucken.
<i>i</i> short into <i>a</i> .		
Bid,	bade,	bidden.
Give,	gave,	given.
Sit [9],	sat,	sitten.

[7] Mr. Pope has used the Regular form of the Past Time of this Verb :

“In the fat age of pleasure, wealth, and ease,
Sprung the rank weed, and *thriv'd* with large in-
crease.” Essay on Crit.

[8] This Verb is also formed like those of *i* long into *i* short, Write, writ, written: and by contraction *writ* in the Participle; but, I think, improperly.

[9] Frequent mistakes are made in the formation of the Participle of this Verb. The analogy plainly requires *sitten*; which was formerly in use: “The army having *sitten* there so long.”—“Which was enough to make him stir, that would not have *sitten* still, though Hannibal had been quiet.” Raleigh. “That no Parliament should be dissolved, till it had *sitten* five months.” Hobbes, Hist. of Civil Wars, p. 257. But it is now almost wholly disused, the form of the Past Time *sat* having taken its place. “The court was *sat*, before Sir Roger came.” Addison, Spect. N° 122. See also Tatler, N° 253, and 265. Spit,

Spit, spat, spitten.

i short into *u*.

Dig, dug *, [digged.]

ie into *ay*.

Lie [i], lay, lien, or lain.

Dr. Middleton hath, with great propriety, restored the true Participle.—“To have *sitten* on the heads of the Apostle: to have *sit'en* upon each of them.” Works, Vol. II. p. 30. “Blessed is the man,—that hath not *sat* in the seat of the scornful.” Psal. i. 1. The old Editions have *fit*; which may be perhaps allowed, as a Contraction of *sitten*. “And when he was *set*, his disciples came unto him,” *καθίσαντος αὐτοῦ*, Matt. v. 1. —“who is *set* on the right hand,” —“and is *set* down at the right hand of the throne of God:” in both places *ἐκαθίσεν*, Heb. viii. 1. & xii. 2. (see also Matt. xxvii. 19. Luke, xxii. 55. John, xiii. 12. Rev. iii. 21.) *Set* can be no part of the Verb *to sit*. If it belong to the Verb *to set*, the Translation in these passages is wrong: for *to set*, signifies *to place*, but without any designation of the posture of the person placed; which is a circumstance of importance expressed by the original.

[1] This Neuter Verb is frequently confounded with the Verb Active *to lay*, [that is to *put* or *place*;] which is Regular, and has in the Past Time and Participle *layed* or *laid*.

“For him, thro’ hostile camps I bent my way;

For him, thus prostrate at thy feet I *lay*:

Large gifts proportion’d to thy wrath I bear.”

Pope, Iliad xxiv. 622.

98 INTRODUCTION TO

<i>o</i> into	<i>e.</i>	
Hold,	held,	ho'den.
<i>o</i> into	<i>i.</i>	
Do,	did,	done, i. e. doen.
<i>oo</i> into	<i>o.</i>	
Choose,	chose,	chosen.
<i>ow</i> into	<i>ew.</i>	
Blow,	blew,	b'own.
Crow,	crew,	[crowed.]
Grow,	grew,	grown.
Know,	knew,	known.
Throw,	threw,	thrown.
<i>y</i> into	<i>ew,</i>	<i>ow.</i>
Fly [2],	flew,	flown [3].

Here *lay* is evidently used for the Present Time, instead of *lie*. “Before they *were laid* down.” Josh. ii. 8. “And he *was laid* down.” 2 Sam. xiii. 8. It ought to be, *had lien*, or *lain* down. See also Ruth, iii 7. 1 Sam. iii. 2, 3. 1 Kings, xix. 6. xxi. 4.

[2] That is, as a bird, *volare*; whereas *to flee* signifies *fugere*, as from an enemy. So in the Saxon and German, *flcogan*, *fliegen*, *volare*; *fleon*, *flichen*, *fugere*. This seems to be the proper distinction between *to fly*, and *to flee*; which in the Present Times are very often confounded. Our Translation of the Bible is not quite free from this mistake. It hath *flee* for *volare*, in perhaps seven or eight places out of a great number; but never *fly* for *fugere*.

The

The following are Irregular only in the Participle; and that without changing the vowel.

Bake,	[baked,]	baken *.
Fold,	[folded,]	folden * [4].
Grave,	[graved,]	graven *.
Hew,	[hewed,]	hewen, or hewn *.
Lade,	[laded,]	laden.
Load,	[loaded,]	loaden *.
Mow,	[mowed,]	mown *.
Owe,	[owed, or ought,]	owen *.
Rive,	[rived,]	riven.
Saw,	[sawed,]	fawn *.
Shape,	[shaped,]	shapen *.
Shave,	[shaved,]	shaven *.

[3] "For rhyme in Greece or Rome was never known,
Till by barbarian deluges *o'erflown*."

Roscommon, Essay.

"Do not the Nile and the Niger make yearly inundations in our days, as they have formerly done? and are not the countries so *overflowed* still situate between the tropicks?" Bentley's Sermons.

"Thus oft by mariners are shown
Earl Godwin's castles *overflowed*." Swift.

Here the Participle of the Irregular Verb *to fly*, is confounded with that of the Regular Verb, *to flow*. It ought to be in all these places *overflowed*.

[4] "While they be *folden* together as thorns." Nahum, i. 10.

100 INTRODUCTION TO

Shew,	[shewed,]	shewn *.
or		
Show,	[showed,]	shown.
Sow,	[sowed,]	sown *.
Straw, -ew, or	-ow, [strawed, &c.]	strown *.
Wash,	[washed,]	washen * [5].
Wax,	[waxed,]	waxen *.
Wreath,	[wreathed,]	wreathen.
Writhe,	[writhed,]	writhen.

Some Verbs, which change *i* short into *a* or *u*, and *i* long into *ou*, have dropped the termination *en* in the Participle.

<i>i</i> short into <i>a</i> or <i>u</i> ,			<i>u</i> .
Begin,	began,		begun.
Cling,	clang,	or clung,	clung.
Drink,	crank,	drunk, or drunken.	
Fling,	flung,		flung.
Ring,	rang,	or rung,	rung.
Shrink,	shrank,	or shrunk,	shrunk.
Sing,	fang,	or sung,	fung.
Sink,	fank,	or funk,	funk.
Sling,	flang,	or flung,	flung.
Slink,	flunk,		flunk.
Spin,	span,	or spun,	spun.
Spring,	sprang,	or sprung,	sprung.

[5] "With *unwashen* hands." Mark, vii. 2. 5.

Sting,

Sting,	stung,		stung.
Stink,	stank,	or stunk,	stunk.
String,	strung,		strung.
Swim,	swam,	or swum,	swum.
Swing,	swung,		swung.
Wring,	wrung,		wrung.

In many of the foregoing, the original and analogical form of the Past Time in *a*, which distinguished it from the Participle, is grown quite obsolete.

<i>i</i> long into <i>ou</i> ,		<i>ou</i> .
Bind,	bound,	bound, or bounden.
Find,	found,	found.
Grind,	ground,	ground.
Wind,	wound,	wound.

That all these had originally the termination *en* in the Participle, is plain from the following considerations. *Drink* and *bind* still retain it; *drunken*, *bounden*; from the Saxon, *druncen*, *bunden*: and the rest are manifestly of the same analogy with these. *Begonnen*, *sonken*, and *foundeden*, are used by Chaucer: and some others of them appear

in their proper shape in the Saxon; *scruncen, spunnen, sprungen, stungen, wunden*. As likewise in the German, which is only another offspring of the Saxon: *begunnen, geklungen, getruncken, gesungen, gesuncken, gespunnen, gesprungen, gestunken, geschwommen, geschwungen*.

The following seem to have lost the *en* of the Participle in the same manner:

Hang [6],	hung *,	hung *.
Shoot,	shot,	shot.
Stick,	stuck,	stuck.
Come,	came,	come.
Run,	ran,	run.
Win,	won,	won.

Hangen, and *scoten*, are the Saxon originals of the two first Participles; the latter of which is likewise still in use in its

[6] This Verb, when Active, may perhaps be most properly used in the Regular form; when Neuter, in the Irregular. But in the Active sense of *furnishing a room with draperies* the Irregular form prevails. The Vulgar Translation of the Bible uses only the Regular form.

first

first form in one phrase : a *shotten* herring. *Stuck* seems to be a contraction from *stucken*, as *struck* is now in use for *strucken*. Chaucer hath *comen* and *wonnen* : *becommen* is even used by Lord Bacon [7]. And most of them still subsist intire in the German ; *gehangen, kommen, gerunnen, gewonnen*.

To this third Class belong the Defective Verbs, Be, been ; and Go, gone ; i. e. goen.

From this Distribution and account of the Irregular Verbs, if it be just, it appears, that originally there was no exception from the Rule, That the Participle Preterit, or Passive, in English, ends in *d, t, or n*. The first form included all the Regular Verbs ; and those, which are become Irregular by Contraction, ending in *t*. To the second properly belonged only those which end in *ght*, from the Saxon Irregulars in *bte*. To the third, those from the Saxon Irregulars in *en* ; which have still, or had originally, the same termination.

[7] Essay xxix.

The same Rule affords a proper foundation for a division of all the English Verbs into Three Conjugations; or Classes of Verbs, distinguished one from another by a peculiar formation, in some principal part of the Verbs belonging to each: of which Conjugations respectively the three different Terminations of the Participle might be the Characteristics. Such of the contracted Verbs, as have their Participles now ending in *t*, might perhaps be best reduced to the first Conjugation to which they naturally and originally belonged; and they seem to be of a very different analogy from those in *ght*. But as the Verbs of the first Conjugation would so greatly exceed in number those of both the others, which together make but about 117 [8]; and as those of the third Conjugation are so various in their

[8] The whole number of Verbs in the English language, Regular and Irregular, Simple and Compounded, taken together, is about 4300. See, in Dr. Ward's Essays on the English Language, the Catalogue of English Verbs. The whole number of Irregular Verbs, the Defective included, is about 177.

form, and incapable of being reduced to one plain rule; it seems better in practice to consider the first in *ed* as the only Regular form, and the others as deviations from it; after the example of the Saxon and German Grammarians.

To the Irregular Verbs are to be added the Defective; which are not only for the most part Irregular, but are also wanting in some of their parts. They are in general words of most frequent and vulgar use; in which Custom is apt to get the better of Analogy. Such are the Auxiliary Verbs; most of which are of this number. They are in use only in some of their Times and Modes; and some of them are a Composition of Times of several Defective Verbs, having the same Signification.

Present.	Past.	Participle.
Am,	was,	been.
Can,	could,	
Go,	went,	gone.
May,	might.	
Must.		

Quoth,

Quoth,	quoth.
Shall,	should.
Weet, wit, or wot ;	wot.
Will,	would.
Wis,	wist.

There are not in English so many as a Hundred Verbs, (being only the chief part, but not all, of the Irregulars of the Third Class,) which have a distinct and different form for the Past Time Active and the Participle Perfect or Passive. The general bent and turn of the language is towards the other form ; which makes the Past Time and the Participle the same. This general inclination and tendency of the language seems to have given occasion to the introducing of a very great Corruption : by which the form of the Past Time is confounded with that of the Participle in these Verbs, few in proportion, which have them quite different from one another. This confusion prevails greatly in common discourse, and is too much authorised by the example of some of our best

best Writers [9]. Thus it is said, *He begun*,
for *he began* ; *he run*, for *he ran* ; *he drunk*,

[9] “ He would *have spoke*.”

Milton, P. L. x. 517.

“ Words *interwove* with fighs found out the way.”

P. L. i. 621.

“ Those kings and potentates who *have strove*.

Eiconoclast. xvii.

“ And to his faithful servant *batb* in place

Bore witness gloriously.” Sam. Ag. ver. 1752.

“ And envious darkness, ere they could return,

Had stole them from me.” Comus, ver. 195.

Here it is observable, that the Author's MS. and the
first Edition have it *stolne*.

“ And in triumph *had rode*.” P. R. iii. 36.

“ I *have chose*

This perfect man.” P. R. i. 165.

“ The fragrant brier *was wove* between.”

Dryden, Fables.

“ I will scarce think you *have swam* in a Gondola.”

Shakespear, As you like it.

“ Then finish what you *have began* ;

But scribble faster if you can.”

Dryden, Poems, Vol. II. p. 172.

“ And now the years a numerous train *have ran* ;

The blooming boy is ripen'd into man.”

Pope's Odyss. xi. 555.

Which I *had* no sooner *drank*, but I found a pimple
rising in my forehead.” Addison, Tatler, N^o 131.

for

for *he drank*: the Participle being used instead of the Past Time. And much more

“*Have sprang.*” Atterbury, Sermon, I. 4. “*bad spake—bad began—*”—Clarendon, Contin. Hist. p. 40. and 120. “The men *begun* to embellish themselves.” Addison, Spect. N^o 434.

“Rapt into future times the bard *begun.*”

Pope, Messiah.

And without the necessity of rhyme:

“A second deluge learning thus *o'er-run*,

And the Monks finish'd what the Goths *begun.*”

Essay on Criticism.

“Repeats you verses *wrote* on glasses.” Prior.

“Mr. Milson *has wrote.*” Addison, Preface to his Travels. “He could only command his voice, which *was broke* with sighs and sobbings, so far as to bid her proceed.” Addison, Spect. N^o 164.

“No civil broils *have* since his death *arose.*”

Dryden, on O. Cromwell.

“Illustrious virtues, who by turns *have rose.*” Prior.

“*Had not arose.*” Swift, Battle of Books: and Bolingbroke, Letter to Wyndham, p. 233.

“The Sun *has rose*, and gone to bed,

Just as if Partridge were not dead.”

Swift.

“This nimble operator will *have stole* it.”

Tale of a Tub, Sect. x.

“Some Philosophers *have mistook.* Ibid. Sect. ix.

“That Diodorus *has not mistook himself* in his account of the date of Phintia, we may be as sure as any history can make us.” Bentley, Dissert. on Phalaris, p. 98.

frequently

frequently the Past Time instead of the Participle : as, *I had wrote, it was wrote*, for *I had written, it was written* ; *I have drank*, for *I have drunk* ; *bore*, for *borne* ; *chose*, for *chosen* ; *bid*, for *bidden* ; *got*, for *gotten* ; &c. This abuse has been long growing upon us, and is continually making further incroachments ; as it may be observed in the example of those Irregular Verbs of the Third Class, which change *i* short into *a* and *u* ; as, *Cling, clang, clung* ; in which the original and analogical form of the Past Time in *a* is almost grown obsolete ; and,

“ Why, all the souls that were, were forfeit once :
And he, that might the ’vantage best *have took*,
Found out the remedy.” Shakespear, *Meas. for Meas.*

“ Silence
Was took ere she was ware.” Milton, *Comus*.

“ Into these common places look,
Which from great authors I *have took*.” Prior, *Alma*.
“ A free Constitution when it has *been shook* by the
iniquity of former administrations.” Bolingbroke,
Patriot King, p. 111.

“ Too strong to *be shook* by his enemies.” Atterbury.

“ Ev’n there he should *have fell*.” Prior, *Solomon*.

“ Sure some disaster *has befell*.” Gay, *Fables*.

the

the *u* prevailing instead of it, the Past Time is now in most of them confounded with the Participle. The Vulgar Translation of the Bible, which is the best standard of our language, is free from this corruption, except in a few instances ; as *bid* is used for *bidden* ; *beld*, for *holden*, frequently ; *bid*, for *bidden* ; *begot*, for *begotten*, once or twice : in which, and a few other like words, it may perhaps be allowed as a Contraction. And in some of these, Custom has established it beyond recovery : in the rest it seems wholly inexcusable. The absurdity of it will be plainly perceived in the example of some of these Verbs, which Custom has not yet so perverted. We should be immediately shocked at *I have knew*, *I have saw*, *I have gave*, &c. but our ears are grown familiar with *I have wrote*, *I have drank*, *I have bore*, &c. which are altogether as ungrammatical.

There are one or two small Irregularities to be noted, to which some Verbs are subject

ject in the formation of the Present Participle. The Present Participle is formed by adding *ing* to the Verb; as, *turn, turning*. Verbs ending in *e* omit the *e* in the Present Participle: as, *love, loving*. Verbs ending with a single consonant preceded by a single Vowel, and, if of more than one Syllable, having the accent on the last Syllable, double the Consonant in the Present Participle, as well as in every Part of the Verb in which a Syllable is added: as, *put, putting, putteth*; *forget, forgetting, forgetteth*; *abet, abetting, abetted* [1].

A D V E R B.

ADVERBS are *added to Verbs*, and to Adjectives, to denote some modifica-

[1] Some Verbs having the Accent on the last Syllable but one, as *worship, counsel*, are represented in the like manner, as doubling the last consonant in the formation of those parts of the Verb, in which a Syllable is added; as *worshipping, counselling*. But this I rather judge to be a fault in the spelling; which neither Analogy nor Pronunciation justifies.

tion or circumstance of an action, or quality: as, the manner, order, time, place, distance, motion, relation, quantity, quality, comparison, doubt, affirmation, negation, demonstration, interrogation.

In English they admit of no Variation; except some few of them, which have the degrees of Comparison: as, [2] “often,

[2] The formation of Adverbs in general with the Comparative and Superlative Termination seems to be improper; at least it is now become almost obsolete: as, “Touching things which generally are received,—we are *hardliest* able to bring such proof of their certainty, as may satisfy gainfayers.” Hooker, B. v. 2. “Was the *easilier* persuaded.” Raleigh. “That he may the *stronglier* provide.” Hobbes, Life of Thucyd. “The things *highliest* important to the growing age.” Shaftsbury, Letter to Moleworth. “The question would not be, who loved himself, and who not; but, who loved and served himself the *rightest*, and after the truest manner.” Id. Wit and Humour. It ought rather to be, *most hardly, more easily, more strongly, most highly, most right, or rightly*. But these Comparative Adverbs, however improper in prose, are sometimes allowable in Poetry.

“Scepter and pow’r, thy giving, I assume;
And *gladlier* shall resign.” Milton, P. L. vi. 731.
oftener,

oftener, ofteneft :” “soon, sooner, soonest ;” and those Irregulars, derived from Adjectives [3] in this respect likewise irregular ; “well, better, best ;” &c.

An Adverb is sometimes joined to another Adverb, to modify or qualify its meaning ; as, “very much ; much too little ; not very prudently.”

PREPOSITION.

PREPOSITIONS, so called because they are commonly *put before* the words to which they are applied, serve to connect words with one another, and to shew the relation between them.

One great use of Prepositions in English is to express those relations, which in some languages are chiefly marked by Cases, or the different endings of the Noun.

Most Prepositions originally denote the relation of Place, and have been thence transferred to denote by similitude other

[3] See above, p. 59.

relations. Thus, *out, in, through, under, by, to, from, of, &c.* *Of* is much the same with *from*; “ask *of* me,” that is, *from* me:” “made *of* wood;” “Son *of* Philip;” that is, sprung *from* him. *For*, in its primary sense, is *pro, loco alterius*, in the *stead, or place*, of another. The notion of Place is very obvious in all the rest [4].

[4] The Particle *a* before Participles, in the phrases *a coming, a going, a walking, a shooting, &c.*; and before Nouns, as *a-bed, a-board, a shore, a-foot, &c.*; seems to be a true and genuine Preposition, a little disguised by familiar use and quick pronunciation. Dr. Wallis supposes it to be the Preposition *at*. I rather think it is the Preposition *on*; the sense of which answers better to the intention of those expressions. *At* has relation chiefly to *place*: *on* has a more general relation, and may be applied to *action*, and many other things, as well as *place*. “I was *on* coming, *on* going,” &c.; that is, employed *upon* that particular *action*: so likewise those other phrases above-mentioned, *a-bed, &c.* exactly answer to *on bed, on board, on shore, on foot*. Dr. Bentley plainly supposed *a* to be the same with *on*; as appears from the following passage: “He would have a learned University make Barbarisms *a* purpose.” Dissert. on Phalaris, p. 223. “The depths *on* trembling fell.”

Prepositions

Prepositions are also prefixed to words in such a manner, as to coalesce with them, and to become a part of them. Prepositions, standing by themselves in Construction, are put before Nouns and Pronouns; and sometimes after Verbs; but in this sort of Composition they are chiefly prefixed to Verbs: as, *to outgo*, *to overcome*, *to undervalue*. There are also certain

J. Hopkins, Ps. lxxvii. 16. That is, as we now say in common discourse, “they fell *a* trembling.” And the Preposition *on* has manifestly deviated into *a* in other instances: thus the Saxon compounded Prepositions *ongean*, *onmang*, *onbutan*, are become in English, by the rapidity of pronunciation, *against*, *among*, *about*; and what is in the Saxon Gospel, “Ic wylle gan *on* fixoth,” is in the English Translation: “I go *a* fishing.” John xxi. 3. Much in the same manner, John *of* Nokes, and John *of* Stiles, by very frequent and familiar use, become John *a* Nokes, and John *a* Stiles: and one *of the* clock, or rather *on the* clock, is written, one o’clock, but pronounced, one *a* clock. The phrases with *a* before Participles are out of use in the solemn stile; but still prevail in familiar discourse. They are established by long usage, and good authority: and there seems to be no reason, why they should be utterly rejected.

16 INTRODUCTION TO

Particles, which are thus employed in Composition of words, yet cannot stand by themselves in Construction: as, *a, be, con, mis, &c.*; in *abide, bedeck, conjoin, mistake, &c.*; these are called Inseparable Prepositions.

CONJUNCTION.

THE CONJUNCTION connects or *joins together* Sentences; so as, out of two, to make one Sentence.

Thus, “You, *and* I, *and* Peter, rode to London,” is one Sentence, made up of these three by the Conjunction *and* twice employed; “You rode to London; I rode to London; Peter rode to London.” Again, “You *and* I rode to London, *but* Peter staid at home,” is one Sentence made up of three by the Conjunctions *and* and *but*: both of which equally connect the Sentences, but the latter expresses an Opposition in the Sense. The first is therefore called a
Con-

Conjunction Copulative; the other a Conjunction Disjunctive.

The use of Copulative Conjunctions is to connect, or to continue, the Sentence, by expressing an addition, *and*; a supposition, or condition, *if, as*; a cause, *because* [5], *then*; a motive, *that*; an inference, *therefore*; &c.

The use of Disjunctives is to connect and to continue the Sentence; but withal to express Opposition of meaning in different degrees; *as, or, but, than, although, unless*, &c.

INTERJECTION.

INTERJECTIONS, so called, because they are *thrown in between* the parts of a sentence without making any other

[5] The Conjunction *because*, used to express the motive, or end, is either improper or obsolete: as, "The multitude rebuked them, *because* they should hold their peace." Matt. xx. 31. "It is the case of some to contrive false periods of business, *because* they may seem men of dispatch." Bacon, Essay xxv. We should now make use of *that*.

alteration in it, are a kind of Natural Sounds to express the affection of the Speaker.

The different Passions have, for the most part, different Interjections to express them.

The Interjection O, placed before a Substantive, expresses more strongly an address made to that person or thing; as it marks in Latin what is called the Vocative Case.

SENTENCES.

A SENTENCE is an assemblage of words, expressed in proper form, and ranged in proper order, and concurring to make a complete sense.

The Construction of Sentences depends principally upon the Concord or Agreement, and the Regimen or Government, of Words.

One word is said to agree with another, when it is required to be in like case, number, gender, or person.

One

One word is said to govern another, when it causeth the other to be in some Case, or Mode.

Sentences are either Simple, or Compounded.

A Simple Sentence hath in it but one Subject, and one Finite Verb; that is, a Verb in the Indicative, Imperative, or Subjunctive Mode.

A Phrase is two or more words rightly put together, in order to make a part of a Sentence; and sometimes making a whole Sentence.

The most common PHRASES, used in simple Sentences, are the following.

1st Phrase: The Substantive before a Verb Active, Passive, or Neuter; when it is said, what thing *is*, *does*, or *is done*: as, "I am;" "Thou writest;" "Thomas is loved;" where *I*, *Thou*, *Thomas*, are the Nominative [6] Cases; and answer to the

[6] "He, *whom* ye pretend reigns in heaven, is so far from protecting the miserable sons of men, that he

question, *who*, or *what*? as, “Who is loved?
Thomas.” And the Verb agrees with the
Nominative Case in Number and Person [7];

perpetually delights to blast the sweetest flowrets in the
Garden of Hope.” Adventurer, N^o 76. It ought to
be *who*, the Nominative Case to *reigns*; not *whom*, as
if it were the Objective Case governed by *pretend*.
“If you were here, you would find three or four
in the parlour after dinner, *whom* you would say
passed their time agreeably.” Locke, Letter to
Molyneux.

“Scotland and *Thee* did each in other live.”

Dryden’s Poems, Vol. II. p. 220.

“We are alone; here’s none but *Thee* and I.”

Shakespear, 2 Henry VI.

It ought in both places to be *Thou*: the Nominative
Case to the Verb expressed or understood.

[7] “But *Thou*, false Arcite, never *shall* obtain

Thy bad pretence.” Dryden, Fables.

It ought to be *shalt*. The mistake seems to arise
from the confounding of *Thou* and *You*, as equivalent
in every respect; whereas one is Singular, the other
Plural. See above, p. 67.

“And wheresoe’er *thou* casts thy view.”

Cowley, on the Death of Hervey.

“There’s [there *are*] *two* or *three* of us have seen
strange fights.” Shakespear, Jul. Cæs.

as, *thou* being the Second Person Singular, the Verb *writest* is so too.

2d Phrase: The Substantive after a Verb Neuter or Passive; when it is said, that such a thing *is*, or *is made*, or *thought*, or *called*, such *another thing*; or, when the Substantive after the Verb is spoken of the same thing or person with the Substantive before.

“Great *pains has* [have] been taken.”

Pope, P. S. to the *Odyssey*.

“I have considered, *what have* [hath] been said on both sides in this controversy.” Tillotson, Vol. I. Sermon. 27.

“One would think, there *was* more *Sophists* than one had a finger in this Volume of Letters. Bentley; Differt. on Socrates's Epistles, Sect. IX.

“The *number* of the names together *were* about an hundred and twenty.” Acts, i. 15. See also Job, xiv. 5.

“And Rebekah took goodly *raiment* of her eldest son Esau, which *were* with her in the house, and put *them* upon Jacob her youngest son.” Gen. xxvii. 15.

“If the blood of bulls and of goats, and the ashes of an heifer, sprinkling the unclean, *sanctifieth* to the purifying of the flesh.” Heb. ix. 13. See also Exod. ix. 8, 9, 10.

the

the Verb : as, “A calf becomes an ox;” “Plautus is accounted a Poet;” “I am He.” Here the latter Substantive is in the Nominative Case, as well as the former; and the Verb is said to govern the Nominative Case: or, the latter Substantive may be said to agree in Case with the former.

3d Phrase: The Adjective after a Verb Neuter or Passive, in like manner: as, “Life is *short*, and Art is *long*.” “Exercise is *esteemed wholesome*.”

4th Phrase: The Substantive after a Verb Active, or Transitive: as when one thing is said to *act* upon, or *do* something to, another: as, “to open a door;” “to build a house:” “Alexander conquered the Persians.” Here the thing acted upon is in the Objective Case [8]: as it appears

[8] “For *who* love I so much?”

Shakespear, Merch. of Venice.

“*Whoe’er* I woo, myself would be his wife.”

Id. Twelfth Night.

“*Whoever* the King favours,

The Cardinal will find employment for,

And far enough from court.”

Id. Hen. VIII.

plainly

plainly when it is expressed by the Pronoun, which has a proper termination for that Case; “Alexander conquered *them* ;” and the Verb is said to govern the Objective Case.

5th Phrase: A Verb following another Verb; as, “Boys love to play:” where the latter Verb is in the Infinitive Mode.

6th Phrase: When one thing is said to belong to another: as, “Milton’s Poems:” where the thing to which the other belongs is placed first, and is in the Possessive Case; or else last, with the Preposition *of* before it: as, “the poems of Milton.”

“Tell who *loves who* ; what favours some partake,
And who is jilted for another’s sake.”

Dryden, Juvenal, Sat. vi.

“Those, *who* he *thought* true to his party.” Clarendon, Hist. Vol. I. p. 667, 8vo. “*Who* should I meet the other night, but my old friend?” Spect. N° 32. “*Who* should I see in the lid of it, but the Doctor?” Addison, Spect. N° 57. “Laying the suspicion upon somebody, I know not *who*, in the country.” Swift, Apology prefixed to Tale of a Tub. In all these places it ought to be *whom*.

7th Phrase: When another Substantive is added to express and explain the former more fully; as, "Paul the Apostle;" "King George:" where they are both in the same case; and the latter is said to be put in Apposition to the former.

8th Phrase: When the quality of the Substantive is expressed by adding an Adjective to it: as, "a wise man;" "a black horse." Participles have the nature of Adjectives; as, "a learned man;" "a loving father."

9th Phrase: An Adjective with a Verb in the Infinitive Mode following it: as, "worthy to die;" "fit to be trusted."

10th Phrase: When a circumstance is added to a Verb, or an Adjective, by an Adverb: as, "You read well;" "he is very prudent."

11th Phrase: When a circumstance is added to a Verb, or an Adjective, by a Substantive with a Preposition before it: as, "I write for you;" "he reads with care;" "studious of praise;" "ready for mischief."

12th Phrase: When the same Quality in different Subjects is compared: the Adjective in the Positive having after it the Conjunction *as*, in the Comparative the Conjunction *than*, and in the Superlative the Preposition *of*: as, “white as snow;” “wiser than I;” “greatest of all.”

The PRINCIPAL PARTS of a Simple Sentence are the Agent, the Attribute, and the Object. The Agent is the thing chiefly spoken of; the Attribute is the thing or action affirmed or denied of it: and the Object is the thing affected by such action. In English the Nominative Case, denoting the Agent, usually goes before the Verb, or Attribution; and the Objective Case, denoting the Object, follows the Verb Active; and it is the order, that determines the Case in Nouns: as, “Alexander conquered the Persians.” But the Pronoun, having a proper form for each of those cases, sometimes, when it is in the Objective Case, is placed before the Verb; and, when it is

5

the

the Nominative Case, follows the Object and Verb: as, “Whom ye ignorantly worship, *him declare I* unto you.” And the Nominative Case is sometimes placed after a Verb Neuter: as, “Upon thy right hand *did stand the Queen*.” “On a sudden *appeared the King*.” And always, when the Verb is accompanied with the Adverb *there*: as, “*there was a man*.” The reason of it is plain: the Neuter Verb not admitting of an Objective Case after it, no ambiguity of Case can arise from such a position of the Noun: and where no inconvenience attends it, variety itself is pleasing [9].

[9] It must then be meant of his sins who *makes*, not of his who *becomes, the convert*. Atterbury, Sermons, I. 2.

“In him who *is*, and him who *finds, a friend*.”

Pope, Essay on Man.

“Eye *hath* not *seen*, nor ear *heard*, neither *have entered* into the heart of man, *the things*, which God hath prepared for them that love him.” 1 Cor. ii. 9.

There seems to be an impropriety in these sentences, in which the same Noun serves in a double capacity, performing at the same time the offices both of the Nominative and Objective Case.

Who,

Who, which, what, and the Relative *that*, though in the Objective Case, are always placed before the Verb ; as are also their Compounds, *whoever, whosoever, &c.* : as, “He *whom* you seek.” “This is *what*, or the thing *which*, or *that*, you want.” “*Whomsoever* you please to appoint.”

When the Verb is a Passive, the Agent and Object change places in the Sentence ; and the thing acted upon is in the Nominative Case, and the Agent is accompanied with a Preposition : as, “The Persians were conquered by Alexander.”

The Action expressed by a Neuter Verb being confined within the Agent, such Verb cannot admit of an Objective Case after it, denoting a person or thing as the Object of action. Whenever a Noun is immediately annexed to a preceding Neuter Verb, it either expresses the same notion with the Verb ; as, “*to dream a dream ;*” “*to live a virtuous life ;*” or denotes only the circumstance

stance of the action, a Preposition being understood; as, "*to sleep all night*," that is, *through all the night*; "*to walk a mile*;" that is, *through the space of a mile*."

For the same reason, a Neuter Verb cannot become a Passive. In a Neuter Verb the Agent and Object are the same, and cannot be separated even in imagination; as in the examples, *to sleep*, *to walk*: but when the Verb is Passive, one thing is acted upon by another really, or by supposition, different from it [1].

[1] That some Neuter Verbs take a Passive Form, but without a Passive Signification, has been observed above; see p. 83. Here I speak of their becoming both in Form and Signification Passive: and shall endeavour further to illustrate the rule by example. *To split*, like many other English Verbs, hath both an Active and a Neuter signification: according to the former we say, "the force of gun-powder *split the rock*;" according to the latter, "the ship *split upon the rock*;" and converting the Verb Active into a Passive, we may say, "*the rock was split* by the force of gun-powder;" or "*the ship was split upon the rock*." But we cannot say with any propriety, turning the Verb Neuter into a Passive by inversion of the

A Noun

A Noun of Multitude [2], or signifying many, may have the Verb and Pronoun

sentence, “*the rock was split upon* by the ship:” as in the passage following: “What success these labours of mine have had, He knows best, for whose glory they were designed. It will be one sure and comfortable sign to me, that they have had some; if it shall appear, that the words I have spoken to you to-day are not in vain: if they shall prevail with you in any measure to avoid those *rocks*, which *are* usually *split upon* in Elections, where multitudes of different inclinations, capacities, and judgements, are interested.” Atterbury, Sermons, IV. 12.

[2] “And restores to his *Island* that tranquillity and repose, to which *they* had been *strangers* during his absence.” Pope, Dissertation prefixed to the *Odyssey*. *Island* is not a noun of Multitude: it ought to be, his *people*; or, *it* had been a *stranger*. “What reason *have the Church* of Rome to talk of modesty in this case?” Tillotson, Serm. I. 49. “There is indeed no *Constitution* so tame and careless of *their* own defence, where any person dares to give the least sign or intimation of being a traitor in his heart.” Addison, Freeholder, N^o 52. “All the virtues of *mankind* are to be counted upon a few fingers, but *his* follies and vices are innumerable.” Swift, Preface to Tale of a Tub. Is not *mankind* in this place a Noun of Multitude, and such as requires the Pronoun referring to it to be in the Plural Number, *their*?

agreeing with it either in the Singular or Plural Number; yet not without regard to the import of the word, as conveying unity or plurality of idea: as, “*My people is foolish; they have not known me.*” Jer. iv. 22. “*The assembly of the wicked have inclosed me.*” Psal. xxii. 16. perhaps more properly than, “*bath inclosed me.*” “*The assembly was very numerous:*” much more properly than, “*were very numerous.*”

Two or more Nouns in the Singular Number, joined together by one or more Copulative Conjunctions [3], have Verbs, Nouns, and Pronouns, agreeing with them in the Plural Number: as, “*Socrates and Plato were wise; they were the most eminent*

[3] The Conjunction Disjunctive hath a contrary effect; and, as the Verb, Noun, or Pronoun, is referred to the preceding terms taken separately, it must be in the Singular Number. The following Sentences are faulty in this respect: “*A man may see a metaphor, or an allegory, in a picture, as well as read them [it] in a description.*” Addison, Dial. I. on Medals. “*It must indeed be confessed, that a lampoon, or a satyr, do not carry in them robbery or murder.*” Id. Spect. N^o 23.

Philo-

Philosophers of Greece.” But sometimes, after an enumeration of particulars thus connected, the Verb follows in the Singular Number ; and is understood as applied to each of the preceding terms : as,—“ The glorious Inhabitants of those sacred palaces, where nothing but light and blessed immortality, no shadow of matter for tears, discontentments, griefs, and uncomfortable passions to work upon ; but all *joy, tranquillity, and peace*, even for ever and ever *doth dwell.*” Hooker, B. i. 4. “ *Sand, and salt, and a mass* of iron, *is* easier to bear, than a man without understanding.” Ecclus. xxii. 15 [4].

If the Singulars so joined together are of several Persons, in making the Plural

[4] “ And so *was* also *James and John* the sons of Zebedee, which *were* partners with Simon.” Luke, v. 10. Here the two Nouns are not only joined together by the Conjunction Copulative, but are moreover closely connected in sense by the part of the sentence immediately following, in which the correspondent Nouns and Verbs are Plural : the Verb therefore preceding in the Singular Number is highly improper.

Pronoun agree with them in Person, the second Person takes place of the third, and the first of both : “ *He and You and I* won it at the hazard of *our* lives : *You and He* shared it between *you*.”

The Neuter Pronoun *it* is sometimes employed to express, 1. the subject of any discourse or inquiry : 2. the state or condition of any thing or person : 3. the thing, whatever it be, that is the cause of any effect or event ; or any person or persons considered merely as a Cause. Examples :

1. “ ’Twas at the royal feast for Persia won
By Philip’s godlike son.” Dryden.

“ *It* happen’d on a summer’s holiday,
That to the Greenwood shade he took his
way.” Ibid.

“ Who is *it* in the press that calls on me ?”
Shakespear, Ju’. Cæs.

2. “ H. How is *it* with you, Lady ?
Q. Alas ! how is *it* with you ?”
Shakespear, Hamlet.

3. “ You heard her say herself, *it* was not I.—
’Twas I that kill’d her.” Shakespear, Othello,
“ ’Tis *these*, that early taint the female soul.”

Pope.
It

“*It* rains ; *it* shines ; *it* thunders.” From which last examples it plainly appears, that there is no such thing in English, nor indeed in any language, as a sort of Verbs, which are really Impersonal. The Agent or Person in English is expressed by the Neuter Pronoun ; in some other languages it is omitted, but understood [5].

The Neuter Pronoun *it* is sometimes omitted, and understood : thus we say, “ as appears ; as follows ;” for, “ as *it* appears ; as *it* follows :” and, “ may be,” for, “ *it* may be.”

The Verb *to be* has always a Nominative Case after it ; as, “ *It was I*, and not *He*, that did it :” unless it be in the Infinitive Mode ; “ though you thought it *to be Him* [6].”

[5] An Example of impropriety, in the use of the Neuter Pronoun, see below, p. 150. note 2.

[6] “ *Whom* do men say, that *I am*?—But *whom* say ye, that *I am*?” Matt. xvi. 13. 15. So likewise Mark, viii. 27. 29. Luke, ix. 18, 20. “ *Whom* think ye, that *I am*?” Acts, xiii. 25. It ought in all these places to be *who* ; which is not governed by the Verb *say* or *think*, but by the Verb *am* : or agrees in Case

The Adverbs, *when, while, after, &c.* being left out, the Phrase is formed with the Participle, independent on the rest of the Sentence: as, “The doors being shut, Jesus stood in the midst.” This is called the Case Absolute. And the Case is in English always the Nominative: as,

“God from the Mount of Sinai, whose gray top
Shall tremble, *He descending* [7], will himself,

with the Pronoun *I*. If the Verb were in the Infinitive Mode, it would require the Objective Case of the Relative, agreeing with the Pronoun *me*: “*Whom* think ye, or do you think, *me to be?*”

“To that, *which once was thee.*” Prior.

It ought to be, *which was thou*; or, *which thou wast*.

“It is not *me* you are in love with.” Spect. N^o 290.

The Preposition *with* should govern the Relative *whom* understood, not the Antecedent *me*; which ought to be *I*. “It is not *I*, or, *I am not the person*, with *whom* you are in love.”

“Art thou proud yet?”

Ay, that *I am not thee.*” Shakespear, Timon.

“Time was, when none would cry, that oaf *was me*:
But now you strive about your Pedigree.”

Dryden, Prologue.

“Impossible! *it can't be me.*” Swift.

[7] On which place says Dr. Bentley, “The Con-
In

In thunder, lightning, and loud trumpet's sound,
Ordain them laws." Milton, P. L. xii. 227.

text demands that it be,—*Him* descending, *Illo* descendente." But *him* is not the Ablative Case, for the English knows no such Case; nor does *him* without a Preposition on any occasion answer to the Latin Ablative *illo*. I might with better reason contend, that it ought to be "*his* descending," because it is in Greek *αὐτῷ καταβαινόντι*, in the Genitive; and it would be as good Grammar, and as proper English. This comes of forcing the English under the rules of a foreign Language, with which it has little concern: and this ugly and deformed fault, to use his own expression, Bentley has endeavoured to impose upon Milton in several places: see P. L. vii. 15. ix. 829. 883. 1147. x. 267. 1001. On the other hand, where Milton has been really guilty of this fault, he, very inconsistently with himself, corrects him, and sets him right. His Latin Grammar Rules were happily out of his head, and, by a kind of vernacular instinct, (so, I imagine, he would call it,) he perceived that his Author was wrong.

"For only in destroying I find ease
To my relentless thoughts; and, *him* destroy'd,
Or won to what may work his utter loss,
For whom all this was made, all this will soon
Follow, as to him link'd in weal or woe."

P. L. ix. 129.

It ought to be, "*he* destroyed," that is, *he* being destroy'd." Bentley corrects it, "and *man* destroy'd."

To before a Verb is the sign of the Infinitive Mode; but there are some Verbs, which have commonly other Verbs following them in the Infinitive Mode without the sign *to*: as, *bid, dare, need, make, see, hear, feel*; as also *let*, and sometimes *have*, not used as Auxiliaries; and perhaps a few others; as, “I *bade* him do it; you *dare* not do it; I *saw* him [8] do it; I *heard* him say it [9].”

Archbishop Tillotson has fallen into the same mistake: “Solomon was of this mind; and I make no doubt, but he made as wise and true Proverbs as any body has done since: *Him only excepted*, who was a much greater and wiser man than Solomon.” Serm. I. 53.

[8] “To *see* so many *to make* so little conscience of so great a sin.” Tillotson, Serm. I. 22. “It cannot but be a delightful spectacle to God and Angels to *see* a young person, besieged by powerful temptations on either side, *to acquit* himself gloriously, and resolutely *to hold out* against the most violent assaults: to *behold* one in the prime and flower of his age, that is courted by pleasures and honours, by the devil and all the bewitching vanities of the world, *to reject* all these, and *to cleave* stedfastly unto God.” Ib. Serm. 54.

The

The Infinitive Mode is often made Absolute, or used independently of the rest of the Sentence ; supplying the Place of the Conjunction *that* with the Subjunctive Mode : as, “ *to confess* the truth, I was in fault ;” “ *to begin* with the first ;” “ *to proceed* ;” “ *to conclude* : ” that is, “ *that I may confess ; &c.*”

The impropriety of the Phrases distinguished by Italic Characters is evident. See Matt. xv. 31.

[9] “What, know you not,

That, being mechanical, you *ought* not *walk*,

Upon a labouring day, without the sign

Of your profession ?” Shakespear, Jul. Cæs.

Both Grammar and Custom require, “ *ought* not *to walk*.” *Ought* is not one of the Auxiliary Verbs, though often reckoned among them : that it cannot be such, is plain from this consideration ; that, if we consult custom and our ear, it does not admit of another Verb immediately following it, without the Preposition *to*.

“ *To wish* him *wrestle* with affection.”

Shakespear, Much Ado.

“Nor with less dread the loud

Ethereal trumpet from on high *gan blow*.”

Milton, P. L. vi. 60.

These phrases are poetical, and by no means allowable in prose.

The

The Infinitive Mode has much of the nature of a Substantive: expressing the Action itself, which the Verb signifies; as the Participle has the nature of an Adjective. Thus the Infinitive Mode does the office of a Substantive in different Cases; in the Nominative; as, “*to play* is pleasant:” in the Objective; as, “boys *love to play*.” In Greek it admits of the Article through all its cases, with the Preposition in the Oblique cases: in English the Article is not wanted, but the Preposition may be used: “For *to will* is present with me: but *to perform* that which is good I find not [1].” “All their works they do *for to be seen* of men [2].” But the use of the Pre-

[1] Το γὰρ θελεῖν παρὰ κείμαι μοι, το δε κατεργαζεσθαι το καλον εχ εὔρισκω. Rom. vii. 18.

[2] Προς το θεαθηναι τοις ανθρωποις. Matt. xxiii. 5. The following sentences seem defective either in the construction, or the order of the words: “Why do ye that, *which is not lawful to do* on the sabbath days? — The shew bread, *which is not lawful to eat*, but for the priests alone.” Luke vi. 2. 4. The Construction may be rectified by supplying *it*; “which position,

position, in this and the like phrases, is now become obsolete.

“For not *to have been dipp’d* in Lethe’s lake
Could save the Son of Thetis *from to die*.”

Spenser.

Perhaps therefore the Infinitive, and the Participle, might be more properly called the Substantive Mode, and the Adjective Mode [3].

The Participle with a Preposition before it, and still retaining its Government, an-

it is not lawful to do ; which *it* is not lawful to eat :” or the order of the words in this manner ; “*to do which, to eat which, is not lawful* :” where the Infinitive *to do, to eat*, does the office of the Nominative Case, and the Relative *which* is in the Objective Case.

[3] “Here you may see, that visions are *to dread*.”

Dryden, Fables.

“I am not like other men, *to envy* the talents I cannot reach.” Tale of a Tub, Preface. “Grammarians have denied, or at least *doubted them to be* genuine.” Congreve’s Preface to Homer’s Hymn to Venus. “That all our doings may be ordered by thy governance, *to do* always that is righteous in thy fight.” Liturgy. The Infinitive in these places seems to be improperly used.

swers

swers to what is called in Latin the Gerund : as, “ Happiness is to be attained, by avoiding evil, and by doing good ; by seeking peace, and by pursuing it.”

The Participle, with an Article before it, and the Preposition *of* after it, becomes a Substantive, expressing the action itself which the Verb signifies [4] : as, “ These

[4] This rule arises from the nature and idiom of our Language, and from as plain a principle, as any on which it is founded : namely, that a word which has the Article before it, and the Possessive Preposition *of* after it, must be a Noun ; and if a Noun, it ought to follow the Construction of a Noun, and not to have the Regimen of a Verb. It is the Participial Termination of this sort of words that is apt to deceive us, and make us treat them, as if they were of an amphibious species, partly Nouns, and partly Verbs. I believe, there are hardly any of our writers, who have not fallen into this inaccuracy. That it is such, will perhaps more clearly appear, if we examine and resolve one or two examples in this kind.

“ God, who didst teach the hearts of thy faithful people, by *the sending* to them *the light* of thy Holy Spirit : ” — Collect, Whitsunday. *Sending* is in this place a Noun ; for it is accompanied with the Article : nevertheless it is also a Transitive Verb, for it governs the Noun *light* in the Objective Case : but
are

are the Rules of Grammar, by *the observing* of which you may avoid mistakes." Or it

this is inconsistent; let it be either the one or the other, and abide by its proper construction. That these Participial Words are sometimes real Nouns is undeniable; for they have a Plural Number as such: as, "the *outgoings* of the morning." *The Sending* is the same with *the Mission*; which necessarily requires the Preposition *of* after it, to mark the relation between it and *the light*; *the mission of the light*; and so, *the sending of the light*. The phrase would be proper either way; by keeping to the Construction of the Noun, by *the sending of the light*; or of the Participle, or Gerund, by *sending the light*.

Again:—"Sent to prepare the way of thy Son our Saviour, by *preaching of Repentance* :—" Collect, St. John Baptist. Here the Participle, or Gerund, hath as improperly the Preposition *of* after it; and so is deprived of its Verbal Regimen, by which, as a Transitive, it would govern the Noun *Repentance* in the Objective Case. Besides, the phrase is rendered obscure and ambiguous: for the obvious meaning of it in its present form is, "by preaching concerning Repentance, or on that Subject;" whereas the sense intended is, "by publishing the Covenant of Repentance, and declaring Repentance to be a condition of acceptance with God." The phrase would have been perfectly right, and determinate to this sense, either way; by the Noun, by *the preaching of*
may

may be expressed by the Participle, or Gerund, by *observing* which :” not, “by *observing of* which ;” nor, “by *the observing* which :” for either of those two Phrases would be a confounding of two distinct forms.

I will add another example, and that of the best authority : “the middle station of life seems to be the most advantageously situated for *the gaining of* wisdom. Poverty turns our thoughts too much upon *the supplying of* our wants; and riches, upon *enjoying our* superfluities.” Addison, Spect. N^o 464.

The Participle is often made Absolute, in the same manner, and to the same sense, as the Infinitive Mode : as, “This, generally *speaking*, is the consequence.”

repentance ; or by the Participle, *by preaching repentance*.

“So well-bred Spaniels civilly delight
In *mumbling of the game*, they dare not bite.”

Pope, Epist. to Arbuthnot.

“By continual mortifying our corrupt affections.”
Collect, Easter-Eve. It ought to be, by *the continual mortifying of*, or, by *continually mortifying*, our corrupt affections.

The

The Participle frequently becomes altogether an Adjective ; when it is joined to a Substantive merely to denote its quality ; without any respect to time ; expressing, not an Action, but a Habit ; and, as such, it admits of the degrees of Comparison : as, “ a learned, a more learned, a most learned man ; a loving, more loving, most loving father [5].”

[5] In a few instances the Active Present Participle hath been vulgarly used in a Passive Sense : as, *beholding* for *beholden*, *owing* for *owen*. And some of our writers are not quite free from this mistake : “ I would not be *beholding* to fortune for any part of the victory.” Sidney.

“ I’ll teach you all what’s *owing* to your Queen.”

Dryden.

“ The debt, *owing* from one country to the other, cannot be paid without real effects sent thither to that value.” Locke.

“ We have the means in our hands, and nothing but the application of them is *wanting*.” Addison.

“ His estate is dipped, and is *eating* out with usury.” Steele, Spect. N^o 114.

So likewise the Passive Participle is often employed in an Active sense in the word *mistaken*, used instead of *mistaking* :

Simple Sentences are, 1. Explicative, or explaining: 2. Interrogative, or asking: 3. Imperative, or commanding [6].

1. An explicative Sentence is, when a thing is said to be, or not to be; to do, or not to do; to suffer, or not to suffer; in a direct manner: as in the foregoing examples. If the Sentence be Negative, the Adverb *not* is placed after the Auxiliary;

“You are too much *mistaken* in this King.”

Shakespear, Hen. V.

“I mistake;” or, “I am mistaking;” means, “I misunderstand;” but, “I am mistaken,” means properly, “I am misunderstood.”

But in some of these Participles the Abuse is so authorised by Custom, as almost to have become an Idiom of the language.

[6] These are the three Primary Modes, or manners of expressing our thoughts concerning the being, doing, or suffering of a thing. If it comes within our knowledge, we explain it, or make a declaration of it; if we are ignorant of it or doubtful, we make an inquiry about it; if it is not immediately in our power, we express our desire or will concerning it. In Theory, therefore, the Interrogative form seems to have as good a title to a Mode of its own, as either

or after the Verb itself, when it has no Auxiliary : as, “ it *did not* touch him ;” or, “ it *tauched* him *not* [7].”

2. In an Interrogative Sentence, or when a Question is asked, the Nominative Case of the other two : but Practice has determined it otherwise ; and has, in all the Languages with which we are much acquainted, supplied the place of an Interrogative Mode, either by Particles of Interrogation, or by a peculiar order of the words in the sentence. If it be true, as I have somewhere read, that the Modes of the Verbs are more numerous in the Lapland tongue than in any other, possibly the Laplanders may be provided with an Interrogative Mode.

[7] “ The burning lever *not deludes* his pains.”

Dryden, Ovid. Metam. B. xii.

“ I hope, my Lord, said he, I *not offend*.”

Dryden, Fables.

These examples make the impropriety of placing the Adverb *not* before the Verb very evident. Shakespear frequently places the Negative before the Verb :

“ She *not denies* it.” Much ado.

“ For men
Can counsel, and give comfort to that grief,
Which they themselves *not feel*.” Ibid.

It seems, therefore, as if this order of words had anciently been much in use, though now grown altogether obsolete.

K

follows

follows the Principal Verb, or the Auxiliary: as, “*was it he?*” “*did Alexander conquer the Persians?*” And the Adverb *there*, accompanying the Verb Neuter, is also placed after the Verb: as, “*was there a man?*” So that the Question depends intirely on the order of the words [8].

3. In an Imperative Sentence, when a thing is commanded to be, to do, to suffer, or not; the Nominative case follows the Verb, or the Auxiliary: as, “*Go, thou traytor;*” or, “*do thou go:*” or the Auxiliary *let*, with the Objective [9].

[8] “*Did he not fear the Lord, and besought the Lord, and the Lord repented him of the evil, which he had pronounced against them?*” Jer. xxvi. 19. Here the Interrogative and Explicative forms are confounded. It ought to be, “*Did he not fear the Lord, and beseech the Lord? and did not the Lord repent him of the evil—?*” “*If a man have an hundred sheep, and one of them be gone astray, doth he not leave the ninety and nine, and goeth into the mountains, and seeketh that which is gone astray?*” Matt. xviii. 12. It ought to be, *go*, and *seek*; that is, “*doth he not go, and seek that which is gone astray?*”

[9] “*For ever in this humble cell*

Let Thee and I, my fair one, dwell.”

Prior.

It ought to be *Me*.

case

case after it, is used: as, “*let us be gone* [1].”

[1] It is not easy to give particular rules for the management of the Modes and Times of Verbs with respect to one another, so that they may be proper and consistent; nor would it be of much use; for the best rule that can be given is this very general one, To observe what the sense necessarily requires. But it may be of use to consider a few examples, that seem faulty in these respects; and to examine where the fault lies.

“Some, who the depths of eloquence *have found*,
In that unnavigable stream *were drown’d*.”

Dryden, Juv. Sat. x.

The event mentioned in the first line is plainly prior in time to that mentioned in the second; this is subsequent to that, and a consequence of it. The first event is mentioned in the Present Perfect Time; it is present and completed; “they *have* [now] *found* the depths of eloquence.” The second event is expressed in the Past Indefinite Time; it is past and gone, but, when it happened, uncertain: “they *were drown’d*.” We observed, that the last-mentioned event is subsequent to the first; but how can the Past Time be subsequent to the Present? It therefore ought to be, in the second line, *are*, or *have been*, *drown’d*, in the Present Indefinite, or Perfect, which is consistent with the Present Perfect Time in the first line: or, in the first line, *had found* in the Past Perfect;

The ADJECTIVE in English having no variation of Gender or Number, cannot which would be consistent with the Past Indefinite in the second line.

“ Friend to my life, which *did* not you *prolong*,
The world *had wanted* many an idle song.”

Pope, Epist. to Arbuthnot.

It ought to be, either, *had* not you *prolonged*; or, *would want*.

There seems to be a fault of the like nature in the following passage:

“ But oh! ’twas little that her life
O’er earth and waters *bears* thy fame.” Prior.

It ought to be *bore*, in the second line.

Again:

“ Him portion’d maids, apprentic’d orphans *blest*,
The young who *labour*, and the old who *rest*.”

Pope, Moral Ep. iii. 267.

“ Fierce as he *mov’d*, his silver shafts *resound*.”
Iliad, B. i.

The first Verb ought to be in the same Time with the following.

“ Great Queen of Arms, whose favour Tydeus won,
As thou *defend’st* the sire, defend the son.”

Pope, Iliad, x. 337.

It ought to be *defendedst*.

“ Had their records been delivered down in the vulgar tongue,—they could not now be understood, unless by Antiquaries, who *made* it their study to exhibit
but

but agree with the Substantive in those respects; some of the Pronominal Adjectives

pound them." Swift, Letter on the English Tongue. Here the latter part of the sentence depends intirely on the *Supposition* expressed in the former, "of their records being delivered down in the vulgar tongue;" therefore *made* in the Indicative Mode, which implies no supposition, and in the Past Indefinite Time, is improper: it would be much better in the Past Definite and Perfect, *had made*; but indeed ought to be in the Subjunctive Mode, Present or Past Time, *should make*, or *should have made*.

"And Jesus answered, and said unto him, What wilt thou, that I should do unto thee? The blind man said unto him; Lord, that I *might* receive my sight." Mark, x. 51. "That I may know him, and the power of his resurrection, and the fellowship of his sufferings, being made conformable unto his death; If by any means I *might* attain unto the resurrection of the dead." Phil. iii. 10, 11. It ought to be *may* in both places. See also John, ix. 39. Ephes. iii. 19. Col. i. 9, 10.

"On the morrow, because he *should have known* the certainty, wherefore he was accused of the Jews, he loosed him." Acts, xxi. 30. It ought to be, because he *would know*; or rather, *being willing to know*: βελομενος γινωσι.

"I *thought to have written* last week," is a very common phrase: the Infinitive being in the Past

only excepted, which have the Plural number: as, *these, those*: which must agree in Number [2] with their Substantives.

Time, as well as the Verb which it follows. But it is certainly vicious: for how long soever it *now* is since I *thought, to write* was then present to me; and must still be considered as present, when I bring back that time, and the thoughts of it. It ought to be therefore, “I *thought to write* last week.” “I cannot excuse the remissness of those, whose business it *should have been*, as it certainly *was* their interest, *to have interposed* their good offices.” Swift. “There were two circumstances, which *would have made* it necessary for them *to have lost* no time.” Ibid. “History Painters *would have found* it difficult, *to have invented* such a species of beings.” Addison, Dial. I. on Medals. It ought to be, *to interpose, to lose, to invent*.

[2] “By *this means* thou shalt have no portion on this side the river:” Ezra, iv. 16. “It renders us careless of approving ourselves to God by religious duties, and by *that means* securing the continuance of his goodness.” Atterbury, Sermons. Ought it not to be, by *these means*, by *those means*? or by *this mean*, by *that mean*, in the singular number? as it is used by Hooker, Sidney, Shakespear, &c.

“We have strict statutes, and most biting laws,
Which for *this* nineteen years we have let sleep.”

Shakespear, Meas. for Meas.

Nouns

Nouns of Measure, Number, and Weight, are sometimes joined in the Singular form with Numeral Adjectives denoting Plurality: as, “fifty *foot*; six *score*.”

“I have not wept *this* forty years. Dryden. “If I had not left off troubling myself about *those* kind of things. Swift, Letter to Steele. “I fancy *they* are *these* kind of Gods, which Horace mentions in his allegorical vessel.” Addison, Dial. II. on Medals. “I am not recommending *these* kind of sufferings to your liking.” Bishop Sherlock, Vol. II. Disc. 11. The foregoing phrases are all improper. So the Pronoun must agree with its Noun: in which respect let the following example be considered. “*It* is an unanswerable argument of a very refined age, the wonderful *Civilities* that have passed between the nation of authors and that of readers.” Swift, Tale of a Tub, Sect. x. As to these wonderful *Civilities*, one might say, that “*they* are an unanswerable argument, &c.” but as the Sentence stands at present, it is not easy to reconcile it to any grammatical propriety. “*A* person [that is, *one*] *whom* all the world allows to be so much your *better*s.” Swift, Battle of Books. “His face was easily taken either in painting or sculpture; and scarce any *one* though never so indifferently skilled in *their* art, failed to hit it.” Welwood’s Memoirs, p. 68, 6th Edit.

“ Ten thousand *fathom* deep.”

Milton, P. L. ii. 934.

“ A hundred *head* of Aristotle’s friends.”

Pope, Dunciad, iv. 192.

“ About an hundred *pound* weight.” John,
xix. 39.

The Adjective generally goes before the Noun : as, “ a wise man ; a good horse ;” unless something depend on the Adjective ; as, “ food convenient for me,” or the Adjective be emphatical ; as “ Alexander the great :” and it stands immediately before the Noun, unless the Verb *to be*, or any Auxiliary joined to it, come between the Adjective and the Noun ; as, “ happy is the man ; happy shall he be.” And the Article goes before the Adjective : except the Adjectives, *all*, *such*, and *many*, and others subjoined to the Adverbs, *so*, *as*, and *how* : as, “ *all the* men ;” “ *such a* man ;” “ *many a* man ;” “ *so good a* man ;” “ *as good a* man as ever lived ;” “ *how beautiful a* prospect is here !” And sometimes, when there are two or more Adjectives joined

joined to the Noun, the Adjectives follow the Noun: as, “a man learned and religious.”

There are certain Adjectives, which seem to be derived without any variation from Verbs, and have the same signification with the Passive Participles of their Verbs: they are indeed no other than Latin Passive Participles adapted to the English termination: as, *annihilate*, *contaminate*, *elate*;

“To destruction sacred and *devote*.” Milton.

“The alien compost is *exhaust*.”

Philips, Cyder.

These (some few excepted, which have gained admission into common discourse,) are much more frequently, and more allowably, used in poetry, than in prose [3].

[3] Adjectives of this sort are sometimes very improperly used with the Auxiliary *have*, or *had*, instead of the Active Perfect Participle: as, “Which also King David did dedicate unto the Lord, with the
The

The Distributive Pronominal Adjectives *each, every, either*, agree with the Nouns, Pronouns, and Verbs of the Singular number only [4]: as, “The King of Israel and Jehosaphat the king of Judah sat, *each*

silver and gold that he *had dedicate* of all nations which he subdued.” 2 Sam. viii. 11. “And Jehoash took all the hallowed things, that—his fathers, kings of Judah, *had dedicate*.” 2 Kings, xii. 18. So likewise Dan. iii. 19. It ought to be, *had dedicated*. “When both interests of Tyranny and Episcopacy *were incorporate* into each other.” Milton, Eiconoclast. xvii.

[4] “Let *each* esteem other better than *themselves*.” Phil. ii. 3. It ought to be, *himself*. “It is requisite, that the language of an heroic poem should be both perspicuous and sublime. In proportion as *either* of these two qualities *are* [is] wanting, the language is imperfect.” Addison, Spect. N° 285. “’Tis observable, that *every one* of the Letters *bear* date after his banishment; and *contain* a compleat Narrative of all his story afterwards.” Bentley, Dissert. on Themistocles’s Epistles, Sect. ii. It ought to be *bears*, and *they contain*.

There is a like impropriety in the following Sentence: “I do not mean by what I have said, that I think *any one* to blame for taking due care of *their* health.” Addison, Spect. N° 25.

[king] on *his* throne, having [*both*] put on their robes." 1 Kings, xxii. 10.
 "Every tree is known by *his* own fruit."
 Luke, vi. 44.

"Lepidus flatters both,
 Of both is flatter'd; but he neither loves,
 Nor *either* cares for him."

Shakespear, Ant. and Cleop.

Unless the Plural Noun convey a Collective idea; as, "that *every twelve Years* there should be set forth two ships." Bacon.

Either is often used improperly instead of *each*: as,
 "The king of Israel and Jehosaphat king of Judah sat *either* [each] of them on his throne." 2 Chron. xviii. 9.
 "Nadab and Abihu, the sons of Aaron, took *either* [each] of them his censer." Lev. x. 1. See also 1 Kings, vii. 15. *Each* signifies *both* of them, taken distinctly, or separately: *either* properly signifies *only the one, or the other*, of them, taken disjunctively. For which reason the like expression in the following passages seems also improper: "They crucified two other with him, on *either* side one, and Jesus in the midst." John, xix. 18. "On *either* side of the river was there the tree of life." Rev. xxii. 2. See also 1 Kings, x. 19. "Proposals for a truce between the ladies of *either* party." Addison, Freeholder. Contents of N^o 38.

Every

Every Verb, except in the Infinitive, or the Participle, hath its Nominative case, either expressed or implied [5]: as,

[5] “Forasmuch as it hath pleased Almighty God of his goodness to give you safe deliverance, and *bath preserved* you in the great danger of Childbirth:”—Liturgy. The Verb *bath preserved* hath here no Nominative case; for it cannot be properly supplied by the preceding word *God*, which is in the Objective case. It ought to be, “and *He bath preserved* you;” or rather, “and *to preserve* you.” Some of our best writers have frequently fallen into this inaccuracy, which appears to me to be no small one: I shall therefore add some more examples of it, by way of admonition; inserting in each, within Crotchets, the Nominative case that is deficient, and that must necessarily be supplied to support the proper Construction of the Sentence. “If the calm, in which he was born, and [which] lasted so long, had continued.” Clarendon, Life, p. 43. “The Remonstrance he had lately received from the House of Commons, and [which] was dispersed throughout the Kingdom.” Clarendon, Hist. Vol. 1. p. 366. 8vo. “These we have extracted from an Historian of undoubted credit, a reverend bishop, the learned Paulus Jovius: and [they] are the same that were practised under the pontificate of Leo X.” Pope, of the Poet Laureat. “A cloud gathering in the North; which we have helped to raise, and
“Awake,

“Awake, arise, or be for ever fall’n :”

that is, “Awake ye, &c.”

Every Nominative case, except the case Absolute, and when an address is made to a Person, belongs to some Verb, either ex-

[which] may quickly break in a storm upon our heads.”

Swift, Conduct of the Allies. “A man, whose inclinations led him to be corrupt, and [who] had great abilities to manage and multiply and defend his cor-

ruptions.” Gulliver, Part I. Chap. vi. “My Master likewise mentioned another quality, which his servants had discovered in many Yahoos, and [which] to him was wholly unaccountable.” Gulliver, Part IV. Chap.

vii. “This I filled with the feathers of several birds I had taken with springes made of Yahoos hairs, and [which] were excellent food.” Ibid. Chap. x. “Osiris,

whom the Grecians call Dionysius, and [who] is the same with Bacchus,” Swift, Mechan. Oper. of the Spirit, Sect. ii.

“Which Homer might without a blush *rebearse*,
And leaves a doubtful palm in Virgil’s verse.”

Dryden, Fables, Dedication.

“Whose own example strengthens all his laws,
And is himself the great sublime he draws.”

Pope, Essay on Crit.

“Will martial flames for ever fire thy mind,
And never, never *be* to heav’n resign’d?”

Odyssey, xii. 145.

“And will [it, thy mind,] never —”

pressed or implied [6]: as in the answer to a Question: "Who wrote this Book? Cicero:" that is, "Cicero *wrote it*." Or when the Verb is understood; as,

To whom thus Adam:"

that is, *spake*.

Every Possessive case supposes some Noun, to which it belongs: as when we say, "St. Paul's, St. James's," we mean St. Paul's *Church*, or St. James's *Palace*.

Every Adjective has relation to some Substantive, either expressed or implied:

[6] "*Which rule*, if it had been observed, a neighbouring Prince would have wanted a great deal of that incense, which hath been offered up to him by his adorers." Atterbury, Serm. I. i. The Pronoun *it* is here the Nominative case to the Verb *observed*; and *which rule* is left by itself, a Nominative case without any Verb following it. This manner of expression, however improper, is very common. It ought to be, "If *this rule* had been observed, &c." "We have no better materials to compound the Priesthood of, than the mass of mankind: *which*, corrupted as it is, those who receive Orders must have some vices to leave behind them, when they enter into the Church." Swift, Sentiments of a Church of England man.

as,

as, "The Twelve," that is, *Apostles* ; "the wise, the elect," that is, *persons*.

In some instances the Adjective becomes a Substantive, and has an Adjective joined to it: as, "the chief Good ; " Evil, be thou my Good [7] ?"

[7] Adjectives are sometimes employed as Adverbs ; improperly, and not agreeably to the Genius of the English Language. As, "*indifferent* honest, *excellent* well : " Shakespear, Hamlet. "*extreme* elaborate : " Dryden, Essay on Dram. Poet. "*marvellous* graceful : " Clarendon, Life, p. 18. "*marvellous* worthy to be praised : " Psal. cxlv. 3. for so the Translators gave it. "*extreme* unwilling ; " "*extreme* subject : " Swift, Tale of a Tub, and Battle of Books ; "*extraordinary* rare : " Addison, on Medals. " He behaved himself *conformable* to that blessed example." Sprat's Sermons, p. 80. " I shall endeavour to live hereafter *suitable* to a man in my station." Addison, Spect. N^o 530. " The Queen having changed her ministry *suitable* to her own wisdom." Swift, Exam. N^o 28. " The assertions of this Author are *easier* detected." Swift, Public Spirit of the Whigs. " The Characteristic of his Sect allowed him to affirm no *stronger* than that." Bentley, Phil. Lips. Remark liii. " If one author had spoken *nobler* and *loftier* than another." Ibid. " Xenophon says *express*." Ibid. Remark xlv. " I can never think so very *mean* of him." Id. Dissertation on Phalaris, p. 24. " Homer describes this river

In

In others, the Substantive becomes an Adjective, or supplies its place; being pre-
agreeable to the vulgar reading." Pope, Note on Iliad
 ii. ver. 1032. So *exceeding*, for *exceedingly*, however
 improper, occurs frequently in the Vulgar Translation
 of the Bible, and has obtained in common discourse.
 "Many men reason *exceeding* clear and rightly, who
 know not how to make a syllogism." Locke. "We
 should live soberly, righteously, and *godly* in this present
 world." Tit. ii. 12. See also 2 Tim. iii. 12. "To
 convince all that are *ungodly* among them, of all their
 ungodly deeds, which they have *ungodly* committed."
 Jude, 15. "I think it very *masterly* written." Swift
 to Pope, Letter lxxiv.

"O Liberty, Thou Goddess *heavcnly* bright."

Addison.

The Termination *ly*, being a contraction of *like*, ex-
 presses, *similitude* or *manner*; and, being added to
 Nouns, forms Adjectives; and, added to Adjectives,
 forms Adverbs. But Adverbs expressing *similitude*, or
manner, cannot be so formed from Nouns: the few
 Adverbs, that are so formed, have a very different im-
 port: as *daily*, *yearly*; that is, day by day, year by
 year. *Early*, both Adjective and Adverb, is formed
 from the Saxon Preposition *ær*, *before*. The Adverbs
 therefore above noted are not agreeable to the Analogy
 of formation established in our Language, which re-
 quires *godlily*, *ungodlily*, *heavently*: but these are dis-
 agreeable to the ear, and therefore could never gain
 admittance into common use.

fixed

fixed to another Substantive, and linked to it by a mark of conjunction: as, “sea-water; land-tortoise; forest-tree.”

ADVERBS have no Government [8].

The Adverb, as its name imports, is generally placed close or near to the word,

The word *lively*, used as an Adverb, instead of *livelily*, is liable to the same objection; and, not being so familiar to the ear, immediately offends it. “That part of poetry must needs be best, which describes most *lively* our actions and passions, our virtues and our vices.” Dryden, Pref. to State of Innocence. “The whole design must refer to the Golden Age, which it *lively* represents.” Addison, on Medals, Dial. II.

On the other hand, an Adverb is improperly used as an Adjective in the following passages. “We may cast in such seeds and principles, as we judge must likely to take *soonest* and deepest root.” Tillotson, Vol. I. Serm. 52. “After these wars, of which they hope for a *soon* and prosperous issue.” Sidney. “Use a little wine for thy stomach’s sake, and thine *often* infirmities.” 1 Tim. v. 23. Unless *soon* and *often* were formerly Adjectives, though now wholly obsolete in that form. See Johnson’s Dictionary; *Ostentimes* and *Soonly*.

[8] “*How much soever* the reformation of this corrupt and degenerate age is *almost* utterly to be despaired of, we may yet have a more comfortable pro-

L

which

which it modifies or affects ; and its propriety and force depends on its position [9]. Its place for the most part is before Adjectives ; after Verbs Active or Neuter ; and it frequently stands between the Auxiliary and the Verb : as, “ He made a *very* elegant harangue ; he *spake* *unaffectedly* and *forcibly* ; and *was attentively* heard by the whole audience.”

Two Negatives in English destroy one another, or are equivalent to an Affirmative [1] : as,

spect of future times.” Tittotson, I. Pref. to Serm. 49. The first part of this Sentence abounds with Adverbs ; and those such, as are hardly consistent with one another.

[9] Thus it is commonly said, “ I *only* spake three words ;” when the intention of the speaker manifestly requires, “ I spake *only* three words.”

“ Her body shaded with a slight cymarr,
Her bosom to the view was *only* bare.”

Dryden, Cymon and Iphig.

The sense necessarily requires this order,

“ Her bosom *only* to the view was bare.”

[1] The following are examples of the contrary :

“ Give not me counsel ;

Nor let *no* comforter delight mine ear.”

Shakespear, Much ado.

“ Nor

“Nor did they *not* perceive the evil plight
In which they were, or the fierce pains *not* feel.”
Milton, P. L. i. 335.

PREPOSITIONS have a Government of
Cases: and in English they always require
the Objective Case after them: as, “*with*
him; from her; to me [2].”

“She cannot love,
Nor take *no* shape *nor* project of affection.” Ibid.
Shakespear uses this construction frequently. It is a
relique of the antient style, abounding with Negatives;
which is now grown wholly obsolete:

“And of his port as meke as is a mayde:

He *never* yet *no* vilanie *ne* fayde

In alle his lif unto *no* manere wight.

He was a veray parfit gentil knight.” Chaucer.

“I cannot by *no* means allow him, that this argument
must prove,—” Bentley, Differt. on Phalaris, p. 515.

“That we need not, *nor* do *not*, confine the purposes
of God.” Id. Sermon 8.

[2] “Who servest thou *under*?” Shakespear, Hen. V.

“Who do you speak *to*?” As you like it.

“I’ll tell you, *who* Time ambles *withal*, *who* Time
trots *withal*, *who* Time gallops *withal*, and *who* he
stands still *withal*.

“I prythee, *whom* doth he trot *withal*?” Ibid.

The Preposition is often separated from the Relative which it governs, and joined to the Verb at the end of the Sentence, or of some member of it : as, “ Horace is an author, *whom* I am much delighted *with*.” “ The world is too well bred to shock authors with a truth, *which* generally their booksellers are the first that inform them of” [3]. This is an idiom, which our language is strongly inclined to : it prevails in common conversation, and suits very well with the familiar style in writing : but the placing of the Preposition before the Relative is more graceful, as well as more perspicuous ; and agrees much better with the solemn and elevated style [4].

“ We are still much at a loss, *who* civil power belongs to ?”
Locke.

In all these places, it ought to be *whom*.

“ Now Margaret’s curse is fall’n upon our heads,
When she exclaim’d *on* Hastings, you, and I.”

Shakespeare, Rich. III.

It ought to be *me*.

[3] Pope, Preface to his Poems.

[4] Some writers separate the Preposition from its Noun, in order to connect different Prepositions with Verbs

Verbs are often compounded of a Verb and a Preposition; as *to uphold, to outweigh, to overlook*: and this composition sometimes gives a new sense to the Verb; as, *to understand, to withdraw, to forgive* [5]. But in English the Preposition is more frequently placed after the Verb, and separate from it, like an Adverb; in which situation it is no less apt to affect the sense of it, and to give it a new meaning; and may still be considered as belonging to the Verb, and as a part of it. As, *to cast*, is to throw; but *to cast up*, or to compute, *an account*, is quite a different thing: thus,

the same Noun; as, “To suppose the Zodiac and Planets to be efficient *of*, and antecedent *to*, themselves.” Bentley, Serm. 6. This, whether in the familiar or the solemn style, is always inelegant; and should never be admitted, but in Forms of Law, and the like; where fulness and exactness of expression must take place of every other consideration.

[5] *With* in composition retains the signification, which it has among others in the Saxon, of *from* and *against*: as *to withhold, to withstand*. So also *for* has a negative signification, from the Saxon; as, *to forbid, forebodan*; *to forget, forgitan*.

to fall on, to bear out, to give over; &c. So that the meaning of the Verb, and the propriety of the phrase, depend on the Preposition subjoined [6].

[6] Examples of impropriety in the use of the Preposition, in phrases of this kind. "Your character, which I, or any other writer, may now value ourselves *by* [upon] drawing," Swift, Letter on the English Tongue. "You have bestowed your favours *to* [upon] the most deserving persons." Ibid. "Upon such occasions as fell *into* [under] their cognisance." Swift, Contest and Dissentions, &c. Chap. iii. "That variety of factions *into* [in] which we are still engaged." Ibid. Chap. v. "To restore myself *into* [to] the good graces of my fair Critics." Dryden, Pref. to Aureng. "Accused the ministers *for* [of] betraying the Dutch." Swift, Four last years of the Queen, Book ii. "Ovid, whom you accuse *for* [of] luxuriancy of verse." Dryden, on Dram. Poesy. "The people of England may congratulate *to* themselves, that"—Dryden. "Something like this has been reproached *to* Tacitus." Bolingbroke, on History, Vol. I. p. 136. "He was made much *on* [of] at Argos."—"He is so resolved *of* [on] going to the Persian Court." Bentley, Dissert. on Themistocles's Epistles, Sect. iii. "Neither the one nor the other shall make me swerve *out of* [from] the path, which I have traced to myself." Bolingbroke, Letter to Wyndham, p. 252.

As the Preposition subjoined to the Verb hath the construction and nature of an Ad-

“And virgins smil’d at what they blush’d before :”

“at what they blush’d [at].” Pope, Essay on Crit.

“They are now reconciled by a zeal for their cause to what they could not be prompted [to] by a concern for their beauty.” Addison, Spect. N° 81.

“If policy can prevail *upon* [over] force.” Addison, Travels, p. 62. “I do likewise dissent *with* [from] the Examiner.” Addison, Whig-Exam. N° 1.

“Ye blind guides, which strain *at* a gnat, and swallow a camel.” Matt. xxiii. 24. *διυλίζοντες*, “which strain

out, or take a gnat *out* of the liquor by straining it :” the impropriety of the Preposition has wholly destroyed

the meaning of the phrase. “No discouragement *for* the authors to proceed.” Tale of a Tub, Preface.

“A strict observance *after* times and fashions.” Ibid. Sect. ii. “Which had a much greater share *of* inciting

him, than any regards *after* his father’s commands.” Ibid. Sect. vi.

“Not from any personal hatred to them, but in justification *to* [of] the best of Queens.” Swift, Examiner, N° 23.

In the last example, the Verb being Transitive and requiring the Objective Case, the Noun formed from it seems to require the Possessive Case, or its preposition, after it.

Or perhaps he meant to say, “in *justice* to the best of Queens.” Observe also, that the Noun generally re-

quires after it the same Preposition, as the Verb from which it is formed : “It was perfectly in compliance

to [with] some persons, for whose opinion I have great

verb, so the Adverbs, *here, there, where*, with a Preposition subjoined, as *hereof, therewith, whereupon* [7], have the construction and nature of Pronouns.

deference." Swift, Pref. to Temple's Memoirs. "The wisest Princes need not think it any diminution *to* [of] their greatness, or derogation *to* [from] their sufficiency, to rely upon counsel." Bacon, Essay xx. So the Noun *aversion*, (that is, a turning away,) as likewise the Adjective *averse*, seems to require the Preposition *from* after it; and not so properly to admit of *to* or *for*, which are often used with it.

[7] These are much disused in common discourse, and are retained only in the Solemn, or Formulary style. "They [our Authors] have of late, 'tis true, reformed in some measure the gouty joints and damning-work of *whercunto's, whereby's, thereof's, therewith's*, and the rest of this kind; by which complicated periods are so curiously strung, or hooked on, one to another, after the long-spun manner of the bar or pulpit." Lord Shaftesbury, Miscel. V.

"Fra sche *thir* wordis had say'd."

Gawin Douglas, *Æn.* x.

"*Thir* wikkit schrewis."

Ibid. *Æn.* xii.

That is, "*these* words;" "*these* wicked shrews" *Theyr, these, or those*, masculine; *thair, these, or those*, feminine, Islandick. Hence, perhaps, *thereof, therewith, &c.* of, with, *them*; and so, by analogy, the rest of this class of words.

The

The Prepositions *to* and *for* are often understood, chiefly before the Pronoun; as, “give me the book; get me some paper;” that is, *to me, for me* [8].

[8] Or in these and the like phrases, may not *me, thee, him, her, us*, which in Saxon are the Dative cases of their respective Pronouns, be considered as still continuing such in the English, and including in their very form the force of the Prepositions *to* and *for*? There are certainly some other Phrases, which are to be resolved in this manner: “Who is *me*!” The phrase is pure Saxon: “*wa is me*.” *me* is the Dative case; in English, with the Preposition, *to me*. So, “*methinks*.” Saxon, “*me thincth*.” *εμοι δοκει*. “As *us* thoughte.” Sir John Maundeville. “*Methoughts*, this short interval of silence has had more music in it, than any of the same space of time before or after it.” Addison, Tatler, N^o 133. See also Spect. N^o 3 and 63. It ought to be, *methought*. “The Lord do that which *seemeth him* good.” 2 Sam. x. 12. See also 1 Sam. iii. 18. 2 Sam. xviii. 4. “He shall dwell with thee,—in one of thy gates, where it *liketh him* best.” Deut. xxiii. 16. See also Esth. viii. 8. “O well is *thee*!” Psal. cxxviii. 2. “*Wel his the*, id est, bene est tibi.” Simeon Dunelm. apud X. Scriptores, col. 135. “Wel is *him* that ther mai be.” Anglo-Saxon Poem in Hickes’s Thesaur. Vol. I. p. 231. “Well is *him*, that dwelleth with a wife of understanding.”

The

The Preposition *in*, or *on*, is often understood before Nouns expressing Time: as, "*this day; next month; last year;*" that is, "*on this day;*" "*in next month;*" "*in last year.*"

In Poetry, the common Order of words is frequently inverted; in all ways, in which it may be done without ambiguity or obscurity.

Two or more Simple Sentences, joined together by one or more CONNECTIVE WORDS, become a compounded Sentence.

—"Well is *him*, that hath found prudence." Ecclus. xxv. 8, 9. The Translator thought to correct his phrase afterward; and so hath made it neither Saxon nor English: "Well is *he*, that is defended from it." Ecclus. xxviii. 19. "Wo worth the day!" Ezek. xxx. 2 that is, "Wo be *to* the day." The word *worth* is not the Adjective, but the Saxon Verb *weorthan*, or *worthan*, *feri*, *to be*, *to become*; which is often used by Chaucer, and is still retained as an Auxiliary Verb in the German Language.

There

There are two Sorts of words, which connect Sentences : 1. Relatives; 2. Conjunctions.

Example: 1. "Blessed is the man, *who* feareth the Lord." 2. "Life is short, *and* art is long." 1. and 2. "Blessed is the man, *who* feareth the Lord, *and* keepeth his commandments."

The RELATIVES, *who*, *which*, *that*, having no variation of gender or number, cannot but agree with their Antecedents. *Who* is appropriated to persons; and so may be accounted Masculine and Feminine only: we apply *which* now to things only; and to Irrational Animals, excluding them from Personality, without any consideration of Sex: *which* therefore may be accounted Neuter. But formerly they were both indifferently used of persons: "Our Father, *which* art in heaven." *That* is used indifferently both of persons and things: but it would better become the solemn style to restrain it more to the latter, than is usually done.

done. *What* includes both the Antecedent and the Relative: as, “This was *what* he wanted;” that is, “*the thing which* he wanted [9].”

The Relative is the Nominative Case to the Verb, when no other Nominative comes between it and the Verb: but when another Nominative comes between it and the Verb, the Relative is governed by some word in its own member of the Sentence: as, “The God, *who* preserveth me; *whose* I am, and *whom* I serve [1].” Because in the dif-

[9] *That* has been used in the same manner, as including the Relative *which*; but it is either improper, or obsolete: as, “To consider advisedly of *that* is moved.” Bacon, Essay xxii. “We speak *that* we do know, and testify *that* we have seen.” John, iii. 11. So likewise the Neuter Pronoun *it*: as, “By this also a man may understand, when it is that men may be said to be conquered; and in what the nature of Conquest and the Right of a Conqueror consisteth; for this Submission is *it* [that which] implyeth them all.” Hobbes, Leviathan, Conclusion. “And this is *it* [that which] men mean by distributive Justice, and [which] is properly termed Equity.” Hobbes, Elements of Law, Part I. Chap. iv. 2.

[1] “*Who*, instead of going about doing good,
ferent

ferent members of the sentence the Relative performs a different office: in the first member it represents the Agent; in the second the Possessor; in the third the object of an action: and therefore must be in the different Cases, corresponding to those offices.

Every Relative must have an Antecedent to which it refers, either expressed, or understood: as, “*Who steals my purse, steals trash:*” that is, “*the man, who—*”

The Relative is of the same person with the Antecedent: and the Verb agrees with it accordingly: as, “*Who is this, that cometh from Edom; this, that is glorious in his apparel? I, that speak in righteousness* are perpetually intent upon doing mischief.” Tiltonson, Sermon. I. 18. The Nominative Case *they* in this sentence is superfluous: it was expressed before in the Relative *who*. “*Commend me to an argument, that, like a Flail, there’s no Fence against it.*” Bentley, Dissert. on Euripides’s Epistles, Sect. i. If *that* be designed for a Relative, it ought to be *which*, governed by the Preposition *against*, and *it* is superfluous: thus, “*against which there is no fence:*” but if *that* be a Conjunction, it ought to be in the preceding member, “*such an argument.*”

ness.”

ness." Isaiah lxiii. 1. "O Shepherd of Israel; *Thou, that ledest Joseph like a flock; Thou, that dwellest between the Cherubims!*" Psal. lxxx. 1. [2].

[2] "I am *the Lord, that maketh* all things; *that stretcheth* forth the heavens alone:"—Isaiah, xliv. 24. Thus far is right: *the Lord* in the third Person is the Antecedent, and the Verb agrees with the Relative in the third Person: "I am *the Lord, which Lord, or He that, maketh* all things." It would have been equally right if *I* had been made the Antecedent, and the Relative and the Verb had agreed with it in the First Person: "*I* am *the Lord, that make* all things." But when it follows, "*that spreadeth* abroad the earth by *myself*;" there arises a confusion of Persons, and a manifest Solecism.

"*Thou great first Cause, least understood!*

Who all my sense confin'd

To know but this, that Thou art good,

And that myself am blind:

Yet gave me in this dark estate, &c."

Pope, Universal Prayer.

It ought to be, *confinedst*, or *didst confine*; *gavest*, or *didst give*; &c. in the second Person.

"O *Thou* supreme! high thron'd all height above!

O great Pelasgic, Dodonean Jove!

Who 'midst surrounding frosts, and vapours chill,

Preside on bleak Dodona's vocal hill!"

Pope, Iliad. xvi. 284.

When

When *this, that, these, those*, refer to a preceding Sentence ; *this*, or *these*, refers to the latter member or term ; *that*, or *those*, to the former ; as,

“ *Self-love*, the spring of motion, acts the soul ;
Reason's comparing balance rules the whole :
 Man, but for *that*, no action could attend ;
 And, but for *this*, were active to no end.”

Pope, Essay on Man.

“ *Some* place the bliss in action, *some* in ease :
Those call it pleasure, and contentment *these*.”

Ibid.

The Relative is often understood, or omitted : as, “ The man I love ;” that is, “ *whom* I love [3].”

“ Nor thou, lord Arthur, shalt escape :

To thee I often call'd in vain,

Against that assassin in crape ;

Yet *thou* couldst tamely see me slain.

Nor when I felt the dreadful blow,

Or *chid* the dean, or *pinch'd* thy spouse.”

Swift, Market-hill Thorn.

See above, p. 68. Note.

[3] Abuse on all he lov'd, or lov'd him, spread.”

Pope, Epist. to Arbuthnot.

That is, “ all *whom* he lov'd, or *who* lov'd him :” or, to make it more easy by supplying a Relative that has no variation of Cases, “ all *that* he lov'd, or *that* lov'd

The

The accuracy and clearness of the sentence depend very much upon the proper and determinate use of the Relative ; so that it may readily present its Antecedent to the mind of the hearer, or reader, without any obscurity or ambiguity. The same may be observed of the Pronoun and the him." The Construction is hazardous, and hardly justifiable, even in Poetry. "In the temper of mind he was then." Addison, Spect. N^o 549. "In the posture I lay." Swift, Gulliver, Part I. Chap. 1. In these and the like phrases, which are very common, there is an Ellipsis both of the Relative and the Preposition ; which would have been much better supplied : "In the temper of mind *in which* he was then." "In the posture *in which* I lay." "The little satisfaction and consistency [which] is to be found in most of the systems of Divinity [which] I have met with, made me betake myself to the sole reading of the Scripture (to which they all appeal) for the understanding [of] the Christian Religion." Locke, Pref. to Reasonableness of Christianity. In the following example the antecedent is omitted : "He desired they might go to the altar together, and jointly return their thanks to *whom* only it was due." Addison, Freeholder, N^o 49. In general, the omission of the Relative seems to be too much indulged in the familiar style ; it is ungraceful in the solemn ; and, of whatever kind the style be, it is apt to be attended with obscurity and ambiguity.

Noun ;

Noun; which by some are called also the Relative and the Antecedent [4].

[4] The Connective parts of Sentences are the most important of all, and require the greatest care and attention: for it is by these chiefly that the train of thought, the course of reasoning, and the whole progress of the mind, in continued discourse of all kinds, is laid open; and on the right use of these the perspicuity, that is, the first and greatest beauty, of style principally depends. Relatives and Conjunctions are the instruments of Connexion in discourse; it may be of use to point out some of the most common inaccuracies, that writers are apt to fall into with respect to them; and a few examples of faults may perhaps be more instructive, than any rules of propriety that can be given. Here therefore shall be added some further examples of inaccuracies in the use of Relatives.

The Relative placed before the Antecedent: Example: "The bodies, which we daily handle, make us perceive, that whilst they remain between *them*, they do by an unfurmountable force hinder the approach of our *hands* that press them." Locke, Essay, B. ii. C. 4. Sect. 1. Here the sense is suspended, and the sentence is unintelligible, till you get to the end of it; there is no antecedent, to which the Relative *them* can be referred, but *bodies*; but, "whilst the bodies remain between the bodies," makes no sense at all. When you get to *hands*, the difficulty is cleared up, the sense helping out the Construction. Yet there still remains an ambiguity in the Relatives *they*, *them*, which

CONJUNCTIONS have sometimes a Government of Modes. Some Conjunctions

in number and person are equally applicable to *bodies* or *hands*: this, though it may not here be the occasion of much obscurity, which is commonly the effect of it, yet is always disagreeable and inelegant: as in the following examples.

“Men look with an evil eye upon the good that is in others; and think, that *their* reputation obscures *them*; and that *their* commendable qualities do stand in *their* light: and therefore *they* do what *they* can to cast a cloud over *them*, that the bright shining of *their* virtues may not obscure *them*.” Tillotson, Sermon. I. 42.

“The Earl of Falmouth and Mr. Coventry were rivals *who* should have most influence with the Duke, *who* loved the Earl best, but thought the other the wiser man, *who* supported Pen, *who* disobligeed all the Courtiers, even against the Earl, *who* contemned Pen as a fellow of no sense.” Clarendon, Cont. p. 264.

But the following Sentence cannot possibly be understood, without a careful recollection of circumstances through some pages preceding.

“All which, with the King's and Queen's so ample promises to *him* [the Treasurer] so few hours before the conferring the place on another, and the Duke of York's manner of receiving *him* [the Treasurer,] after *he* [the Chancellor] had been shut up with *him* [the Duke,] as *he* [the Treasurer] was informed, might very well excuse *him* [the Treasurer] for thinking *he* require

require the Indicative, some the Subjunctive Mode, after them: others have no influence at all on the Mode.

Hypothetical, Conditional, Concessive, and Exceptive Conjunctions seem in general to require the Subjunctive Mode after them: as, *if, though, unless, except, whether—or, &c.*: but by use they often admit of the Indicative; and in some cases with propriety. Examples: “*If thou be the Son of God.*” Matt. iv. 3. “*Though [the Chancellor] had some share in the affront be [the Treasurer] had undergone.*” Clarendon, Cont. p. 296.

“*Breaking a Constitution by the very same errors, that so many have been broke before.*” Swift, Contests and Dissentions, &c. Chap. 5. Here the Relative is employed not only to represent the Antecedent Noun *the errors*, but likewise the Preposition *by* prefixed to it. It ought to be, “*the same errors by which so many have been broken before.*”

Again: “*—An Undertaking; which, although it has failed, (partly, &c. and partly, &c.) is no objection at all to an Enterprize so well concerted, and with such fair probability of success.*” Swift, Conduct of the Allies. That is, “*Which Undertaking is no objection to an Enterprize so well concerted;*” that is, “*to itself:*” he means, “*the failure or miscarriage of which is no objection at all to it.*”

he *slay* me, yet will I put my trust in him." Job, xiii. 15. "*Unless* he *wash* his flesh." Lev. xii. 6. "No power, *except* it *were* given from above." John, xix. 11. "*Whether* it *were* I or they, so we preach." 1 Cor. xv. 11. The Subjunctive in these instances implies something contingent or doubtful; the Indicative would express a more absolute and determinate sense [5].

[5] The following example may serve to illustrate this observation: "*Though* he *were* divinely inspired, and spake therefore, as the oracles of God, with supreme authority; *though* he *were* indued with supernatural powers, and could therefore have confirmed the truth of what he uttered by miracles; yet in compliance with the way in which human nature and reasonable creatures are usually wrought upon, he reasoned." Atterbury, Serm. IV. 5.

That our Saviour was divinely inspired, and indued with supernatural powers, are positions, that are here taken for granted, as not admitting of the least doubt; they would therefore have been better expressed in the Indicative Mode; "*though* he *was* divinely inspired; *though* he *was* indued with supernatural powers." The Subjunctive is used in like manner in the following example: "*Though* he *were* a Son, yet learned he obedience, by the things which he suffered." Heb. v. 8. But in a similar passage the Indicative is

That,

That, expressing the motive or end, has the Subjunctive Mode, with *may*, *might*, *should*, after it.

Lest; and *that* annexed to a Command preceding; and *if* with *but* following it; necessarily require the Subjunctive Mode: Examples; “Let him, that standeth, take

employed to the same purpose, and that much more properly: “Though he *was* rich, yet for your sakes he became poor.” 2 Cor. viii. 9. The proper use then of the Subjunctive Mode after the Conjunction is in the case of a doubtful supposition, or concession: as, “*Though* he *fall*, he shall not be utterly cast down.” Psal. xxxvii. 24. And much the same may be said of the rest.

The same Conjunction governing both the Indicative and the Subjunctive Mode, in the same sentence, and in the same circumstances, though either of them separately would be right, seems to be a great impropriety: as,

“*Though* heaven’s King
Ride on thy wings, and thou with thy compeers,
Us’d to the yoke, *draw’st* his triumphant wheels
In progress through the road of heav’n star-pav’d.”

Milton, P. L. IV. 973.

“*If* there *be* but one body of legislators, it is no better than a tyranny; *if* there *are* only two, there will want a casting voice.” Addison, Spect. N° 287.

heed, *lest* he *fall*." 1 Cor. x. 12. "Take heed, *that* thou *speak* not to Jacob." Gen. xxxi. 24. "If he *do but* touch the hills, they shall smoke." Psal. civ. 32 [6].

Other Conjunctions, expressing a Continuation, an Addition, an Inference, &c. being of a positive and absolute nature, require the Indicative Mode ; or rather leave the Mode to be determined by the other circumstances and conditions of the sentence.

When the Qualities of different things are compared ; the latter Noun, or Pronoun, is not governed by the Conjunction *than*, or *as*, (for a Conjunction has no Government of Cases), but agrees with the

[6] In the following instances the Conjunction *that*, expressed, or understood, seems to be improperly accompanied with the Subjunctive Mode:

"So much she fears for William's life,
That Mary's fate she *dare* not mourn." Prior.

"Her eyes in heaven
Would through the airy region stream so bright,
That birds would sing, and think it *were* not night."

Shakespear, Rom. and Jul.

Verb,

Verb, or is governed by the Verb, or the Preposition, expressed, or understood. As, “Thou art wiser than *I* [*am*].” “You are not so tall as *I* [*am*].” “You think him handsomer than [*you think*] *me*; and you love him more than [*you love*] *me*.” In all other instances, if you complete the Sentence in like manner, by supplying the part which is understood; the Case of the latter Noun, or Pronoun, will be determined. Thus, “Plato observes, that God geometrizes: and the same thing was observed before by a wiser man than *he* :” that is, than *he was*. “It is well expressed by Plato; but more elegantly by Solomon than *him*!” that is, than *by him* [7].

[7] “You are a much greater loser than *me* by his death.” Swift, to Pope, Letter 63.

“And tho’ by heaven’s severe decree

She suffers hourly more than *me*.” Swift, to Stella.

“We contributed a third more than the Dutch, who were obliged to the same proportion more than *us*.” Swift, Conduct of the Allies.

“King Charles, and more than *him*, the Duke, and the Popish Faction, were at liberty to form new schemes.” Bolingbroke, Diss. on Parties, Letter 3.

But the Relative *who*, having Reference to no Verb or Preposition understood, but

“The drift of all his Sermons was, to prepare the Jews for the reception of a prophet, mightier than *Him*, and whose shoes he was not worthy to bear.” Atterbury, Sermons, IV. 4.

“A Poem, which is good in itself, cannot lose any thing of its real value; though it should appear not to be the work of so eminent an author, as *him*, to whom it was first imputed.” Congreve, Pref. to Homer’s Hymn to Venus.

“A stone is heavy, and the sand weighty: but a fool’s wrath is heavier than *them* both.” Prov. xxvii. 3.

“If the King gives us leave, you or I may as lawfully preach, as *them* that do.” Hobbes, Hist. of Civil Wars, p. 62.

“The sun upon the calmest sea
Appears not half so bright at *Thee*.” Prior.

“Then finish, dear Chloe, this Pastoral war,
And let us like Horace and Lydia agree:
For thou art a Girl as much brighter than *her*,
As he was a Poet sublimer than *me*.”

“Phalaris, who was so much older than *her*.” Bentley, Dissert. on Phalaris, p. 537.

In these passages it ought to be, *I, We, He, They, Thou, She*, respectively. Perhaps the following example may admit of a doubt, whether it be properly expressed or not;

only

only to its Antecedent, when it follows *than* is always in the Objective Case; even though the Personal Pronoun, if substituted in its place, would be in the Nominative: as,

“Beelzebub, *than whom*,
Satan except, none higher sat.”

Milton, P. L. ii. 299.
which, if we substitute the Personal Pronoun, would be,

“none higher sat, *than he*.”

The Conjunction *that* is often omitted and understood: as, “I beg you would come

“The lover got a woman of a greater fortune *than her* he had miss’d.” Addison, Guardian, N^o 97. Let us try it by the Rule given above; and see, whether some correction will not be necessary, when the parts of the Sentence, which are understood, come to be supplied: “The lover got a woman of a greater fortune, *than she [was, whom]* he had miss’d.”

“Nor hope to be myself less miserable

By what I seek, but others to make such

As *I*.”

Milton, P. L. ix. 126.

The Syntax, says Dr. Bentley, requires, “make such as *me*.” On the contrary, the Syntax necessarily requires, “make such as *I*.” for it is not, “I hope to make others such, as to make *me*.” the Pronoun is not governed by the Verb to *make*, but is the Nominative Case to the Verb *am* understood; “to make others such as *I am*.”

to me :” “ See thou do it not :” that is,
 “ *that* you would :” “ *that* thou do [8].”

The Nominative Case following the Auxiliary, or the Verb itself, sometimes supplies the place of the Conjunction, *if*, or *though* : as, “ Had he done this, he had escaped :” “ Charm he never so [9] wisely :” that is, “ *if* he had done this ;” “ *though* he charm.”

Some Conjunctions have their Correspondent Conjunctions belonging to them ; so that, in the subsequent Member of the Sentence, the latter answers to the former : as, *although*,—*yet*, or *nevertheless* ; *whether*—, or ; *either*—, or ; *neither*, or *nor*—, *nor* ; *as*—, *as* ; expressing a Comparison of

[8] “ But it is reason, the memory of their virtues remain to their posterity.” Bacon, Essay xiv. In this and many the like phrases, the Conjunction were much better inserted : “ *that* the memory, &c.”

[9] *Never so*—“ This phrase, says Dr. Johnson, is justly accused of Solecism.” It should be, *ever so* wisely : that is, *how* wisely *soever*. “ Besides, a Slave would not have been admitted into that Society, had he had *never such* opportunities.” Bentley, Dissert. on Phalaris, p. 338.

equality;

equality; “*as white as snow:*” *as*—, *so*; expressing a Comparison sometimes of equality; “*as the stars, so shall thy seed be;*” that is, equal in number: but most commonly a Comparison in respect of quality; “and it shall be, *as* with the people, *so* with the priest; *as* with the servant, *so* with his master:” “*as* is the good, *so* is the sinner; *as* the one dieth, *so* dieth the other:” that is, in like manner: *so*—, *as*, with a Verb, expressing a Comparison of quality; “To see thy glory, *so as* I have seen thee in the sanctuary:” but with a Negative and an Adjective, a Comparison in respect of quantity: *as*, “Pompey had eminent abilities: but he was neither *so* eloquent and politic a statesman, nor *so* brave and skilful a general; nor was he upon the whole *so* great a man, *as* Cæsar:” *so*—, *that*, expressing a Consequence; &c. [1].

[1] I have been the more particular in noting the proper uses of these Conjunctions; because they occur very frequently, and, as it was observed before of Connective words in general, are of great importance with respect to the clearness and beauty of style. I

INTERJECTIONS in English have no Government.

may add too, because mistakes in the use of them are very common ; as it will appear by the following Examples.

The Distributive Conjunction *either* is sometimes improperly used alone, instead of the simple Disjunctive *or* : “ Can the fig-tree bear olive berries ? *either* a vine, figs ? ” James, iii. 12. “ Why beholdest thou the mote, that is in thy brother’s eye ; but perceivest not the beam, that is in thine own eye ? *Either* how canst thou say to thy brother, Brother, let me pull out the mote that is in thine eye ; when thou thyself beholdest not the beam, that is in thine own eye ? ” Luke, vi. 41, 42. See also Chap. xv. 8. and Phil. iii. 12.

Neither is sometimes supposed to be included in its correspondent *nor* :

“ Simois, *nor* Xanthus, shall be wanting there.”

Dryden.

“ That all the application he could make, *nor* the King’s own interposition, could prevail with her Majesty.” Clarendon, Hist. Vol. III. p. 179. Sometimes to be supplied by a subsequent Negative : “ His rule holdeth still, that Nature, *nor* the engagement of words, are not so forcible as custom.” Bacon, Essay xxxix. “ The King *nor* the Queen were *not* at all deceived.” Clarendon, Vol. II. p. 363. These forms of expression seem both of them equally improper.

Though

Though they are usually attended with Nouns in the Nominative Case, and Verbs

Or is sometimes used instead of *nor*, after *neither* : “ This is another use, that, in my opinion, contributes rather to make a man learned than wise, and is *neither* capable of pleasing the understanding, *or* imagination.” Addison, Dial. I. on Medals.

Neither for *nor* : “ Neither in this world, *neither* in the world to come.” Matt. xii. 32.

So——, *as*, was used by the Writers of the last century, to express a Consequence, instead of *so*—, *that* : Examples ; “ And the third part of the stars was smitten ; *so as* [that] the third part of them was darkened.” Rev. viii. 12. “ The relations are *so* uncertain, *as* [that] they require a great deal of examination.” Bacon, Nat. Hist. “ *So as* [that] it is a hard calumny to affirm—.” Temple. “ *So as* [that] his thoughts might be seen.” Bentley, Dissert. on Æsop’s Fables, Sect. vi. “ There was something *so* amiable, and yet *so* piercing in his looks, *as* [that it] inspired me at once with love and terror.” Addison, Spect. N° 63. “ This computation being *so* easy and trivial, *as* [that] it is a shame to mention it.” Swift, Conduct of the Allies. “ That the Spaniards were *so* violently affected to the House of Austria, *as* [that] the whole kingdom would revolt.” Ibid. Swift, I believe, is the last of our good writers, who has frequently used this manner of expression : it seems improper, and is deservedly grown obsolete.

As, instead of *that*, in another manner : “ If a man
I in

in the Indicative Mode; yet the Case and have that penetration of judgement, *as* [that] he can discern what things are to be laid open." Bacon, Essay vi. "It is the nature of extreme self-lovers, *as* [that] they will set an house on fire, *and* it were but to roast their eggs." Id. Essay xxiii. "They would have given him such satisfaction in other particulars, *as* [that] a full and happy peace must have ensued." Clarendon, Vol. III. p. 214.

"I gain'd a son;
And such a son, *as* all men hail'd me happy."

Milton, Samf. Ag.
"We should sufficiently weigh the objects of our hope; whether they *be* such, *as* [that] we may reasonably expect from them what they propose in their fruition, and whether they *are* such, as we are pretty sure of attaining." Addison, Spect. N^o 535. "France was then disposed to conclude a peace upon such conditions, *as* [that] it was not worth the life of a grenadier to refuse them." Swift, Four last years of the Queen, B. ii.

As instead of the Relative *that*, *who*, or *which*:
"An it had not been for a civil Gentleman, *as* [who] came by——." Sir J. Wittol, in Congreve's Old Batchelor. "The Duke had not behaved with that loyalty, *as* [with which] he ought to have done." Clarendon, Vol. II. p. 460. "—With those thoughts *as* [which] might contribute to their honour." Ibid. p. 565. "In the order *as* they lie in his Preface." Middleton, Works, Vol. III. p. 8. It ought to be,
Mode

Mode are not influenced by them, but determine, “*in order*, as they lie ;” or, “*in the order in which* they lie.” “Securing to yourselves a succession of able and worthy men, *as* [which, or who,] may adorn this place.” Atterbury, Sermon. IV. 12.

The Relative *that* instead of *as* : “Such sharp replies, *that* [as] cost him his life in a few months after.” Clarendon, Vol. III. p. 179. And instead of *such* : —“If he was truly *that* [such a] scare-crow, *as* he is now commonly painted. But I wish I could do *that* [such] justice to the memory of our Phrygian, [as] *to oblige* the painters to change their pencil.” Bentley, Dissert. on Æsop’s Fables, Sect. x.

The Relative *who*—, instead of *as* : “There was no man *so* sanguine, *who* did not apprehend some ill consequence from the late change.” Swift, Examiner, N° 24. It ought to be, either, “*so* sanguine, *as* not to apprehend—” or “There was no man, *how* sanguine soever, *who* did not apprehend.”

As improperly omitted : “Chaucer followed nature every where ; but was never *so* bold [as] to go beyond her.” Dryden, Preface to Fables. “Which nobody presumes, or is *so* sanguine [as] to hope.” Swift, Drap. Let. v. “They are *so* bold [as] to pronounce—” Swift, Tale of a Tub, Sect. vii. “I must however be *so* just [as] to own.” Addison, Spect. N° 45. “That the discoursing of Politics shall be looked upon as [as] dull as talking on the weather.” Addison, Freeholder, N° 38.

The Conjunction *but* instead of *than* : “To trust in Christ is no more *but* to acknowledge him for God.”

mined

mined by the nature of the sentence [2].

Hobbes, Human Nature, Chap. xi. 11. "They will concern the female sex only, and import no more *but* that subjection, they should ordinarily be in, to their husbands." Locke. "The full moon was no sooner up, and shining in all its brightness, *but* he privately opened the gate of Paradise." Addison, Guardian, N^o 167. "This is none other *but* the house of God." Genesis, xxxvii. 17.

Too—, *that*, improperly used as Correspondent Conjunctions: "Whose Characters are *too* profligate, *that* the managing of them should be of any consequence." Swift, Examiner, N^o 24. It ought to be, "So profligate, *that* the managing of them *cannot* be of any consequence." And, *too*—, *than*: "You that are a step higher than a Philosopher, a Divine; yet have *too* much grace and wit *than* to be a Bishop." Pope, to Swift, Letter 80. It ought to be, "*Too* much grace and wit to be a Bishop:" without *than*. *So*—*but*: "If the appointing and apportioning of penalties to crimes be not *so* properly a consideration of justice, *but* rather [as] of prudence in the Lawgiver." Tillotson, Sermon. I. 35. And to conclude with an example, in which, whatever may be thought of the accuracy of the expression, the justness of the observation will be acknowledged; which may serve also as an apology for this and many of the preceding Notes: "No errors are *so* trivial, *but* they deserve to be mended." Pope to Steele, Letter 6.

[2] "Ah me!" seems to be a phrase of the same nature with "Wo is me!" for the resolution of which see above, p. 169. Note.

PUNCTUATION.

PUNCTUATION is the art of marking in writing the several pauses, or rests, between sentences, and the parts of sentences, according to their proper quantity or proportion, as they are expressed in a just and accurate pronunciation.

As the several articulate sounds, the syllables and words, of which sentences consist, are marked by Letters; so the rests and pauses, between sentences and their parts, are marked by Points.

But, though the several articulate sounds are pretty fully and exactly marked by Letters of known and determinate power; yet the several pauses, which are used in a just pronunciation of discourse, are very imperfectly expressed by Points.

For the different degrees of connexion between the several parts of sentences, and
N the

the different pauses in a just pronunciation, which express those degrees of connexion according to their proper value, admit of great variety; but the whole number of Points, which we have to express this variety, amounts only to Four.

Hence it is, that we are under a necessity of expressing pauses of the same quantity, on different occasions, by different points; and more frequently, of expressing pauses of different quantity by the same points.

So that the doctrine of Punctuation must needs be very imperfect: few precise rules can be given which will hold without exception in all cases; but much must be left to the judgement and taste of the writer.

On the other hand, if a greater number of marks were invented to express all the possible different pauses of pronunciation; the doctrine of them would be very perplexed and difficult, and the use of them would rather embarrass than assist the reader.

It

It remains therefore, that we be content with the Rules of Punctuation, laid down with as much exactness as the nature of the subject will admit: such as may serve for a general direction, to be accommodated to different occasions; and to be supplied, where deficient, by the writer's judgement.

The several degrees of Connexion between Sentences, and between their principal constructive parts, Rhetoricians have considered under the following distinctions, as the most obvious and remarkable: the Period, Colon, Semicolon, and Comma.

The Period is the whole Sentence, complete in itself, wanting nothing to make a full and perfect sense, and not connected in construction with a subsequent Sentence.

The Colon, or Member, is a chief constructive part, or greater division, of a Sentence.

The Semicolon, or Half-member, is a less constructive part, or subdivision, of a Sentence or Member.

A Sentence or Member is again subdivided into Commas, or Segments; which are the least constructive parts of a Sentence or Member, in this way of considering it; for the next subdivision would be the resolution of it into Phrases and Words.

The Grammarians have followed this division of the Rhetoricians, and have appropriated to each of these distinctions its mark, or Point; which takes its name from the part of the Sentence, which it is employed to distinguish; as follows:

The Period	} is thus marked	{	.
The Colon			:
The Semicolon			;
The Comma			,

The proportional quantity, or time, of the points, with respect to one another, is determined by the following general rule: The period is a pause in quantity or duration double of the Colon; the Colon is double of the Semicolon; and the Semicolon is double of the Comma. So that they are in the same proportion to one another,

other, as the Semibref, the Minim, the Crotchet, and the Quaver, in Music. The precise quantity, or duration, of each Pause or Note cannot be defined; for that varies with the Time; and both in Discourse and Music the same Composition may be rehearsed in a quicker or a slower Time: but in Music the proportion between the Notes remains ever the same; and in Discourse, if the doctrine of Punctuation were exact, the proportion between the Pauses would be ever invariable.

The Points then being designed to express the Pauses, which depend on the different degrees of connexion between Sentences, and between their principal constructive parts; in order to understand the meaning of the Points, and to know how to apply them properly, we must consider the nature of a Sentence, as divided into its principal constructive parts; and the degrees of connexion between those parts, upon which such division of it depends.

To begin with the least of these principal constructive parts, the Comma. In order the more clearly to determine the proper application of the Point which marks it, we must distinguish between an Imperfect Phrase, a Simple Sentence, and a Compounded Sentence.

An Imperfect Phrase contains no assertion, or does not amount to a Proposition or Sentence.

A Simple Sentence has but one Subject, and one finite Verb.

A Compounded Sentence has more than one Subject, or one finite Verb, either expressed or understood; or it consists of two or more simple Sentences connected together.

In a Sentence the Subject and the Verb may be each of them accompanied with several Adjuncts; as the Object, the End, the Circumstances of Time, Place, Manner, and the like: and the Subject or Verb may be either immediately connected with them, or mediately; that is, by being connected

connected with some thing, which is connected with some other ; and so on.

If the several Adjuncts affect the Subject or the Verb in a different manner, they are only so many Imperfect Phrases ; and the Sentence is Simple.

A Simple Sentence admits of no Point, by which it may be divided, or distinguished into parts.

If the several Adjuncts affect the Subject or the Verb in the same manner, they may be resolved into so many Simple Sentences : the Sentence then becomes Compounded, and it must be divided into its parts by Points.

For, if there are several Subjects belonging in the same manner to one Verb, or several Verbs belonging in the same manner to one Subject, the Subjects and Verbs are still to be accounted equal in number : for every Verb must have its Subject, and every Subject its Verb ; and every one of the Subjects, or Verbs, should or may have its point of distinction.

N 4

Examples:

Examples :

“The passion for praise produces excellent effects in women of sense.” Addison, Spect. N^o 73. In this Sentence *passion* is the Subject, and *produces* the Verb : each of which is accompanied and connected with its Adjuncts. The Subject is not passion in general, but a particular passion determined by its Adjunct of Specification, as we may call it ; the passion *for praise*. So likewise the Verb is immediately connected with its object, *excellent effects* ; and mediately, that is, by the intervention of the word *effects*, with *women*, the Subject in which these effects are produced ; which again is connected with its Adjunct of Specification ; for it is not meant of women in general, but of women *of sense* only. Lastly, it is to be observed, that the Verb is connected with each of these several Adjuncts in a different manner ; namely, with *effects*, as the object ; with *women*, as the subject

subject of them ; with *sense*, as the quality or characteristic of those women. The Adjuncts therefore are only so many imperfect Phrases ; the Sentence is a Simple Sentence, and admits of no Point, by which it may be distinguished into parts.

“ The passion for praise, which is so very vehement in the fair sex, produces excellent effects in women of sense.” Here a new Verb is introduced, accompanied with Adjuncts of its own ; and the Subject is repeated by the Relative Pronoun *which*. It now becomes a Compound Sentence, made up of two Simple Sentences, one of which is inserted in the middle of the other ; it must therefore be distinguished into its component parts by a Point placed on each side of the additional Sentence.

“ How many instances have we [in the fair sex] of chastity, fidelity, devotion ! How many Ladies distinguish themselves by the education of their children, care of their families, and love of their husbands ; which are the great qualities and achievements

ments of womankind: as the making of war, the carrying on of traffick, the administration of justice, are those by which men grow famous, and get themselves a name!" Ibid.

In the first of these two Sentences, the Adjuncts *chastity, fidelity, devotion*, are connected with the Verb by the word *instances* in the same manner, and in effect make so many distinct Sentences: "how many instances have we of chastity! how many instances have we of fidelity!" how many instances have we of devotion!" They must therefore be separated from one other by a Point. The same may be said of the Adjuncts, "education of their children, &c." in the former part of the next Sentence: as likewise of the several Subjects, "the making of war, &c." in the latter part; which have in effect each their Verb; for each of these, "is an atchievement by which men grow famous."

As Sentences themselves are divided into Simple and Compounded, so the Members
 2 of

of Sentences may be divided likewise into Simple and Compounded Members: for whole Sentences, whether Simple or Compounded, may become Members of other Sentences by means of some additional connexion.

Simple Members of Sentences closely connected together in one Compounded member, or sentence, are distinguished or separated by a Comma: as in the foregoing examples.

So likewise, the Case Absolute; Nouns in Apposition, when consisting of many terms; the Participle with something depending on it; are to be distinguished by the Comma: for they may be resolved into Simple Members.

When an address is made to a person, the Noun, answering to the Vocative Case in Latin, is distinguished by a Comma.

Examples:

“This said, He form’d thee, Adam; thee, O man, Dust of the ground.”

“Now

“Now morn, her rosy steps in th’ eastern clime
 Advancing, sow’d the earth with orient pearl.”
 Milton.

Two Nouns, or two Adjectives, connected by a single Copulative or Disjunctive, are not separated by a Point: but when there are more than two, or where the Conjunction is understood, they must be distinguished by a Comma.

Simple Members connected by Relatives, and Comparatives, are for the most part distinguished by a Comma: but when the Members are short in Comparative Sentences; and when two Members are closely connected by a Relative, restraining the general notion of the Antecedent to a particular sense; the pause becomes almost insensible, and the Comma is better omitted.

Examples:

“Raptures, transports, and extasies, are the rewards which they confer: sighs and tears, prayers and broken hearts, are the offerings

offerings which are paid to them.” Addison, Ibid.

“ Gods partial, changeful, passionate, unjust :
Whose attributes were rage, revenge, or lust.”

Pope.

“ What is sweeter than honey ? and what
is stronger than a lion ? ”

A circumstance of importance, though
no more than an Imperfect Phrase, may be
set off with a Comma on each side, to give
it greater force and distinction.

Example :

“ The principle may be defective or
faulty ; but the consequences it produces
are so good, that, for the benefit of man-
kind, it ought not to be extinguished.”
Addison, ibid.

A Member of a Sentence, whether Simple
or Compounded, that requires a greater
pause than a Comma, yet does not of itself
make a complete Sentence, but is followed
by

by something closely depending on it, may be distinguished by a Semicolon.

Example :

“But as this passion for admiration, when it works according to reason, improves the beautiful part of our species in every thing that is laudable; so nothing is more destructive to them, when it is governed by vanity and folly.” Addison, *ibid.*

Here the whole Sentence is divided into two parts by the Semicolon; each of which parts is a Compounded Member, divided into its Simple Members by the Comma.

A Member of a Sentence, whether Simple or Compounded, which of itself would make a complete Sentence, and so requires a geater pause than a Semicolon, yet is followed by an additional part making a more full and perfect Sense, may be distinguished by a Colon.

Example :

Example :

“Were all books reduced to their quintessence, many a bulky author would make his appearance in a penny paper : there would be scarce any such thing in nature as a folio : the works of an age would be contained on a few shelves : not to mention millions of volumes, that would be utterly annihilated.” Addison, Spect. N^o 124.

Here the whole Sentence is divided into four parts by Colons : the first and last of which are Compounded Members, each divided by a Comma ; the second and third are Simple Members.

When a Semicolon has preceded, and a greater pause is still necessary ; a Colon may be employed, though the Sentence be incomplete.

The Colon is also commonly used, when an Example, or a Speech, is introduced.

When

When a Sentence is so far perfectly finished, as not to be connected in construction with the following Sentence, it is marked with a Period.

In all cases, the proportion of the several Points in respect to one another is rather to be regarded, than their supposed precise quantity, or proper office, when taken separately.

Beside the Points which mark the pauses in discourse, there are others which denote a different modulation of the voice in correspondence with the sense. These are

The Interrogation Point,	} thus marked {	?
The Exclamation Point,		!
The Parenthesis,		()

The Interrogation and Exclamation Points are sufficiently explained by their names: they are indeterminate as to their quantity or time, and may be equivalent in that respect

ſpect to a Semicolon, a Colon, or a Period, as the ſenſe requires. They mark an Elevation of the voice.

The Parentheſis incloſes in the body of a Sentence a Member inſerted into it, which is neither neceſſary to the Senſe, nor at all affects the Conſtruction. It marks a moderate Depression of the voice, with a pauſe greater than a Comma.

A PRAXIS,

212
210 INTRODUCTION TO

A P R I A X I S,

Or EXAMPLE of Grammatical
Resolution.

1. **I**N the fifteenth year of the reign of
Tiberius Cæsar, Pontius Pilate being
governour of Judea, the word of God came
unto John, the son of Zacharias, in the
wilderness.

2. And he came into all the country
about Jordan, preaching the baptism of re-
pentance for the remission of sins.

3. And the same John had his raiment
of camel's hair, and a leathern girdle about
his loins; and his meat was locusts and
wild honey.

4. Then said he to the multitude, that
came forth to be baptized of him: O ge-
neration

neration of vipers, who hath warned you to flee from the wrath to come? Bring forth therefore fruits meet for repentance.

5. And as all men mused in their hearts of John, whether he were the Christ, or not; John answered, saying unto them all: I indeed baptize you with water; but one mightier than I cometh, the latchet of whose shoes I am not worthy to unloose: he shall baptize you with the Holy Ghost and with fire.

6. Now when all the people were baptized, it came to pass, that, Jesus also being baptized and praying, the heaven was opened, and the Holy Ghost descended in a bodily shape, like a dove, upon him; and lo! a voice from heaven saying: This is my beloved Son, in whom I am well pleased.

1. *In* is a Preposition; *the*, the Definite Article; *fifteenth*, an Adjective; *year*, a Substan-

Substantive, or Noun, in the Objective Case, governed by the Preposition *in*; *of*, a Preposition; *the reign*, a Substantive, Objective Case, governed by the Preposition *of*; *Tiberius Cæsar*, both Substantives, Proper Names, Government and Case as before; *Pontius Pilate*, Proper Names: *being*, the Present Participle of the Verb Neuter *to be*; *governour*, a Substantive; *of Judea*, a Proper Name, Government and Case as before; *Pontius Pilate being governour*, is the Case Absolute; that is, the Nominative Case with a Participle without a Verb following and agreeing with it; the meaning is the same as, *when* Pilate was governour; *the word*, a Substantive; *of God*, a Substantive, Objective Case, governed by the Preposition *of*; *came*, a Verb Neuter, Indicative Mode, Past Time, third Person Singular Number, agreeing with the Nominative Case *word*; *unto*, a Preposition; *John*, a Proper Name; *the son*, a Substantive, put in Apposition to *John*; that is, in the same Case, governed by the same

same Preposition *unto* ; *of Zacharias*, a Proper Name ; *in*, a Preposition ; *the wilderness*, a Substantive, Government and Case as before.

2. *And*, a Conjunction Copulative ; *he*, a Pronoun, third Person Singular, Masculine Gender, Nominative Case, standing for *John* ; *came*, as before ; *into*, a Preposition ; *all*, an Adjective ; *the country* a Substantive ; *about*, a Preposition ; *Jordan*, a proper Name ; Objective Cases, governed by their Prepositions ; *preaching*, the Present Participle of the Verb Active *to preach*, joined like an Adjective to the Pronoun *he* ; *the baptism*, a Substantive in the Objective Case following the Verb Active *preaching*, and governed by it ; *of repentance*, a Subst. Government and Case as before ; *for*, a Prep. *the remission of sins*, Substantives, the latter in the Plural Number, Government and Case as before.

3. *And*, (b. that is, *as before* ;) *the same*, an Adjective ; *John*, (b.) *had*, a Verb Active, Indicative Mode, Past Time, third

Person Singular, agreeing with the Nominative Case *John*; *his*, a Pronoun, third Person Singular, Possessive Case: *raiment*, a Substantive in the Objective Case, following the Verb Active *had*, and governed by it; *of camel's*, a Substantive, Possessive Case; *hair*, Substantive, Objective Case, governed by the Preposition *of*, the same as, *of the hair of a camel*; *and*, (b.) *a*, the Indefinite Article; *leathern*, an Adj. *girdle*, a Subst. *about*, (b.) *his*, (b.) *loins*, Subst. Pural Number, Objective Case, governed by the Preposition *about*, *and his*, (b.) *meat*, Subst. *was*, Indicative Mode, Past Time, third Person Singular of the Verb Neuter *to be*; *locusts*, Substantive, Plural Number, Nominative Case after the Verb *was*; *and*, (b.) *wild*, Adjective; *honey*, Substantive, the same Case.

4. *Then*, an Adverb; *said*, a Verb Active, Past Time, third Person Singular agreeing with the Nominative Case *he*, (b.) *to*, a Prep. *the multitude*, Subst. Objective Case, governed by the Prep. *to*;

that, a Relative Pronoun, its Antecedent is *the multitude*; *came*, (b.) *forth*, an Adverb; *to*, a Prep. and before a Verb the sign of the Infinitive Mode; *be baptized*, a Verb Passive, made of the Participle Passive of the Verb *to baptize*, and the Auxiliary Verb *to be*, in the Infinitive Mode; *of him*, Pronoun, third Person Sing. standing for *John*, in the Objective Case governed by the Prep. *of*; *O*, an Interjection; *generation*, Subst. Nominative Case; *of Vipers*, Subst. Plural Number, Objective Case, governed by the Prep. *of*; *who*, an Interrogative Pronoun; *hath warned*, a Verb Active, Present Perfect Time, made of the Perfect Participle, *warned*, and the Auxiliary Verb *hath*, third Person Singular, agreeing with the Nominative Case *who*; *you*, Pronoun, second Person Plural, Objective Case, following the Verb Active *warned*, and governed by it; *to flee*, Verb Neuter, Infinitive Mode; *from*, a Prep. *the wrath*, Subst. Objective Case, governed by the Prep. *from*; *to*
O 4. *come*,

come, Verb Neuter, Infinitive Mode ; *bring*, Verb Active, Imperative Mode, second Person Plural, agreeing with the Nominative Case *ye* understood ; as if it were, *bring ye* ; *forth*, an Adverb ; *therefore*, a Conjunction ; *fruits*, a Subst. Plural, Objective Case, following the Verb Active *bring*, and governed by it ; *meet*, an Adjective joined to *fruits*, but placed after it, because it has something depending on it ; *for repentance*, a Substantive governed by a Preposition, as before.

5. *And*, (b.) *as*, a Conjunction ; *all*, (b.) *men*, Subst. The Seats and Causes of Diseases, investigated by Anatomy; in five Books: Containing a great Variety of Dissections, with Remarks. Translated from the *Latin* of *John Baptist Morgagni*, Chief Professor of Anatomy, and President of the University of *Padua*. By *Benjamin Alexander*, M. D. 3 vols. 4to. 1 l. 16 s.

A full and plain Account of the Gout, from whence will be clearly seen the Folly, or the Baseness, of all Pretenders to the Cure of it, in which every Thing material by the best Writers on that Subject is taken Notice of; and accompanied with some new and important Instructions for its Relief, which the Author's Experience in the Gout above thirty Years hath induced him to impart. By *Ferdinando Warner*, LL. D. 3d Edition. 5 s.

A New Inquiry into the Causes, Symptoms, and Cure of Putrid and Inflammatory Fevers, &c. &c. By *W. Fordyce*, M. D. 4s.

Medical Tracts. By the late *John Wall*, M. D. of *Worcester*. Collected and republished by *Martin Wall*, M. D. 6s.

The Modern Practice of Physic; or, a Method of judiciously treating the several Disorders incident to the Human Body: Together with a Recital of their Causes, Symptoms, Diagnostics, Prognostics, and the Regimen necessary to be observed in Regard of them. 2 vols. By *John Ball*, M. D. 3d Edition, corrected and enlarged. 10s.

Medical Observations and Enquiries. By a Society of Physicians in *London*. 5 vols. 1l. 1rs. 6d.

The Anatomy of the Human Gravid Uterus, exhibited in 24 Plates. By *Dr. Hunter*. 6l. 6s. in Boards.

Medical Commentaries. Part I. Containing a plain and direct Answer to Professor *Munro*, junior. Interspersed with Remarks on the Structure, Function, and Diseases of several Parts of the Human Body, with a Supplement. 4to.

A Collection of Cases and Observations in Midwifery, by *William Smellie*, M. D. 3 vols. with Cuts. 1l. 1s.

An Account of the Methods pursued in the Treatment of Cancerous and Schirrous Disorders, and other Indurations. By *J. O. Justamond*, F. R. S. and Surgeon to the *Westminster* Hospital. 3s. sewed.

A new Treatise on the Diseases of Horses. Wherein what is necessary to the Knowledge of a Horse, the Cure of his Diseases, and other Matters relating to that Subject, are fully discussed in a plain and easy Manner,

Manner, from many Years Practice and Experience. With the cheapest and most efficacious Remedies. Illustrated with 32 Copper-plates. The 2d Edition, corrected. In 2 vols. By *William Gibson*, Surgeon. 12s.

Philosophy, Mathematics, Mechanics, &c. &c.

Astronomy explained upon Sir *Isaac Newton's* Principles, and made easy to those who have not studied the Mathematics. To which is added, the Method of finding the Distance of the Planets from the Sun, by the Transit of *Venus* over the Sun's Disk in the Year 1761. Illustrated with 28 Copper-plates. A new Edition. 8vo. 9s.

An easy Introduction to Astronomy, for young Gentlemen and Ladies: Describing the Figure, Motions, and Dimensions of the Earth; the different Seasons; Gravity and Light; the Solar System, the Transit of *Venus*, and its Use in Astronomy; the Moon's Motion and Phases, the Eclipses of the Sun and Moon; the Cause of the Ebbing and Flowing of the Sea, &c. 3d Edition. 5s.

Tables and Tracts relative to several Arts and Sciences. 5s.

An Introduction to Electricity, in six Sections. 1. Of Electricity in general. 2. A Description of the Electrical Machine. 3. A Description of the Apparatus (belonging to the Machine) for making Electrical Experiments. 4. How to know if the Machine be in good Order for performing the Experiment, and how to put it in Order if it be not. 5. How to make the Electrical Experiments, and to preserve Buildings from Damage by Lightning. 6. Medical Electricity. Illustrated with Plates. 4s.

Lectures

Lectures on Select Subjects, in Mechanics, Hydrostatics, Pneumatics, and Optics; with the Use of the Globes, the Art of Dialling, and the Calculation of the Mean Times of New and Full Moons and Eclipses. 7s. 6d.

Select Mechanical Exercises, shewing how to construct different Clocks, Orreries, and Sun-Dials, on plain and easy Principles. With several Miscellaneous Articles and Tables. Illustrated with Copper-plates. To which is prefixed, a short Account of the Life of the Author. 5s.

* * * The six preceding by *James Ferguson*, F. R. S.

A Synopsis of practical Mathematics. Containing plain Trigonometry; Mensuration of Heights, Distances, Surfaces and Solids; Surveying of Land, Gauging, Navigation and Gunnery. With Tables of the Logarithms of Numbers and of Sines and Tangents. For the Use of Schools, and Men of Business. By *Alexander Ewing*, Teacher of the Mathematics at *Edinburgh*. New Edition, with Additions 6s.

Observations on Reversionary Payments; on Schemes for granting Annuities to Widows, and to Persons in old Age; on the Method of finding the Value of Assurances on Lives and Survivorship; and on the National Debt. To which are added, new Tables of the Probabilities of Life; and Essays on the different Rates of Human Mortality in different Situations; the Influence of great Towns on Population; the Increase of Mankind; and other Subjects in Political Arithmetic, and the Doctrine of Annuities. By *Richard Price*, D. D. F. R. S. A new Edition.

The Doctrine of Annuities and Assurances on Lives and Survivorships, stated and explained. By *William Morgan*,

Morgan. Actuary to the Society for Equitable Assurances on Lives and Survivorships; to which is added an Introduction, addressed to the Society; also an Essay on the present State of Population in England and Wales. By the Reverend Dr. Price.

Agriculture, Botany, Gardening, &c.

The Universal Gardener and Botanist; or a general Dictionary of Gardening and Botany, exhibiting in Botanical Arrangement, according to the Linnaean System, every Tree, Shrub, and herbaceous Plant that merit Culture, either for Ornament or Curiosity, in every Department of Gardening, comprising accurate Directions, according to real Practice, for the Management of the Kitchen Garden, Fruit Garden, Pleasure Ground, Flower Garden, Nursery, Plantations, Green House, Hot House or Stove, Hot Beds, Forcing Frames, Hot Walls, and Forcing in general; describing the proper Situations, Exposures, Soils, Manures, and every Material and Utensil requisite in the different Garden Departments; together with Practical Directions for performing the various mechanical Operations of Gardening in general. By *Thomas Mawe*, Gardener to his Grace the Duke of Leeds (Author of the Gardener's Kalendar). 1 L. 7 s

The Complete Farmer: or a general Dictionary of Husbandry in all its Branches: containing the various Methods of cultivating and improving every Species of Land, according to the Precepts of both the old and new Husbandry. Third Edition, corrected and improved, illustrated with Copper-plates. 1 l. 5 s.

The Gardener's Dictionary abridged, in one Volume. By *Philip Miller*, F. R. S. Gardener. A new Edition. 1 l. 5 s.

Characteres Generum Plantarum quas in Itinere ad Insulas Maris Australis collegerunt, descripserunt, delinearunt, Annis 1772 & 1775. Johanne Reinoldo Forster, LL. D. 1 l. 7 s. Boards.

Every Man his own Gardener; being a new and much more complete Gardener's Kalendar than any hitherto published: containing not only an Account of what Work is necessary to be done in the Hot-House, Green-House, Shrubbery, Kitchen, Flower and Fruit Gardens, for every Month in the Year, but also ample Directions for performing the said Work, according to the newest and most approved Methods now in Practice amongst the best Gardeners. In this Edition, particular Directions are given with respect to Soil and Situation. And to the Whole are added, complete and useful Lists of Forest-Trees, Flowering Shrubs, Fruit-Trees, Evergreens; Annual, Biennial, and Perennial Flowers; Hot-House, Green-House, and Kitchen-Garden Plants; with the Varieties of each Sort, cultivated in the *English* Gardens. By *Thomas Marwe*, Gardener to his Grace the Duke of *Leeds*; and other Gardeners. 6th Edition. 5 s.

BLANK

BLANK PRECEDENTS

Relating to the Office of Justices of the Peace, settled by Dr. BURN, and printed by the King's Law-Printers, for T. CADELL; and sold only by the said T. CADELL, Bookseller in the Strand.

GENERAL FORMS.

1. Of an Information.
2. — Summons.
3. — Warrant.
4. — Examination of a Person accused.
5. — Commitment.
6. Apprentices. Summons of the Master by one Justice on Complaint of the Apprentice.
7. — Summons of the Apprentice by one Justice on Complaint of the Master.
8. — Summons of the Master by two Justices.
9. — Discharge of an Apprentice by two Justices on the Master's misusing him.
10. — Warrant for a disorderly Apprentice by two Justices.
11. — Commitment of an Apprentice by two Justices.
12. Assault. Warrant for.
13. Bastard. Voluntary Examination of a Woman with Child of a Bastard.
14. — Warrant to apprehend the reputed Father before the Birth.
15. — Examination after the Birth.
16. — Warrant to apprehend the reputed Father after the Birth.

17. Bastard. Recognizance of the reputed Father to appear and abide the Order.
18. ——— Commitment of the reputed Father for want of Sureties.
19. ——— Warrant to convene the Parties in order to the Filiation.
20. ——— General Order of Bastardy.
21. Costs. Order for Payment of Costs in Matters before the Justices.
22. ——— Warrant of Distress for Costs.
23. ——— Commitment for want of Distress for Costs.
24. Felony. Warrant for Suspicion of Felony.
25. ——— Commitment for Felony.
26. ——— Recognizance to indict for Felony.
27. ——— Recognizance to give Evidence for Felony.
28. Game. Information for destroying.
29. ——— Summons for destroying.
30. ——— Warrant of Distress for destroying.
31. ——— Commitment for want of Distress.
32. Good Behaviour, Warrant for.
33. ——— Recognizance for.
34. Highways. Appointment of Surveyors.
35. ——— Information for Default of Labourers.
36. ——— Summons for Default of Labourers.
37. ——— Warrant of Distress for Default of Labourers.
38. ——— Information for not paying a Highway Assessment.
39. ——— Summons for not paying a Highway Assessment.
40. ——— Warrant of Distress for a Highway Assessment.
41. ——— Commitment for want of Distress for a Highway Assessment.
42. Militia. High Constable's Warrant for returning new Lists.
43. ——— Notice of Balloting.

44. Militia. Warrant for the Persons balloted to be sworn and inrolled.
45. ——— Information against a Man not appearing to be sworn.
46. ——— Summons thereupon.
47. ——— Warrant to distrain for the Penalty of 10l.
48. ——— Commitment for want of Distress.
49. ——— Warrant of Distress for Quakers Substitutes.
50. Misdemeanor. Recognizance to indict.
51. ——— Recognizance to answer.
52. ——— Recognizance to give Evidence.
53. Peace, Warrant.
54. ——— Recognizance for.
55. Poor. Warrant for returning Overseers.
56. ——— Appointment of Overseers.
57. ——— Summons for Non-payment of the Poor-rate.
58. ——— Warrant of Distress for the Poor-rate.
59. ——— Warrant to bring the Pauper before two Justices, in order to a Removal.
60. ——— General Order of Removal.
61. ——— Order of Removal of a Certificate Person.
62. ——— Complaint for want of Relief.
63. ——— Summons to shew Cause why Relief should not be granted.
64. ——— Order for relieving a poor Person.
65. Recognizance, General, without Sureties.
66. ——— with Sureties.
67. Search Warrant for stolen Goods.
68. Servants. Complaint for Wages.
69. ——— Summons of the Master for Wages.
70. ——— Order for Payment of Wages.
71. ——— Distress for Wages.
72. ——— Complaint against the Master for ill Usage.
73. ——— Summons of the Master for ill Usage.
74. ——— Discharge of the Servant for ill Usage.
75. ——— Complaint of the Master against the Servant.

76. Servants. Warrant for a disorderly servant.
77. ——— Commitment of the Servant for Mis-
behaviour.
78. Soldier. Certificate of his inlisting.
79. ——— Warrant to raise Carriages.
80. Tithes. Complaint for small Tithes.
81. ——— Summons thereupon.
82. ——— Order for Payment.
83. ——— Warrant of Distress.
84. ——— Complaint for Quakers Tithes.
85. ——— Summons for Quakers Tithes.
86. ——— Order for Payment of Quakers Tithes.
87. ——— Distress for Quakers Tithes.
88. Vagrants. Warrant of privy Search.
89. ——— Examination of a Vagrant.
90. ——— Warrant for whipping a Vagrant.
91. ——— Commitment of a Vagrant to the
House of Correction.
92. ——— Pass within the same Jurisdiction.
93. ——— Pass from County to County.
94. ——— Pass to Scotland.
95. ——— Pass to Ireland.
96. ——— Certificate of the Allowance for Pass-
ing.
97. ——— Order to pay 10 s. for apprehending
a Vagrant.
98. Wood, stolen, Warrant to search for.
99. ——— Order for satisfaction to the
Owner.
100. ——— Commitment for stealing Wood.

* * The above PRECEDENTS are sold after the Rate of One Guinea for one complete Set, consisting of three Sheets of each Sort on Paper, and three Recognizances of each Sort on Parchment; or One Shilling and Sixpence a Quire for any of the Particulars on Paper, and One Shilling and Sixpence a Dozen for the Parchment Recognizances.

A short introduction tho English Grammar with critical notes

London 1783
